C_CPI_2506試験参考書、C_CPI_2506トレーニング学習

お客様のさまざまなニーズを満たすために、当社の専門家と教授は、PDFバージョン、オンラインバージョン、ソフトウェアバージョンなど、お客様が選択できるC_CPI_2506試験問題の3つの異なるバージョンを設計しました。次に、C_CPI_2506学習ガイドのオンラインバージョンを紹介します。オンライン版の最大の利点は、このバージョンがすべてのエレクトロニカ機器をサポートできることです。C_CPI_2506学習教材のオンラインバージョンを選択した場合、エレクトロニカ機器で当社の製品を使用できます。

SAP Certified Associate - Integration Developer 認定 C_CPI_2506 試験問題 (Q31-Q36):

質問 # 31

Which Sap platform serves as the foundation for SAP' s integration strategy?

- **A. SAP Business Technology Platform (SAP BTP).**
- B. SAP Netweaver Process Integration (PI) serves as the foundation for SAP' s integration strategy.
- C. SAP S/4HANA serves as the foundation for SAP' s integration strategy.
- D. SAP Cloud Platform Integration (CPI) serves as the foundation for SAP' s integration strategy.

正解: A

解説:

SAP's integration strategy is founded on the SAP Business Technology Platform (BTP), which provides: Integration Suite as the strategic iPaaS for process, data, API, and event-driven integration.

Extension Suite for app extensions.

Database & Data Management for unified data access.

Analytics & AI capabilities.

Other options:

SAP CPI # Now part of Integration Suite, not the overall foundation.

SAP S/4HANA # The digital core ERP, but not the integration platform.

SAP NetWeaver PI/PO # Legacy middleware, replaced strategically by Integration Suite on BTP.

Thus, the foundation of SAP's integration strategy is SAP BTP.

質問 # 32

What are some advantages of creating an OData interface through an API provider? Note: There are 2 correct answers to this question.

- **A. Automatic creation of a Swagger UI**
- **B. Automatic creation of an openAPI specification**
- C. Automatic creation of a WSDL specification
- D. Automatic creation of a RAML specification

正解: A、B

解説:

Some advantages of creating an OData interface through an API provider are automatic creation of a Swagger UI and an openAPI specification. A Swagger UI is a web-based tool that allows you to interact with the OData service and test its functionality. An openAPI specification is a standard format for describing the OData service and its metadata, which can be used by other tools and applications. Reference: Integration Software | SAP Integration Suite, Modernize Integration with SAP Integration Suite | openSAP

質問 # 33

In your integration flow process, the request reply returns a message with namespaces. What can you do to delete namespaces from this message? Note: There are 2 correct answers to this question.

- A. Use a Content Modifier
- B. Use an XSLT mapping
- C. Set up the request reply to delete the namespaces
- D. Set up the namespace mapping in the Runtime Configuration.

正解: A、B

解説:

A Content Modifier is a step in an integration flow that allows you to modify the message header or body using expressions or constants. You can use a Content Modifier to delete namespaces from a message by using expressions that remove the namespace declarations or prefixes from the XML elements or attributes. For example, you can use the expression `replace($body,"xmlns:ns[0-9]+="`
