JN0-452 study material applies to all types of candidates. Buying a set of learning materials is not difficult, but it is difficult to buy one that is suitable for you. For example, some learning materials can really help students get high scores, but they usually require users to have a lot of study time, which is difficult for office workers. However, JN0-452 Study Material is to help students improve their test scores by improving their learning efficiency. Therefore, users can pass exams with very little learning time.

Juniper JN0-452 Exam Syllabus Topics:

Section	Weight	Objectives
Topic 1: Access Points and Antennas	15%	- Describe AP deployment considerations - Describe AP model families and capabilities - Describe AP power options (PoE, DC) - Describe AP mounting options - Describe antenna types and selection criteria

Topic 2: Advanced Features and API	0%	- Describe location services and features - Describe Bluetooth Low Energy (BLE) and IoT integration - Describe webhook and third-party integrations - Describe Mist API structure and capabilities
Topic 3: Troubleshooting and Analytics	20%	- Describe event and alarm management - Analyze wireless coverage and capacity - Troubleshoot connectivity issues using Mist portal - Troubleshoot wireless performance issues - Describe client troubleshooting tools - Describe Marvis AI capabilities
Topic 4: WLAN Configuration	15%	- Configure rate limiting and traffic shaping - Configure band steering and client load balancing - Configure radio settings and RF profiles - Describe RRM and Radio Resource Management - Describe Access Category (AC) and QoS concepts
Topic 5: Mist AI and the Wired to Wireless Enterprise	15%	- Describe the Mist cloud architecture and portal - Describe the challenges of traditional wireless architectures - Describe the benefits of AI-driven operations - Describe the components of Mist AI for wireless
Topic 6: Security and Authentication	15%	- Describe RADIUS integration - Describe BYOD and device onboarding - Describe captive portal configuration - Configure 802.1X authentication - Describe wireless security concepts (WPA2/WPA3) - Describe AAA server concepts and configuration
Topic 7: Site Deployment	20%	- Perform site creation and configuration - Describe SSID and security configuration - Describe the site deployment workflow - Describe Virtual Network (VN) concepts - Describe WLAN configuration - Perform AP assignment and configuration

Complete Latest JN0-452 Braindumps & First-Grade JN0-452 Lead2pass & Efficient Juniper Mist AI Wireless, Specialist (JNCIS-MistAI-Wireless)

Our JN0-452 exam braindumps are set high standards for your experience. That is the reason why our JN0-452 training questions gain well brand recognition and get attached with customers all these years around the world. Besides, our JN0-452 learning questions are not only high effective but priced reasonably. Their prices are acceptable for everyone and help you qualify yourself as and benefit your whole life.

Juniper Mist AI Wireless, Specialist (JNCIS-MistAI-Wireless) Sample Questions (Q44-Q49):

NEW QUESTION # 44

You are deploying multiple Mist APs across many sites in your network. You must ensure that you can group similar devices together to easily apply consistent WxLAN policies across multiple sites.

Which configuration object should be used to accomplish this behavior?

- A. device profile
- B. RF template
- C. organization labels
- D. radio management

Answer: A

Explanation:

When deploying multiple Mist APs across many sites in your network and grouping similar devices together to easily apply consistent WxLAN policies across multiple sites, you should use device profiles.

NEW QUESTION # 45

Referring to the exhibit, what does the security alert indicate?

- A. An AP that is not part of the Mist Org is advertising the same SSIDs as the Mist APs.
- B. An AP that is not part of the Mist Org is launching a DDoS attack on the Mist APs.
- C. An AP that is not part of the Mist Org is operating in the same RF channel as the nearby Mist AP.
- D. An AP that is not part of the Mist Org is connected to the same wired network as the Mist APs.

Answer: A

Explanation:

Reference: <https://www.mist.com/documentation/rogue-neighbor-honeypot-aps/> According to the Security Alerts - Mist document, the security alert indicates that an AP that is not part of the Mist Org is advertising the same SSIDs as the Mist APs. This is a type of rogue AP that tries to impersonate a legitimate AP and lure users into connecting to it.

References: <https://www.mist.com/documentation/security-alerts/>

NEW QUESTION # 46

Click the Exhibit button. You are asked to troubleshoot an authorization issue at a customer's site. You start to troubleshoot the client that is responsible for the most "bad events" at this site.

Referring to the exhibit, what is the name of the client that you would begin troubleshooting?

Name	Overall Impact	Failure Rate
2a:52:55:f2:ae:81	0.30%	100%
Galaxy-S10e	18.16%	> 99%
android-5bd931eb44a4d28b	1.45%	98%
Mohammads-Air	2.03%	95%
hal	1.36%	94%
dc:a6:32:c7:e7:a7	0.17%	91%

- A. Mohammads-Air
- B. 2a:52:55:f2:ae:81
- C. Galaxy-S10e
- D. dc:a6:32:c7:e7:a7

Answer: C

Explanation:

The client with the highest overall impact is responsible for the largest share of bad events at the site. Troubleshooting should begin with that client because resolving its issue would have the greatest effect on improving the authorization SLE.

NEW QUESTION # 47

You are designing security around your wireless network and need to create WxLAN policies for Juniper Mist that require new policy labels. At which two levels would you be able to create policy labels in this scenario? (Choose two.)

- A. organization
- B. WLAN
- C. AP
- D. site

Answer: A,D

Explanation:

WxLAN policy labels in Juniper Mist can be created at the organization level for global use across sites, or at the site level for localized policies. This flexibility allows centralized management while also supporting site-specific security requirements.

NEW QUESTION # 48

You are building your floor plan for a recent Juniper Mist deployment and you must ensure that when you are finished, you can track user movements and locations throughout the floor plan. In this scenario, which statement is correct regarding AP orientation in the Mist UI?

- A. In the UI, the APs must all be oriented on the floor plan to face true north.
- B. In the UI, the APs must be oriented on the floor plan in the same direction as the physical APs.
- C. In the UI, the orientation of the APs will not affect Mist's location services.
- D. In the UI, the APs must all be oriented on the floor plan to face geographical north.

Answer: B

Explanation:

In a Juniper Mist AI deployment, achieving high-fidelity location accuracy is entirely dependent on the digital twin (the floor plan in the Mist UI) accurately reflecting the physical environment. While scaling the map is the foundation, AP orientation is the most critical variable for the vBLE (virtual Bluetooth Low Energy) engine to correctly calculate a client's position.

Mist Access Points, such as the AP43 or AP45, feature a patented 16-element directional vBLE antenna array. This array does not broadcast in a simple omnidirectional circle; instead, it uses eight distinct directional beams to blanket an area. The Mist Cloud uses "probability surfaces" to determine a user's location by examining the RF fingerprints from these specific beams. If an AP is physically mounted with its LED pointing toward a specific hallway, but is oriented in the Mist UI facing a different direction, the location engine will receive signal data that does not match its internal map of the beams. This results in "flipped" locations or "teleporting," where a user appears on the opposite side of the AP from where they actually are.

To ensure accuracy, administrators must use the small green dot on the outer ring of the AP icon in the Mist Live View. This green dot represents the physical LED on the AP hardware. The orientation in the UI must be rotated so that the green dot points in the exact same direction as the physical LED relative to the floor plan's perspective. It is a common misconception that APs must face true north (A) or geographical north (D); the map and APs can be oriented in any way that is convenient for the facility layout, provided the relative alignment between the virtual icon and the physical device is identical.

NEW QUESTION # 49

.....

When you have a lot of electronic devices, you definitely will figure out the way to study and prepare your JN0-452 exam with them. It is so cool even to think about it. As we all know that the electronic equipment provides the convenience out of your imagination. With our APP online version of our JN0-452 practice materials, your attempt will come true. Our JN0-452 exam dumps can be quickly downloaded to the electronic devices.
