## **New Study FS-Con-101 Questions & Valid FS-Con-101 Exam Question**

As the saying goes, verbal statements are no guarantee. So we are willing to let you know the advantages of our FS-Con-101 study braindumps. In order to let all people have the opportunity to try our products, the experts from our company designed the trial

version of our FS-Con-101 prep guide for all people. If you have any hesitate to buy our products. You can try the trial version from our company before you buy our FS-Con-101 Test Practice files. The trial version will provide you with the demo. More importantly, the demo from our company is free for all people. You will have a deep understanding of the FS-Con-101 study braindumps from our company by the free demo.

## Salesforce Certified Field Service Consultant Sample Questions (Q122-Q127):

### NEW QUESTION # 122

Universal Containers wants to track when Technicians need to visit a customer site multiple times to resolve an issue. How should a Consultant configure this using a single Work Order?

- A. Create a new Service Appointment for each site visit.
- B. Create a new Work Order Line Item for each site visit.
- C. Create a new Child Work Order for each site visit.
- D. Create a new Product Consumed for each site visit.

**Answer: A**

Explanation:

Service Appointments are records that track the date, time, duration, and assigned resource for a work order or work order line item [117]. Creating a new Service Appointment for each site visit would allow Universal Containers to track when Technicians need to visit a customer site multiple times to resolve an issue by creating different service appointments for the same work order and capturing notes and status updates for each service appointment. Creating a new Child Work Order for each site visit would create unnecessary records and complexity. Child Work Orders are work orders that are related to another work order as part of a hierarchy [118]. Creating a new Product Consumed for each site visit would not track the site visits. Products Consumed are records that track the products or parts that are used or installed during a service appointment [119]. Creating a new Work Order Line Item for each site visit would not track the site visits. Work Order Line Items are records that track specific tasks or products related to a work order [120].
