Efficient SolarWinds Dumps SCP-NPM Discount Are Leading Materials & Verified Valid SCP-NPM Exam Duration

In this hustling society, our SCP-NPM practice materials are highly beneficial existence which can not only help you master effective knowledge but pass the exam effectively. They have a prominent role to improve your soft-power of personal capacity and boost your confidence of conquering the exam with efficiency. You will be cast in light of career acceptance and put individual ability to display. When you apply for a job you could have more opportunities than others. What is more, there is no interminable cover charge for our SCP-NPM practice materials priced with reasonable prices for your information. Considering about all benefits mentioned above, you must have huge interest to them.

SolarWinds Network Performance Monitor (NPM) Exam Sample Questions (Q32-Q37):

NEW QUESTION # 32

You can apply Universal Device Pollers to which object types? (Choose all that apply.)

- **A. Volumes**
- B. Applications
- **C. Nodes**
- **D. Interfaces**

Answer: A,C,D

Explanation:

Universal Device Pollers (UnDPs) are custom pollers that allow you to monitor specific aspects of your network devices using SNMP. You can apply UnDPs to any object type that supports SNMP polling, such as interfaces, nodes, and volumes. You cannot apply UnDPs to applications, because they are not SNMP-based objects. Applications are monitored using Application Performance Monitor (APM), which uses different methods, such as WMI, scripts, or agents, to collect data. Reference: Monitor custom statistics based on OIDs with Universal Device Pollers in NPM, Assign Universal Device Pollers to devices monitored in NPM, Add and assign Universal Device Pollers

NEW QUESTION # 33

You configured devices to send SNMP traps to NPM, but do not see the messages in the Orion Web Console.

You verified that the firewall ports are open and the devices are correctly configured.

What can you verify to troubleshoot the cause?

- **A. Verify the SNMP trap service is running**
- B. Verify that you have the SNMP Trap module installed for NPM
- C. Verify you use Log Analyzer to view traps
- D. Verify you configured the SNMP Traps view in the Orion Web Console

Answer: A

Explanation:

The SNMP trap service is responsible for receiving, decoding, displaying, and storing the SNMP trap messages in the Log Analyzer database. If the service is not running, you will not see the messages in the Orion Web Console. You can verify the status of the service by using the Orion Service Manager or the Windows Services console. You can also restart the service if needed. The other options are not relevant for troubleshooting the cause of missing SNMP trap messages. References:

Monitor SNMP traps

Troubleshoot SNMP traps

Orion Service Manager

NEW QUESTION # 34

When you configure a report, you can limit access to specific users.

- A. FALSE
- **B. TRUE**

Answer: B

NEW QUESTION # 35

Which is not true for Device Studio Poller?

- A. Polled values are displayed in existing resources
- B. Can poll multiple OIDs for a given technology
- C. Can perform logical operations or transformations on the polled data
- **D. Collects data from Orion Failover Engine or Hot Standby Engines**

Answer: D

Explanation:

Device Studio Poller is a feature that allows users to create custom pollers for devices or technologies that are not supported by default in NPM. It can poll multiple OIDs for a given technology, perform logical operations or transformations on the polled data, and display the polled values in existing resources. However, it does not collect data from Orion Failover Engine or Hot Standby Engines, which are features of Orion High Availability that ensure continuous monitoring in case of primary server failure¹².

Reference: 1: Create pollers in Device Studio for NPM3, 2: When Good OIDs Go Bad: Customizing Device Pollers, 3: Manage Pollers (AKA Device Studio) question

https://documentation.solarwinds.com/en/success_center/orionplatform/content/core-monitoring-mibs-with-universal-device-pollers-sw548.htm

NEW QUESTION # 36

The finance department asks to view select reports from NPM. Because of compliance policies, you cannot create accounts in the Web Console for users outside of the IT department. How do you allow the finance department to view reports without a user account?

- **A. Enable the Link only option on the report**
- B. Create a service account for Finance
- C. Create a DirectLink account in the Web Console
- D. Enable the Guest account

Answer: A

Explanation:

To allow the finance department to view select reports from NPM without a user account, you can enable the Link only option on the report. This option allows you to generate a direct link to the report that can be shared with anyone who has access to the Orion Web Console URL, even if they do not have a user account or login credentials. The Link only option also bypasses any report limitations or account restrictions that might apply to the report. To enable the Link only option on a report, you need to edit the report and select the Link only option in the Report Properties page. You can then copy the link and send it to the finance department via email or other methods. The finance department can then view the report by clicking the link and opening it in a web browser¹. References: Share a web-based report with non-Orion Platform users

NEW QUESTION # 37

.....

Individuals who hold SolarWinds SCP-NPM certification exam demonstrate to their employers and clients that they have the knowledge and skills necessary to succeed in the SCP-NPM exam. Exams4Collection SCP-NPM Questions have numerous benefits, including the ability to demonstrate to employers and clients that you have the necessary knowledge and skills to succeed in the actual SolarWinds Network Performance Monitor (NPM) Exam (SCP-NPM) exam.
