Oracle 1z0-1057-25 PDF Question & 1z0-1057-25 Reliable Study Guide

We will try our best to solve your problems for you. I believe that you will be more inclined to choose a good service product, such as 1z0-1057-25 learning question. After all, everyone wants to be treated warmly and kindly, and hope to learn in a more pleasant mood. The authoritative, efficient, and thoughtful service of 1z0-1057-25 learning question will give you the best user experience, and you can also get what you want with our 1z0-1057-25 study materials. I hope our study materials can accompany you to pursue your dreams. If you can choose 1z0-1057-25 test guide, we will be very happy. We look forward to meeting you.

Oracle Project Management Cloud 2025 Implementation Professional Sample Questions (Q86-Q91):

NEW QUESTION # 86
Your client has implemented Oracle Cloud Applications with their United States business unit and United Kingdom business unit. After six months, they acquired another company in China and added a China business unit. A project accountant in your organization is authorized to access transactions for the US, UK, and China business units. The project accountant can see the transactions for the US and UK business units but not for the China business unit. Why is he not able to see the transactions for the China business unit? (Choose the best answer.)

- A. The JOB role relevant to the China business unit is not assigned to the project accountant.
- B. The US and UK business units are linked to different ledgers than the China business unit.
- C. The project accountant is not assigned to the external role that grants access to the China business unit.
- D. The China business unit is associated with a different legal entity than the US and UK business units.

Answer: C

Explanation:
To access transactions for a business unit, the project accountant needs to be assigned to an external role that grants access to that business unit. The external role is defined by the security profile of the business unit and can be different for each business unit. The job role and the legal entity are not relevant for accessing transactions for a business unit. The ledger is relevant for accounting transactions, but not for project transactions. NEW QUESTION # 87
Identify three purposes for which the project resource search index is used. (Choose three.)

- A. Calculate Resource Qualification Scores
- B. Provide absence details for resources
- C. Display resource details
- D. Filter counts while you search for resources
- E. Calculate Resources Availability Scores

Answer: A,C,D

Explanation:
The project resource search index is used to store and retrieve information about project resources such as their availability, qualifications, preferences, etc. The project resource search index is used for three purposes:
* Display resource details: The project resource search index provides the resource details such as name, email, job title, organization, etc. that are displayed on the resource search page.
* Filter counts while you search for resources: The project resource search index provides the filter counts that show how many resources match each filter criterion on the resource search page.
* Calculate Resource Qualification Scores: The project resource search index provides the qualification information such as skills, certifications, languages, etc. that are used to calculate the Resource Qualification Scores for each resource based on their match with the resource request. The project resource search index does not provide absence details for resources or calculate Resource Availability Scores. These are provided by other components such as Oracle Fusion Absence Management and Oracle Fusion Human Capital Management. Reference: https://docs.oracle.com/en/cloud/saas/project- portfolio-management/20c/oapfm/manage-project-resources.html#OAPFM2356181

NEW QUESTION # 88
You are trying to create a project purchase order (PO) but you are unable to select Expenditure Organization in the PO. Identify two reasons for this problem. (Choose two.)

- A. The organization is not classified as a project expenditure organization.
- B. The organization is not included in the organization tree that is assigned to the business unit that owns the PO.
- C. The organization is classified as a project unit.
- D. The organization is not classified as a project-owning organization.

Answer: A,B

Explanation:
Ref: Implementing-Project-Financial-Management-and-Grants-Management.pdf Chapter 3 - Define Project Organizations Page # 12 Topic - Selecting Organization Hierarchies for the Business Unit The following conditions are required for an organization to be eligible to be a project expenditure organization:
* You must assign the Project Expenditure Organization classification to the organization.
* The organization must belong to the hierarchy that you specify in the project implementation options for the business unit.

NEW QUESTION # 89

Your customer has a requirement to import and process third-party transactions that are "costed" and "accounted".

Which configuration option needs to be set satisfy the requirement? (Choose the best answer.)

- A. Document Entry Options
- B. Transaction Source Options
- C. Document Options
- D. Import Options

Answer: B

Explanation:

Reference https://docs.oracle.com/cd/E51367_01/projectop_gs/OAPJC/F1071488AN1004C.htm To import and process third-party transactions that are costed and accounted, you need to set the Transaction Source Options for the transaction source that you use to import the transactions. The Transaction Source Options allow you to specify whether the transactions are costed and accounted by the source system or by Oracle Fusion Cost Management. You can also specify whether to validate and transfer costs and accounting entries to projects and general ledger. Reference: https://docs.oracle.com/en/cloud/saas/project-portfolio-management/20c/oapfm/manage-project-costs.html#OAPFM2355941

NEW QUESTION # 90

Which four standard objects can you configure to include business specific attributes by using Application Composer for Project Execution Management? (Choose four.)

- A. Project Resource Assignment
- B. Project Issues
- C. Project Gates
- D. Project Deliverables
- E. Project Milestones
- F. Project Resource Request

Answer: B,C,D,E

Explanation:

Application Composer is a tool that allows you to configure standard objects or create custom objects to include business specific attributes for Project Execution Management. Four of the standard objects that you can configure using Application Composer are:
* Project Gates: These are checkpoints that mark the completion of a phase or stage in a project lifecycle.
* Project Issues: These are problems or risks that affect the progress or outcome of a project.
* Project Milestones: These are significant events or achievements that indicate the status or completion of a project or task.
* Project Deliverables: These are products or services that are produced or provided as part of a project or task. Project Resource Request and Project Resource Assignment are not standard objects that you can configure using Application Composer. These are features that allow you to request and assign resources for projects and tasks based on various criteria such as availability, qualifications, preferences, etc. Reference: https://docs.oracle.com/en/cloud/saas/project-portfolio-management/20c/oapfm/manage-project-execution.html#OAPFM2356201
