Microsoft Endpoint Administrator Sample Questions (Q168-Q173):

NEW QUESTION # 168

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution. After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your company uses Windows AutoPilot to configure the computer settings of computers issued to users.

A user named User1 has a computer named Computer1 that runs Windows 10. User1 leaves the company.

You plan to transfer the computer to a user named User2.

You need to ensure that when User2 first starts the computer, User2 is prompted to select the language setting and to agree to the license agreement.

Solution: You create a new Windows AutoPilot self-deploying deployment profile.

Does this meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

Windows Autopilot self-deploying mode enables a device to be deployed with little to no user interaction. For devices with an Ethernet connection, no user interaction is required; for devices connected via Wi-Fi, no interaction is required after making the Wi-Fi connection (choosing the language, locale, and keyboard, then making a network connection).

NEW QUESTION # 171

Hotspot Question

You have a Microsoft 365 tenant that uses Microsoft Intune.

From the Microsoft Endpoint Manager admin center, you plan to create a baseline to monitor the Startup score and the App reliability score of enrolled Windows 10 devices.

You need to identify which tool to use to create the baseline and the minimum number of devices required to create the baseline.

What should you identify? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

Box 1: Endpoint analytics

Endpoint analytics has the following three items are central to understanding each of the reports:

- Scores

- Baselines

- Insights and recommendations

Box 2: 5

A status of insufficient data means you don't have enough devices reporting to provide a meaningful score. Currently, at least five devices are required.
