## ServiceNow Certified Implementation Specialist - Discovery Sample Questions (Q72-Q77):

### NEW QUESTION # 72

When using the Delimited Text parsing strategy \_\_\_\_\_ and \_\_\_\_\_ are available in a step for a Parse Variable operation. (Choose 2 answers)

Response:

- A. Positions
- B. Use Browser
- C. Criteria Merge
- D. Delimiters

**Answer: A,D**

### NEW QUESTION # 73

The following shows part of the Windows OS - Servers pattern in Pattern Designer:

□ Which of the steps above use(s) a shared library?

- A. Neither step
- B. Both steps
- C. Step 26
- **D. Step 25**

**Answer: D**

Explanation:

Step 25 uses a shared library called Windows - Storage, which is a reusable component that can be invoked by multiple patterns to discover the storage information of Windows servers. A shared library is a collection of steps that can be referenced by a pattern name and can accept input parameters and return output values.

Shared libraries help to avoid duplication of code and simplify the maintenance of patterns.

### NEW QUESTION # 74

Which one of the following is not used in a horizontal discovery pattern?

- A. Identification section
- B. Variables
- C. Operations
- **D. Connectivity section**

**Answer: D**

Explanation:

A horizontal discovery pattern is a sequence of operations that collects information about a specific type of configuration item (CI), such as an operating system, a database, or a web server<sup>1</sup>. A horizontal discovery pattern does not use the connectivity section, which is only used for the application pattern type<sup>2</sup>. The connectivity section defines how to connect to a CI and run commands on it<sup>3</sup>. A horizontal discovery pattern uses the following sections<sup>1</sup>:

\* Variables: Defines the variables that store the data collected by the pattern and map them to the target table fields.

\* Identification: Defines the criteria to identify a CI and update or create a record in the CMDB.

\* Operations: Defines the actions to perform on the target CI, such as running commands, querying databases, or parsing files.

### NEW QUESTION # 75

During CI reclassification, which 2 of the below operations are more likely to lead to data loss?

Response:

- **A. Downgrading**
- **B. Switching**
- C. Upgrading
- D. Identifying

**Answer: A,B**

### NEW QUESTION # 76

File-based Discovery is triggered during the .
