The Salesforce Certified B2C Commerce Architect certification exam covers topics such as B2C Commerce concepts, data modeling, site design and architecture, performance optimization, and integration with other systems. Candidates are expected to have hands-on experience in implementing B2C Commerce solutions and be able to demonstrate their ability to design and optimize complex B2C Commerce systems. Salesforce Certified B2C Commerce Architect certification is recognized globally and is a valuable asset for professionals seeking to advance their careers in the B2C Commerce domain.

Salesforce B2C-Commerce-Architect Exam Syllabus Topics:

Topic	Details
Topic 1	Launch: This topic prepares the B2C Commerce Developer to set up SEO-compliant aliases for site domains, locales, and currencies. It includes creating rollback plans, monitoring system health during site launches, defining data replication schedules, and supporting data migration processes.
Topic 2	- Monitoring - Troubleshooting: This topic equips the B2C Commerce Developer to evaluate and implement custom logging configurations using Log Center while leveraging other diagnostic tools. It emphasizes identifying and addressing performance issues like quota violations and service timeouts, as well as proactively adjusting systems for scalability and health.
Topic 3	Build: In this topic, the B2C Commerce Developer hones the ability to evaluate implementation processes to ensure alignment with business objectives. It includes validating best practices for secure, modular, and performant solutions, guiding teams in resolving complex issues, and supporting load testing to meet KPIs. The topic also covers defining processes for deploying cartridges and data to Salesforce environments.
Topic 4	- Integrations and Customizations: This topic empowers the B2C Commerce Developer to identify and implement protocols like SOAP - REST for secure integrations with third-party web services. It also covers defining approaches for legacy code integration and AppExchange solutions.

Topic 5	• Design • Discovery: In this topic, the B2C Commerce Developer gains expertise in creating accurate technical specifications based on business requirements. It explores drafting complementary technical artifacts, reviewing implementation designs for scalability and gap analysis, and evaluating AppExchange solutions and API documentation. Additionally, it emphasizes analyzing integration points, data volume, and migration approaches while diagramming system architectures.

Salesforce B2C-Commerce-Architect Certification Exam is designed for professionals who specialize in the B2C commerce domain. Salesforce Certified B2C Commerce Architect certification validates the knowledge and skills required to lead successful B2C commerce implementations using the Salesforce Commerce Cloud platform. B2C-Commerce-Architect exam is intended for architects, designers, and developers who work with Salesforce Commerce Cloud and have expertise in B2C commerce solutions.

Salesforce Certified B2C Commerce Architect Sample Questions (Q41-Q46):

NEW QUESTION # 41
Northern Trail Outfitters (NTO) operate 200 physical stores. NTO has products that are available in some of the physical stores and not available in others. The closest physical store is determined based on customer s post zip code when they are shopping online. Only the products that are available in the customer's closest physical store should be presented to the customer to the search results.
What are the two feasible technical approaches to meet these requirements?
Choose 2 answers

- A. Create a separate shipping method per physical store. Use post/zip code to determine the applicable shipping method. Show only the products that are not excluded from the shipping method.
- B. Create a separate site per physical store. Use post/zip code to redirect the customer to the relevant site. Show the products from the site navigation catalog.
- C. Create a separate pricebook per physical store. Use post/zip code to activate this pricebook through a customer group. Show only the products with price by applying price refinement.
- D. Create a separate category per physical store use post/Tip code with a mapping to determine the relevant category. Show only the products from this category.

Answer: A,C

NEW QUESTION # 42
A client has a single site with multiple domains, locales, and languages. After launch, there is a need for the client to perform offline maintenance. The client would like to show the same maintenance page for each locale.
Which version of aliases,Json file below will accomplish this task?
A)

B)

C)

D)

- A. Option B
- B. Option C
- C. Option D
- D. Option A

Answer: C

NEW QUESTION # 43

A Retailer has a single storefront site and a Product Management System (PIM). The Pin is Generating the master catalog and storefront categorization catalog every day and it uploading them to SFTP how should the Architect configure the import job flows following the best practices?

- A. 1st flow is global to download the files from SFTP. 2nd flow is global to import the storefront catalog 3rd flow K global to Import the master catalog.
- B. 1st flow is global to download the files horn SFTP. 2nd flow is global to import the master catalog. 3rd flow Is global to Import the storefront catalog.
- C. 1st flow is assigned to the site to download the files from SFTP. 2nd flow is assigned to the site to Import the storefront catalog 3rd flow It global to Import the master catalog.
- D. 1st flow is assigned to the site to download the files from SFTP. 2nd flow is assigned to the site to Import the master catalog. 3rd flow K global to Import the storefront catalog.

Answer: A

Explanation:
For optimal job flow concerning data import from a PIM system, the sequence should begin with downloading files globally from an SFTP site, followed by importing data into the B2C Commerce platform:
* First flow: Download files, ensuring all required files are available and ready for import.
* Second flow: Import the storefront catalog which likely has dependencies on the master catalog but is generally smaller and can be updated more rapidly.
* Third flow: Import the master catalog, as it typically contains the foundational data needed for various site functionalities.
This sequence respects data dependency and integrity, ensuring that the storefront reflects the most current and accurate information after all relevant data is imported.

NEW QUESTION # 44

A business wants to migrate its customer service provider from provider A to provider B. Provider e offers a LINK cartridge to integrate with its commerce solution.
Which three artifacts need to be created by the Architect? Choose 3 answers

- A. Document the customizations required on top of the LINK cartridge based on current commerce implementation and business needs.
- B. Document the design of implementing a new B2C Commerce cartridge following the Industry standard best practices
- C. Document the data mapping between commerce and customer service provider.
- D. Document how the customer online journey flown from landing on the page to placing of the order
- E. Document the data objects, the interface, and data synchronization frequency between the systems.

Answer: A,C,E

NEW QUESTION # 45
A developer wants to import the data or different instances.
Which two types of data should the developer consider importing?
Choose 2 answers

- A. Metadata
- B. Catalog
- C. Customers
- D. Sites configurations
- E. Services

Answer: B,C

Explanation:
When importing data between instances, focusing on significant and impactful data types is essential:
Option B (Catalog): Includes all product listings, descriptions, categorizations, and relationships. It's crucial for the eCommerce operation, directly affecting site navigation and customer experience.
Option C (Customers): Customer data import is essential for maintaining continuity in customer relationships, access, and personalization across platforms.
These data types are fundamental to the functioning of an eCommerce site and ensure that essential operational data is consistent across different environments or platform migrations.
