C-TS470-2412 Exam Guide Materials, C-TS470-2412 Reliable Exam Pattern

In order to meet the needs of all customers that pass their exam and get related certification, the experts of our company have designed the updating system for all customers. Our C-TS470-2412 exam question will be constantly updated every day. The IT

experts of our company will be responsible for checking whether our C-TS470-2412 exam prep is updated or not. Once our C-TS470-2412 test questions are updated, our system will send the message to our customers immediately. If you use our C-TS470-2412 Exam Prep, you will have the opportunity to enjoy our updating system. You will get the newest information about your exam in the shortest time. You do not need to worry about that you will miss the important information, more importantly, the updating system is free for you, so hurry to buy our C-TS470-2412 exam question, you will find it is a best choice for you.

SAP C-TS470-2412 Exam Syllabus Topics:

Topic	Details
Topic 1	• Managing Clean Core: This section of the exam measures the skills of SAP Solution Architects and covers the principles of maintaining a clean core within SAP systems. It focuses on strategies for minimizing customizations, leveraging standard SAP functionalities, and ensuring system integrity while allowing for necessary extensions. The goal is to enhance system performance, ease upgrades, and maintain long-term sustainability.
Topic 2	• Service Order Management: This section of the exam measures the skills of SAP Service Operations Consultants and covers the end-to-end management of service orders within SAP. It includes the creation, processing, tracking, and fulfillment of service requests, ensuring seamless coordination between departments. Proper service order management enables organizations to enhance customer satisfaction, streamline operations, and improve response times through integrated workflows.
Topic 3	• Service Master Data: This section of the exam measures the skills of SAP Master Data Specialists and covers the management and configuration of service-related master data within SAP environments. It includes defining service objects, managing attributes, and ensuring accurate data flow across modules. Effective service master data management helps improve service delivery, optimize resource utilization, and maintain consistency across business processes.
Topic 4	• Organizational Data: This section of the exam measures the skills of Enterprise Data Managers and covers the structuring and management of organizational data within SAP systems. It focuses on defining key organizational elements, configuring data hierarchies, and ensuring proper integration across business units. Mastery of this domain is essential for maintaining accurate reporting structures, workflow efficiency, and compliance with enterprise-wide data governance policies.

SAP Certified Associate - SAP S/4HANA Cloud Private Edition Service Sample Questions (Q48-Q53):

NEW QUESTION # 48
Which of the following API types does SAP recommend to use to achieve clean core integrations? Note:
There are 2 correct answers to this question.

- A. Doc
- B. RFC
- C. OData
- D. SOAP

Answer: C,D

Explanation:
SAP's clean core strategy emphasizes standardized, extensible integrations to minimize customizations and ensure upgrade stability.
The recommended API types are:
* SOAP: A widely supported, robust protocol for structured data exchange, recommended for integrating SAP S/4HANA with external systems in a clean core approach.
* OData: SAP's preferred REST-based protocol for real-time, lightweight integrations, heavily utilized in SAP Fiori apps and clean core scenarios.
* Doc: Not a recognized API type in SAP's integration framework.
* RFC: While still supported, RFC (Remote Function Call) is considered legacy and less aligned with clean core principles due to its tight coupling. These recommendations are part of SAP's integration strategy for S/4HANA Cloud editions. "SOAP and OData are recommended for clean core integrations to ensure standardized and scalable connectivity." (SAP S/4HANA Cloud Integration

Guide).

NEW QUESTION # 49
From which of the following business objects can you access the items of bills of material (BOMs) with BOM usage S (S4 Service)?

- A. Service request
- B. Service confirmation
- C. Service order
- D. Service entry sheet

Answer: C

Explanation:
BOM usage S (S4 Service)is specific to service processes in SAP S/4HANA Cloud Private Edition, Service, listing components for service activities. The correct answer isservice order (C). Let's explore this thoroughly.
BOM Usage S Context:
Unlike BOM usage 4 (Plant Maintenance), usage S is tailored for service scenarios, integrating with service orders to plan materials or services.
Why Service Order?
A service order (e.g., transaction IW31 or Fiori app) can reference a technical object (e.g., equipment) or task list with a BOM usage S. The BOM items (e.g., spare parts) are accessed in the "Components" tab of the service order, enabling planning and reservation. For example, a service order for Equipment "E001" pulls BOM items like "Filter" and "Seal" from its usage S BOM.
Why Not the Others?
* Service request (A):A preliminary document (e.g., notification) without BOM integration.
* Service entry sheet (B):For external service acceptance, not BOM access.
* Service confirmation (D):Records executed work, not planning with BOMs.
Process Flow:
Service order created # BOM usage S linked to object # Components tab shows items.
"BOM items with usage S (S4 Service) can be accessed from a service order for planning service activities."

NEW QUESTION # 50
In the Event-Based Revenue Recognition - Service Documents app, which of the following can you review?

- A. Planned margin
- B. Actual revenue
- C. Billed revenue
- D. Billed margin

Answer: B

Explanation:
TheEvent-Based Revenue Recognition - Service Documentsapp tracks revenue based on events (e.g., confirmation). The correct answer isactual revenue (B).
Why Actual Revenue?
The app shows revenue posted to the general ledger as events occur (e.g., $500 from a confirmation), reflecting real-time financials.
Why Not the Others?
* A & D:Margins are in profitability apps.
* C:Billed revenue is in billing apps, not recognition.
"The Event-Based Revenue Recognition app allows review of actual revenue from service documents."

NEW QUESTION # 51
To which of the following can you assign production resources and tools? Note: There are 2 correct answers to this question.

- A. Maintenance order operation
- B. Product bundle
- C. Task list operation
- D. Service order

Answer: A,C

Explanation:
Production resources and tools (PRTs)in SAP S/4HANA Cloud Private Edition, Service are objects (e.g., tools, test equipment) used during maintenance or service activities. They are assigned to specific operational steps to ensure the right resources are available. The correct answers aretask list operation (B)and maintenance order operation (C). Let's explore this in depth.
Understanding PRTs:
PRTs can be materials, equipment, or documents tracked in the system. They are not consumed like spare parts but are used temporarily during a task (e.g., a wrench or a calibration device). Assigning PRTs ensures proper planning and availability during execution.
Why Task List Operation and Maintenance Order Operation?
* Task list operation (B):A task list defines standard procedures for maintenance or service (e.g.,
"Inspect pump"). Within the task list, each operation (step) can have PRTs assigned in the operation details. For example, Operation 0010 might require a "Torque Wrench" as a PRT. This assignment is done in the task list maintenance screen (e.g., IA05 or IA06). When the task list is used in a plan or order, the PRTs carry over.
* Maintenance order operation (C):A maintenance order schedules specific work on a technical object.
PRTs can be assigned directly to operations within the order (e.g., in transaction IW31/IW32). For instance, Operation 0020 in a maintenance order might list a "Lifting Crane" as a required PRT. This supports detailed execution planning.
Why Not the Other Options?
* Service order (A):PRTs are not assigned at the header level of a service order. They are linked to specific operations within the order, which aligns with maintenance order operations (C), not the order as a whole.
* Product bundle (D):A product bundle groups items for sales or service offerings but has no operational context for PRT assignment-it's a commercial construct, not a work execution object.
Additional Context:
In practice, PRTs assigned to a task list operation can automatically populate a maintenance order when the task list is referenced, streamlining the process. Availability checks for PRTs can also be configured to ensure they're ready before work begins.
"Production resources and tools (PRTs) can be assigned to task list operations and maintenanceorder operations to specify the tools or resources required for execution."

NEW QUESTION # 52

For which objects can you define measuring points? Note: There are 2 correct answers to this question.

- A. Functional locations
- B. Serial numbers
- C. Pieces of equipment
- D. Material

Answer: A,C

Explanation:
In SAP S/4HANA Cloud Private Edition, Service,measuring pointsare used to record quantitative or qualitative data (e.g., temperature, mileage) for technical objects to monitor their condition or performance.
The correct answers are:
* Functional locations (A):Measuring points can be defined for functional locations to track conditions at specific sites or areas within a plant.
* Pieces of equipment (C):Measuring points are commonly assigned to equipment to monitor operational parameters, supporting preventive maintenance.
* Serial numbers (B):Serial numbers identify individual instances of materials but are not technical objects themselves; measuring points are not directly assigned to them.
* Material (D):Materials represent stock items or products, not technical objects, so measuring points are not applicable.
"Measuring points can be created for functional locations and pieces of equipment to capture measurement data, enabling condition-based maintenance strategies."

NEW QUESTION # 53

......

Everyone wishes to spend their career at one level. Obtaining a SAP Certified Associate - SAP S/4HANA Cloud Private Edition Service C-TS470-2412 certificate is the reason that many people join the SAP C-TS470-2412 exam.
