NGFW-Engineer Valid Test Sample & New NGFW-Engineer Exam Online

If you are very busy, you can only take two or three hours a day to study our NGFW-Engineer study engine. Then I tell you this is enough! After ten days you can go to the exam. With such an efficient product, you really can't find the second one! In any case, many people have passed the exam after using NGFW-Engineer Training Materials. This is a fact that you must see. As long as you are still a sensible person, you will definitely choose NGFW-Engineer practice quiz. Don't hesitate! Time does not wait!

PassLeaderVCE Palo Alto Networks NGFW-Engineer exam training materials are provided in PDF format and software format. It contains Palo Alto Networks NGFW-Engineer exam questions and answers. These issues are perfect, Which can help you to be successful in the Palo Alto Networks NGFW-Engineer Exam. PassLeaderVCE Palo Alto Networks NGFW-Engineer exam comprehensively covers all syllabus and complex issues. The PassLeaderVCE Palo Alto Networks NGFW-Engineer exam questions and answers is the real exam challenges, and help you change your mindset.

>> NGFW-Engineer Valid Test Sample <<

Evaluate Your Exam Preparation with Online Palo Alto Networks NGFW-Engineer Practice Test Engine

Are you preparing for the NGFW-Engineer exam certification recently? Do you want to get a high score in the NGFW-Engineer actual test? PassLeaderVCE NGFW-Engineer practice test may be the right study material for you. When you choose Palo Alto Networks NGFW-Engineer pdf dumps, you can download it and install it on your phone or i-pad, thus you can make full use of your spare time, such as, take the subway or wait for the bus. Besides, if you are tired of the electronic screen, you can print the NGFW-Engineer Pdf Dumps into papers, which is convenient to make notes.

Palo Alto Networks Next-Generation Firewall Engineer Sample Questions (Q44-Q49):

NEW QUESTION # 44

An engineer is implementing a new rollout of SAML for administrator authentication across a company's Palo Alto Networks NGFWs. User authentication on company firewalls is currently performed with RADIUS, which will remain available for six months, until it is decommissioned. The company wants both authentication types to be running in parallel during the transition to SAML. Which two actions meet the criteria? (Choose two.)

- A. Create and add the "SAML Identity Provider" Server Profile to the authentication profile for the "RADIUS" Server Profile.
- B. Create an authentication sequence that includes both the "RADIUS" Server Profile and "SAML Identity Provider" Server Profile to run the two services in tandem.
- C. Create and apply an authentication profile with the "SAML Identity Provider" Server Profile.
- D. Create a testing and rollback plan for the transition from Radius to SAML, as the two authentication profiles cannot be run in tandem.

Answer: A,B

Explanation:
To enable both RADIUS and SAML authentication to run in parallel during the transition period, you need to configure an authentication sequence and an authentication profile that includes both authentication methods.
By creating an authentication sequence that includes both RADIUS and SAML server profiles, the firewall will attempt authentication with RADIUS first and, if that fails, will fall back to SAML. This enables both authentication types to function simultaneously during the transition period.
You can also configure an authentication profile that includes both the RADIUS Server Profile and the SAML Identity Provider server profile. This setup allows the firewall to use both RADIUS and SAML for authentication requests, and it will check both authentication methods in parallel.

NEW QUESTION # 45

A PA-Series firewall with all licensable features is being installed. The customer's Security policy requires that users do not directly access websites. Instead, a security device must create the connection, and there must be authentication back to the Active Directory servers for all sessions.
Which action meets the requirements in this scenario?

- A. Deploy the Advanced URL Filtering license and captive portal.
- B. Deploy the Next-Generation Firewalls as normal and install the User-ID agent.
- C. Deploy the explicit proxy with Kerberos authentication scheme.
- D. Deploy the transparent proxy with Web Cache Communications Protocol (WCCP).

Answer: C

Explanation:
In this scenario, the customer requires that users do not directly access websites and that a security device (the firewall) manages the connection, while also ensuring that there is authentication back to the Active Directory (AD) servers for all sessions. The explicit proxy with Kerberos authentication is the best solution because:
The explicit proxy allows the firewall to intercept user web traffic and manage the connections on behalf of users.
Kerberos authentication ensures that the user's identity is validated against the Active Directory servers before the session is allowed, fulfilling the authentication requirement.

NEW QUESTION # 46

What are the phases of the Palo Alto Networks AI Runtime Security: Network Intercept solution?

- A. Discovery, Deployment, Detection, Prevention
- B. Scanning, Isolation, Whitelisting, Logging
- C. Policy Generation, Discovery, Enforcement, Logging
- D. Profiling, Policy Generation, Enforcement, Reporting

Answer: A

Explanation:
The phases of the Palo Alto Networks AI Runtime Security: Network Intercept solution are designed to help identify and protect against potential threats in real time by using AI to detect and prevent malicious activities within the network.

Discovery: Identifying applications, services, and behaviors within the network to understand baseline activity.
Deployment: Implementing the solution into the network and integrating with existing security measures.
Detection: Monitoring traffic and activities to identify abnormal or malicious behavior.
Prevention: Taking action to stop threats once detected, such as blocking malicious traffic or stopping exploit attempts.

NEW QUESTION # 47
An NGFW engineer is configuring multiple Panorama-managed firewalls to start sending all logs to Strata Logging Service. The Strata Logging Service instance has been provisioned, the required device certificates have been installed, and Panorama and the firewalls have been successfully onboarded to Strata Logging Service.
Which configuration task must be performed to start sending the logs to Strata Logging Service and continue forwarding them to the Panorama log collectors as well?

- A. Modify all active Log Forwarding profiles to select the "Cloud Logging" option in each profile match list in the appropriate device groups.
- B. Enable the "Panorama/Cloud Logging" option in the Logging and Reporting Settings section under Device --> Setup --> Management in the appropriate templates.
- C. Select the "Enable Cloud Logging" option in the Cloud Logging section under Device --> Setup --> Management in the appropriate templates.
- D. Select the "Enable Duplicate Logging" option in the Cloud Logging section under Device --> Setup --> Management in the appropriate templates.

Answer: C

Explanation:
To begin sending logs to Strata Logging Service while continuing to forward them to Panorama log collectors, the necessary configuration is to enable Cloud Logging. This option is configured in the Cloud Logging section under Device → Setup → Management in the appropriate templates. Once enabled, this ensures that logs are directed both to the Strata Logging Service (cloud) and to the Panorama log collectors.

NEW QUESTION # 48
According to dynamic updates best practices, what is the recommended threshold value for content updates in a mission- critical network?

- A. 32 hours
- B. 16 hours
- C. 8 hours
- D. 48 hours

Answer: C

Explanation:
For a mission-critical network, it is recommended to configure the content update threshold to 8 hours. This ensures that the network is protected with the latest threat intelligence, updates to signatures, and other critical content, minimizing the exposure to newly discovered vulnerabilities and threats.
Regular content updates are crucial in mission-critical environments to ensure the firewall is up-to-date with the latest protections. 8 hours is considered an optimal balance between timely updates and network performance.

NEW QUESTION # 49
......

Engineer-exam-learning-guide.html

You can view and interact our NGFW-Engineer Testing Engine interface, NGFW-Engineer Exam Questions Pool and analyze practice Network Security Administrator a Palo Alto Networks Next-Generation Firewall Engineer exams features before you choose to buy it, Palo Alto Networks NGFW-Engineer Valid Test Sample All your sensitive information is never shared with sellers, Firstly, the PDF version of NGFW-Engineer exam materials questions is normal and convenience for you to read, print and take notes, Besides, you can choose the NGFW-Engineer training material for simulation test.

You can't just build it and hope they come, So What's the Big Deal, You can view and interact our NGFW-Engineer Testing Engine interface, NGFW-Engineer Exam Questions Pool and analyze practice Network Security Administrator a Palo Alto Networks Next-Generation Firewall Engineer exams features before you choose to buy it.

2026 NGFW-Engineer Valid Test Sample | Pass-Sure Palo Alto Networks Next-Generation Firewall Engineer 100% Free New Exam Online

All your sensitive information is never shared with sellers, Firstly, the PDF version of NGFW-Engineer exam materials questions is normal and convenience for you to read, print and take notes.

Besides, you can choose the NGFW-Engineer training material for simulation test, There are specific experts to maintain our websites everyday.
