IIBA Entry Certificate in Business Analysis (ECBA) Sample Questions (Q42-Q47):

NEW QUESTION # 42

Which action would a business analyst (BA) propose to improve the operation of the business?

- A. Simplify the work people perform
- B. Outsource the operation team
- C. Shadow the expert staff
- D. Assist in the daily activities

Answer: A

Explanation:

A business analyst (BA) aims to improve the efficiency and effectiveness of business operations. Simplifying the work people perform can lead to streamlined processes, reduced errors, and increased productivity. This approach aligns with the core objectives of business analysis, which include understanding and defining requirements, analyzing business processes, and recommending solutions that deliver value to stakeholders. Simplification often involves removing unnecessary steps, automating tasks, and optimizing workflows, which are key activities in business process improvement. Reference: The BABOK Guide outlines the importance of simplifying processes as part of the requirements analysis and design definition. It emphasizes the role of the BA in identifying areas where complexity can be reduced to improve business operations. Additionally, the Business Analysis Learning documents highlight the significance of process simplification in achieving operational excellence and delivering business value.

NEW QUESTION # 43

Which technique elicits information by viewing performance?

- A. Prototyping
- B. Brainstorming
- C. Observation
- D. Interviews

Answer: C

NEW QUESTION # 44

Which model category would include the techniques of decision modelling and root cause analysis?

- A. People and roles
- B. Data and information
- C. Activity flow
- D. Rationale

Answer: D

Explanation:

Decision modelling and root cause analysis fall under the Rationale model category, which focuses on the reasoning, logic, and justification behind decisions or problem identification. These techniques help in tracing the rationale for actions, understanding why a

particular problem exists, and determining how decisions align with business objectives.

Decision modelling helps map out choices and potential outcomes.

Root cause analysis identifies underlying causes of issues.

BABOK Reference:

These are detailed under Requirements Analysis and Design Definition, particularly in modeling techniques categorized under Rationale models.

NEW QUESTION # 45

Which of the following are criteria used to determine quality requirements relationships?

- A. Complexity, stability, status
- B. Necessity, validate, derive
- C. Necessary, consistent, correct
- D. Penalty, benefit, cost

Answer: C

Explanation:

Quality requirements relationships are determined by criteria that ensure the requirements are fundamentally sound. These criteria include:

* Necessary : The requirement must be essential to meet the business need or opportunity.

* Consistent : The requirement must not conflict with other requirements.

* Correct : The requirement must accurately describe the functionality that will meet the business need or opportunity.

These criteria help in ensuring that the quality requirements are aligned with the business objectives and can be effectively implemented and managed.

The criteria for determining quality requirements relationships are aligned with the best practices in business analysis as described in the BABOK Guide and other learning resources provided by the International Institute of Business Analysis (IIBA) 1 2 .

NEW QUESTION # 46

Who is responsible for discovering, synthesizing, and analyzing information within an enterprise?

- A. Project sponsor
- B. Project manager
- C. Programmer
- D. Business analyst

Answer: D

Explanation:

The role of a business analyst is pivotal in discovering, synthesizing, and analyzing information from various sources within an enterprise. This includes gathering data from tools, processes, documentation, and stakeholders. Business analysts are tasked with eliciting the true needs of stakeholders, which often involves investigating and clarifying their expressed desires to determine underlying issues and causes. They play a crucial role in aligning the designed and delivered solutions with the needs of stakeholders, ensuring that the outcomes meet business objectives effectively.

NEW QUESTION # 47

.....
