

Hohe Qualität von Data-Con-101 Prüfung und Antworten

2026 Die neuesten ITZert Data-Con-101 PDF-Versionen Prüfungsfragen und Data-Con-101 Fragen und Antworten sind kostenlos verfügbar: <https://drive.google.com/open?id=1Wk-ChwJwulkCS909EsafG1Pne4nG6bYT>

ITZert kann Ihnen Ihren Stress zur Salesforce Data-Con-101 Zertifizierungsprüfung im Internet überwinden. Die Lernmaterialien zur Salesforce Data-Con-101 Zertifizierungsprüfung enthalten Kurse, Online-Prüfung, Lerntipps im Internet. Unser ITZert hat Simulationsprüfungen, das Ihnen helfen, die Salesforce Data-Con-101 Prüfung ganz einfach ohne viel Zeit und Geld zu bestehen. Wenn Sie unsere Lernmaterialien haben und sich um die Prüfungsfragen kümmern, können Sie ganz leicht das Zertifikat bekommen.

Salesforce Data-Con-101 Prüfungsplan:

Thema	Einzelheiten
Thema 1	<ul style="list-style-type: none"> Segmentation and Insights: This domain centers on creating audience segments and deriving analytical insights from Data Cloud. It includes configuring and maintaining segments, analyzing membership scenarios, and distinguishing between calculated insights and real-time streaming insights.

Thema 2	<ul style="list-style-type: none"> • Act on Data: This domain focuses on leveraging Data Cloud data for downstream actions through activations and data actions. It covers working with attributes, managing timing dependencies, troubleshooting activation issues like errors and rejected counts, and understanding requirements for triggering automated processes.
Thema 3	<ul style="list-style-type: none"> • Identity Resolution: This domain explores creating unified customer profiles through matching and reconciliation processes. It covers how rule sets determine when records link together, how conflicting data is resolved, and understanding the outcomes and use cases of unified identities.

Data-Con-101 Ressourcen Prüfung - Data-Con-101 Prüfungsguide & Data-Con-101 Beste Fragen

Gott will, dass ich eine Person mit Fähigkeit, statt eine gute aussehende Puppe zu werden. Wenn ich IT-Branche wähle, habe ich dem Gott meine Fähigkeiten bewiesen. Aber der Gott ist mit nichts zufrieden. Er hat mich gezwungen, nach oben zu gehen. Die Salesforce Data-Con-101 Zertifizierungsprüfung ist eine große Herausforderung in meinem Leben. So habe ich sehr hart gelernt. Aber das macht doch nichts, weil ich ITZert die Fragenkataloge zur Salesforce Data-Con-101 Zertifizierung gekauft habe. Mit ihr kann ich sicher die die Salesforce Data-Con-101 Prüfung bestehen. Der Weg ist unter unseren Füßen, nur Sie können ihre Richtung entscheiden. Mit den Prüfungsmaterialien zur Salesforce Data-Con-101 Prüfung von ITZert können Sie sicher eine bessere Zukunft haben.

Salesforce Certified Data Cloud Consultant Data-Con-101 Prüfungsfragen mit Lösungen (Q69-Q74):

69. Frage

Which information is provided in a .csv file when activating to Amazon S3?

- **A. The activated data payload**
- B. The metadata regarding the segment definition
- C. An audit log showing the user who activated the segment and when it was activated
- D. The manifest of origin sources within Data Cloud

Antwort: A

Begründung:

When activating to Amazon S3, the information that is provided in a .csv file is the activated data payload. The activated data payload is the data that is sent from Data Cloud to the activation target, which in this case is an Amazon S3 bucket¹. The activated data payload contains the attributes and values of the individuals or entities that are included in the segment that is being activated². The activated data payload can be used for various purposes, such as marketing, sales, service, or analytics³. The other options are incorrect because they are not provided in a .csv file when activating to Amazon S3. Option A is incorrect because an audit log is not provided in a .csv file, but it can be viewed in the Data Cloud UI under the Activation History tab⁴. Option C is incorrect because the metadata regarding the segment definition is not provided in a .csv file, but it can be viewed in the Data Cloud UI under the Segmentation tab⁵. Option D is incorrect because the manifest of origin sources within Data Cloud is not provided in a .csv file, but it can be viewed in the Data Cloud UI under the Data Sources tab. 70. Frage

Which two dependencies need to be removed prior to disconnecting a data source?

Choose 2 answers

- A. Activation
- **B. Data stream**
- C. Activation target
- **D. Segment**

Antwort: B,D

Begründung:

Dependencies in Data Cloud:

Before disconnecting a data source, all dependencies must be removed to prevent data integrity issues.

Reference: Salesforce Data Source Management Documentation

Identifying Dependencies:

Segment: Segments using data from the source must be deleted or reassigned.

Data Stream: The data stream must be disconnected, as it directly relies on the data source.

Reference: Salesforce Segment and Data Stream Management Guide

Steps to Remove Dependencies:

Remove Segments:

Navigate to the Segmentation interface in Salesforce Data Cloud.

Identify and delete segments relying on the data source.

Disconnect Data Stream:

Go to the Data Stream settings.

Locate and disconnect the data stream associated with the source.

Reference: Salesforce Segment Deletion and Data Stream Disconnection Tutorial Practical Application:

Example: When preparing to disconnect a legacy CRM system, ensure all segments and data streams using its data are properly removed or migrated.

Reference: Salesforce Data Source Disconnection Best Practices

71. Frage

A consultant is troubleshooting a segment error.

Which error message is solved by using calculated insights instead of nested segments?

- A. Multiple population counts are in progress.
- **B. Segment is too complex.**
- C. Segment can't be published.
- D. Segment population count failed.

Antwort: B

Begründung:

Segment Errors in Data Cloud: Segments in Salesforce Data Cloud can encounter errors due to various reasons, including complexity and nested segments.

Calculated Insights vs. Nested Segments:

Complex Segments: If a segment is too complex due to extensive nesting or numerous conditions, it can lead to errors.

Simplification with Calculated Insights: Using calculated insights can simplify segment creation by pre-computing and storing complex logic or aggregations, which can then be referenced directly in the segment.

Solution:

Step 1: Identify the segment causing the "Segment is too complex" error.

Step 2: Break down complex logic into calculated insights.

Step 3: Use these calculated insights in segment definitions to reduce complexity.

72. Frage

A Data Cloud consultant is working with data that is clean and organized. However, the various schemas refer to a person by multiple names - such as user, contact, and subscriber - and need a standard mapping.

Which term describes the process of mapping these different schema points into a standard data model?

- A. Transform
- B. Segment
- **C. Harmonize**
- D. Unify

Antwort: C

Begründung:

Introduction to Data Harmonization:

Data harmonization is the process of bringing together data from different sources and making it consistent.

Reference: Salesforce Data Harmonization Overview

Mapping Different Schema Points:

In Data Cloud, different schemas may refer to the same entity using different names (e.g., user, contact, subscriber).

Harmonization involves standardizing these different terms into a single, consistent schema.

Reference: Salesforce Schema Mapping Guide

Process of Harmonization:

Identify Variations: Recognize the different names and fields referring to the same entity across schemas.

Standard Mapping: Create a standard data model and map the various schema points to this model.

Example: Mapping "user", "contact", and "subscriber" to a single standard entity like "Customer." Reference: Salesforce Data Model

Harmonization Documentation Steps to Harmonize Data:

Define a standard data model.

Map the fields from different schemas to this standard model.

Ensure consistency across the data ecosystem

Reference: Salesforce Data Harmonization Best Practices

73. Frage

The recruiting team at Cumulus Financial wants to identify which candidates have browsed the jobs page on its website at least twice within the last 24 hours. They want the information about these candidates to be available for segmentation in Data Cloud and the candidates added to their recruiting system.

Which feature should a consultant recommend to achieve this goal?

- A. Calculated insight
- **B. Streaming insight**
- C. Batch data transform
- D. Streaming data transform

Antwort: B

Begründung:

A streaming insight is a feature that allows users to create and monitor real-time metrics from streaming data sources, such as web and mobile events. A streaming insight can also trigger data actions, such as sending notifications, creating records, or updating fields, based on the metric values and conditions. Therefore, a streaming insight is the best feature to achieve the goal of identifying candidates who have browsed the jobs page on the website at least twice within the last 24 hours, and adding them to the recruiting system. The other options are incorrect because:

A streaming data transform is a feature that allows users to transform and enrich streaming data using SQL expressions, such as filtering, joining, aggregating, or calculating values. However, a streaming data transform does not provide the ability to monitor metrics or trigger data actions based on conditions.

A calculated insight is a feature that allows users to define and calculate multidimensional metrics from data using SQL expressions, such as LTV, CSAT, or average order value. However, a calculated insight is not suitable for real-time data analysis, as it runs on a scheduled basis and does not support data actions.

A batch data transform is a feature that allows users to create and schedule complex data transformations using a visual editor, such as joining, aggregating, filtering, or appending data. However, a batch data transform is not suitable for real-time data analysis, as it runs on a scheduled basis and does not support data actions. References: Streaming Insights, Create a Streaming Insight, Use Insights in Data Cloud, Learn About Data Cloud Insights, Data Cloud Insights Using SQL, Streaming Data Transforms, Get Started with Batch Data Transforms in Data Cloud, Transformations for Batch Data Transforms, Batch Data Transforms in Data Cloud: Quick Look, Salesforce Data Cloud: AI CDP.
