SAP C_S4TM_2023認証はIT業界にとっても重要な地位があることがみんなが、たやすくその証本をとることはありません。いまの市場にとってもよい問題集が探すことは難しいです。でも、ShikenPASSにいつでも最新の問題を探ことができ、完璧な解説を楽に勉強することができます。

SAP Certified Associate - SAP S/4HANA Cloud Private Edition - Transportation Management 認定 C_S4TM_2023 試験問題 (Q71-Q76):

質問 # 71

In which object can you track and trace the whole journey of your goods, if the whole journey has multiple transportation stages?

- A. Consignment order
- B. Freight booking
- C. Freight unit
- D. Freight order

正解: C

解説:

Freight Order Management

質問 # 72

Which of the following are functions of a consignment order? Note: There are 2 correct answers to this question.

- A. Tendering
- B. Charge calculation
- C. Subcontracting
- D. Load planning

正解: B、C

解説:

Transportation Management Overview and Fundamentals

質問 # 73

How can the optimizer distinguish between currently used and new carriers in a strategic freight procurement process?

- A. By defining rate tables
- B. By defining a target share strategy
- C. By sending the request for quotation (RFQ) to new carriers first
- D. By defining target rates

正解: B

質問 # 74

What is the maximum number of freight settlement documents that can be created from a freight order with two deliveries during its lifecycle, given that all the charge elements in the calculation sheet have a value greater than zero?

- A. 0
- B. No limit
- C. 1
- D. 2

正解: B

解説:

In SAP S/4HANA Transportation Management, freight settlement documents (FSDs) are created based on freight orders to settle charges with carriers. According to the SAP documentation, there is no limit to the number of FSDs that can be created from a freight order during its lifecycle, as additional FSDs can be generated for changes, such as additional charges, corrections, or disputes, provided the charge elements have non-zero values. For a freight order with two deliveries, multiple FSDs can be created to account for initial settlements, amendments, or additional charges (e.g., detention or assessorial charges) throughout the lifecycle.

The other options are incorrect:

* A (3), B (1), and C (2) assume a fixed number of FSDs, which is not accurate since the system allows multiple FSDs based on changes or additional requirements.
