100%專業的CTS真題，最好的考試資料幫助妳快速通過CTS考試

PDFExamDumps提供的資料是PDFExamDumps擁有超過10年經驗的AVIXA精英通過研究與實踐而得到的。PDFExamDumps有你們需要的最新最準確的考試資料。PDFExamDumps正是為了你們的成功而存在的，選擇PDFExamDumps就等於選擇成功。如果想顺利通过CTS考试，PDFExamDumps是你不二的选择。

AVIXA CTS 考試大綱：

主題	簡介
主題 1	<ul style="list-style-type: none">Supporting AV System Operation: This section of the exam measures the skills of AV support specialists and covers the ongoing support of AV systems. It includes troubleshooting issues, providing remote assistance, supporting live events, and offering in-room operation training to ensure smooth system operation.
主題 2	<ul style="list-style-type: none">Servicing AV Solutions: This section of the exam measures the skills of AV maintenance managers and focuses on the maintenance and repair of AV solutions. It involves supervising AV operations, conducting preventative maintenance, performing firmware and equipment upgrades, and troubleshooting and repairing AV systems to ensure they remain functional and efficient.
主題 3	<ul style="list-style-type: none">Implementing AV Solutions: This section of the exam measures the skills of AV system integrators and focuses on the implementation of AV solutions. It involves integrating AV systems, verifying their functionality, and managing the integration process, including training, documentation, and ensuring operational readiness.
主題 4	<ul style="list-style-type: none">Creating AV Solutions: This section of the exam measures the skills of AV system designers and covers the process of creating audiovisual solutions. It includes conducting customer needs analysis, performing site surveys to assess environmental factors like lighting and acoustics, developing project scopes, and designing AV solutions with detailed drawings and materials lists.

問題 #65

A client with an open concept office space has stated a concern regarding speech privacy for workers. A possible solution for this issue is a(n)

- A. audio phase cancellation system
- B. distributed speaker system
- C. sound masking system
- D. individual audio monitor system

答案: C

解題說明:

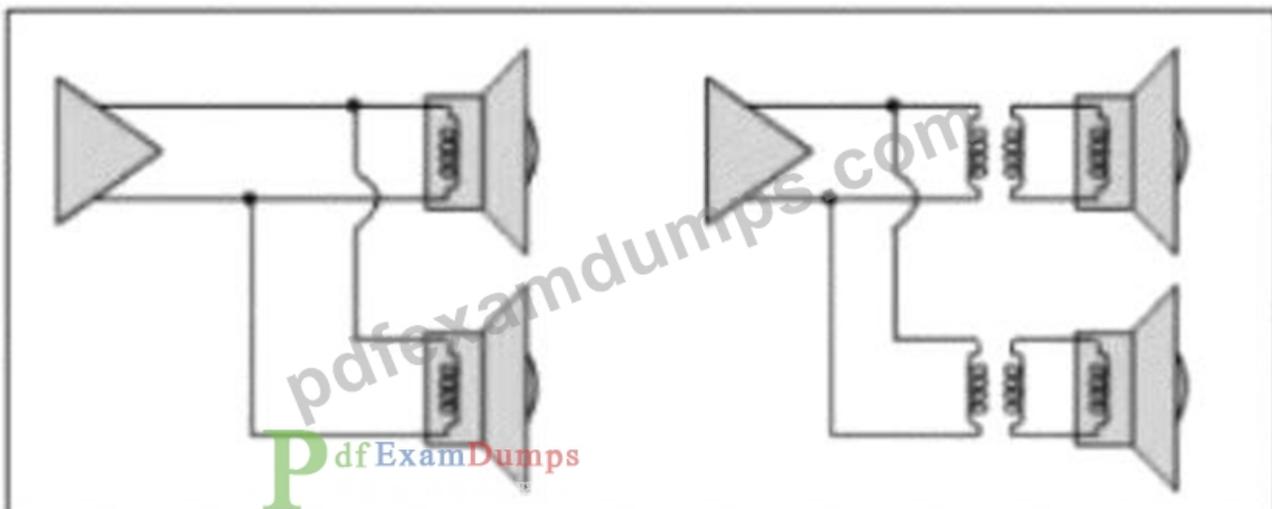

For an open-concept office space where speech privacy is a concern, a sound masking system is an effective solution. Sound masking involves adding a background sound, usually similar to airflow, to reduce the intelligibility of speech. This helps in minimizing distractions and enhancing privacy without isolating individuals physically.

CTS Technology Specialist Reference

The CTS materials highlight sound masking as a preferred solution for enhancing speech privacy in open office environments. It effectively addresses concerns related to audible distractions and speech privacy, making it well-suited for such spaces.

問題 #66

The circuit on the RIGHT is an electrical drawing of what type of speaker system?

- A. series circuit
- B. stereo pair circuit
- C. constant voltage
- D. combination parallel/series circuit

答案: D

解題說明:

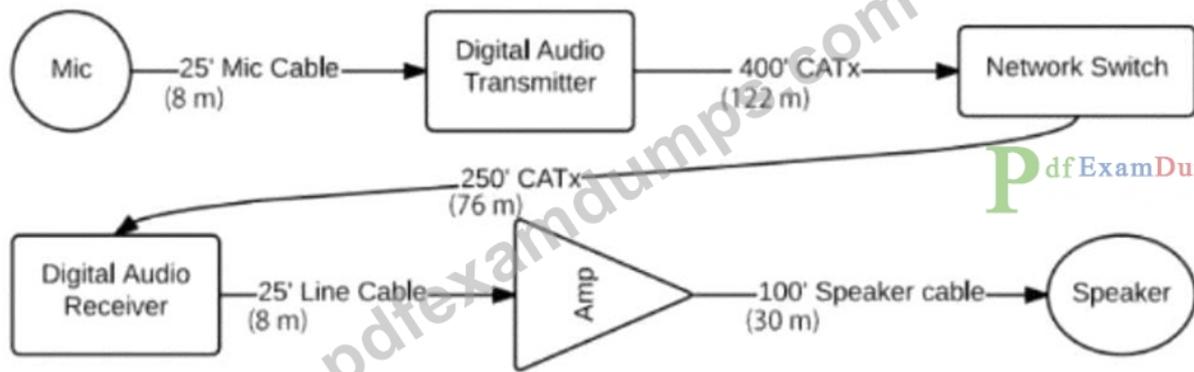

The circuit on the right is a combination parallel/series circuit. In this configuration, two sets of speakers are connected in parallel, and these parallel sets are then connected in series. This type of arrangement allows for balancing the load across multiple speakers while maintaining the desired impedance levels.

問題 #67

After installation, the system does not pass audio. Based on the information in the drawing, what is the MOST LIKELY cause?

- A. speaker requires a 70 V transformer
- B. phantom power is required
- C. system needs a DSP
- D. cable lengths

答案: B

解題說明:

The microphone in the setup may require phantom power to operate. Phantom power is a DC voltage (usually 48V) supplied through the microphone cable to power condenser microphones. Without phantom power, a condenser microphone will not function, resulting in no audio being passed through the system. Since the drawing shows a microphone connected to a digital audio transmitter, it's likely a condenser microphone, and if it's not receiving phantom power, this would be the most probable cause of the system not passing audio.

問題 #68

During a site survey, a sound pressure level (SPL) meter can be used for measuring

- A. the efficiency of the amplification.
- B. distance to existing loudspeakers.
- C. the ambient noise level.
- D. the room acoustics.

答案: C

解題說明:

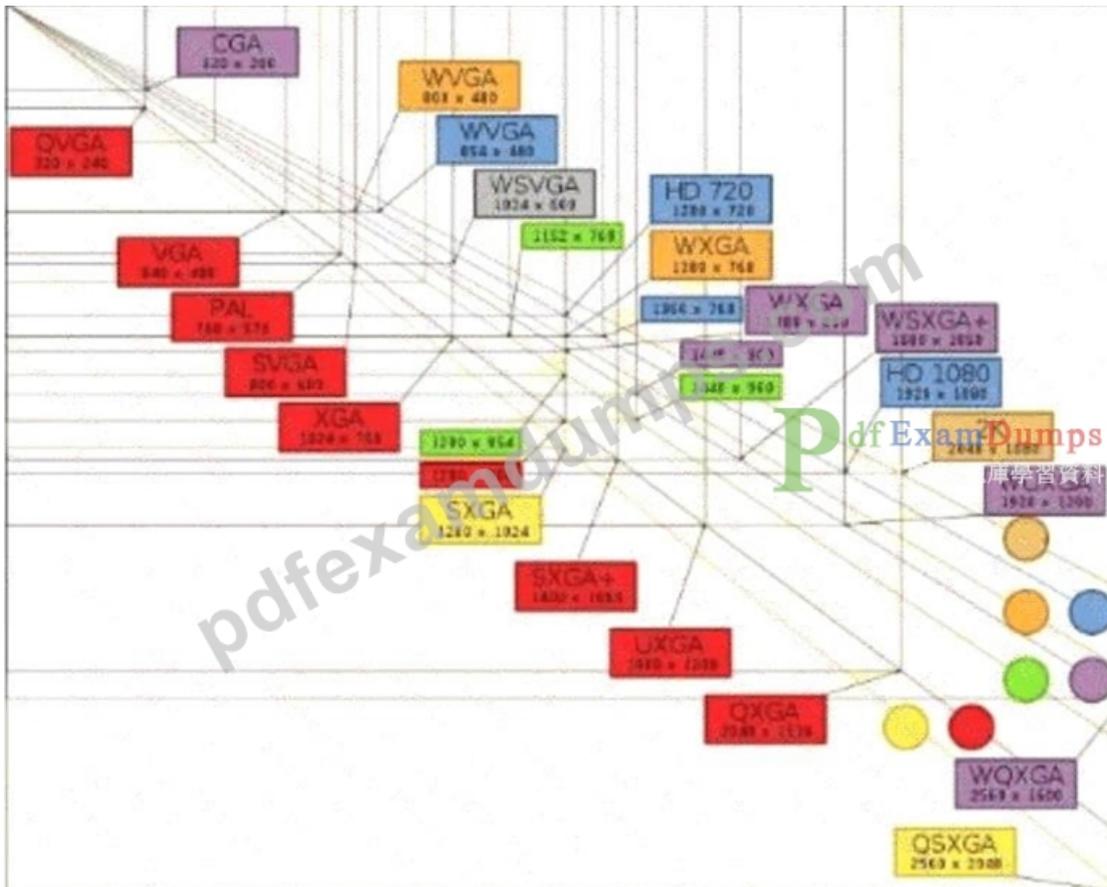

An SPL (Sound Pressure Level) meter is commonly used during a site survey to measure the ambient noise level in a room. This measurement provides a baseline for audio system design, ensuring that the sound reinforcement system can deliver adequate volume levels above the background noise.

CTS Technology Specialist Reference

According to CTS materials, assessing ambient noise levels with an SPL meter is a standard step in designing sound systems, especially in environments where speech intelligibility is critical.

問題 #69

Based on this image, what is the aspect ratio for WUXGA?

- A. 1.85:1
- B. 2.35:1
- C. 1.6:1
- D. 1.78:1

答案： C

解題說明：

WUXGA stands for Wide Ultra Extended Graphics Array and has a resolution of 1920 x 1200 pixels. To determine the aspect ratio, we divide the width by the height:

$= 1.6:1$
 $\text{Aspect Ratio} = \frac{1920}{1200} = 1.6:1$
 Therefore, the aspect ratio for WUXGA is 1.6:1. This aspect ratio is common for widescreen monitors and provides a wider display format compared to traditional 4:3 screens, enhancing the viewing experience for multimedia content.
