Media-Cloud-Consultant Echte Fragen - Media-Cloud-Consultant Deutsch

Wenn Sie sich an der Salesforce Media-Cloud-Consultant Zertifizierungsprüfung beteiligen, wählen Sie doch Pass4Test, was Erfolg bedeutet. Viel Glück!

Salesforce Media Cloud Consultant Exam Media-Cloud-Consultant Prüfungsfragen mit Lösungen (Q91-Q96):

91. Frage

Which out of the box custom object is meant to represent sub-deals with their respective details (amount, date, etc.) to be captured?

- A. quoteProductRollup
- B. QuotePricingAdjustment
- C. QuoteMember
- D. QuoteGroup

Antwort: D

Begründung:

The out-of-the-box custom object meant to represent sub-deals with their respective details (amount, date, etc.) within Salesforce CPQ is QuoteGroup. This object is used to group related quote lines or products, allowing for the capture and management of specific details and conditions related to subsets of a larger deal.

QuoteGroups enable the organization and structuring of complex quotes, facilitating the handling of detailed pricing, discounts, and

terms for different parts of a quote.

92. Frage

A home store wants to advertise their products on a particular tv channel owned by a publishing company. Which channel should this media plan include?

- A. Digital
- B. Print
- C. OutofHome (OOH)
- **D. Linear**

Antwort: D

Begründung:

For a home store wanting to advertise their products on a TV channel owned by a publishing company, the media plan should include the "Linear" channel (B). Linear advertising refers to traditional TV commercials broadcasted across scheduled programming. This is the most appropriate channel for TV-based advertising, as opposed to Out of Home (OOH), which relates to billboards and public displays, Print, which involves newspapers and magazines, and Digital, which encompasses online and social media platforms. 93. Frage

A System Administrator of an advertising publishing company that uses Advertising Sales Management (ASM) is going through the migration from source org to target org.

During the migration, the System Administrator runs into an error related to permissions and licenses on the target org.

Which two reasons could have caused the error?

Choose 2 answers

- A. The target org does not have the necessary integration procedures and Data Raptors.
- **B. The System Administrator user profile on the target org does not have the required permission set licenses or add-on licenses.**
- **C. The target org does not have the required platform license definitions and add-on licenses.**
- D. The source org does not have the required platform license definitions and add-on licenses.

Antwort: B,C

Begründung:

Permission and license errors in migration typically arise because the target org lacks the required platform license definitions or add-on licenses, or because the admin user profile does not have the necessary permission set licenses assigned. The source org licenses don't impact target org migration errors, and missing integration procedures/Data Raptors usually cause functional issues but not license errors.

94. Frage

A media publisher is using advertising sales management to manage their b2b ad sales business using google ad manager. A consultant added a new placement on an existing media plan. When adding the new placement, the media plan remains in an inactive state in GAM. What should the consultant do to clear the inactive state after adding the new placement?

- A. delete and add the placement again in ASM
- B. override creative settings in GAM

- C. add the creatives to the line items in GAM
- D. delete and create the media campaign again in asm

Antwort: C

Begründung:

When a new placement is added to an existing media plan in Advertising Sales Management (ASM) and the plan remains in an inactive state in Google Ad Manager (GAM), the consultant should ensure that the creatives are added to the corresponding line items in GAM. This action is necessary because GAM requires creatives to be associated with line items for them to become active and for the ads to be served. Adding the creatives completes the setup process in GAM and changes the status from inactive to active, allowing the media plan to be executed as intended. References: <https://help.salesforce.com/>

95. Frage

A B2B advertising publishing company is exploring Salesforce to manage its advertising sales business, track sales orders, and measure effectiveness of advertising. They have decided to use Advertising Sales Management (ASM) application licenses. However, they are unsure about the additional products they need to purchase. Which two mandatory add-on products should a consultant recommend in this scenario?

- A. marketing cloud intelligence
- B. digital process automation
- C. sales cloud
- D. industries order management

Antwort: C,D

Begründung:

For a B2B advertising publishing company using Advertising Sales Management (ASM) application licenses and looking to manage its advertising sales business, track sales orders, and measure the effectiveness of advertising, the two mandatory add-on products recommended are:

Sales Cloud: This is essential for managing customer relationships, tracking sales opportunities, and providing a comprehensive CRM solution that integrates with the Advertising Sales Management functionalities.

Industries Order Management: This add-on is crucial for efficiently managing and tracking sales orders within the advertising sales process. It enables the company to streamline order fulfillment and ensure accurate order processing and management.

These add-ons provide the necessary foundation and capabilities to support the advertising sales business and its operational needs within Salesforce.
