What's more, part of that TrainingQuiz AZ-140 dumps now are free: [https://drive.google.com/open?id=1oy-g3DsWVs5esr\\_csxRdBSL2VrT2z2O](https://drive.google.com/open?id=1oy-g3DsWVs5esr_csxRdBSL2VrT2z2O)

Maybe you have desired the AZ-140 certification for a long time but don't have time or good methods to study. Maybe you always thought study was too boring for you. Our AZ-140 study materials will change your mind. With our products, you will soon feel the happiness of study. Thanks to our diligent experts, wonderful study tools are invented for you to pass the AZ-140 Exam. You can try the demos first and find that you just can't stop studying. Using our AZ-140 study materials, you will just want to challenge yourself and get to know more.

## How to Register For Exam AZ-140: Configuring and Operating Microsoft Azure Virtual Desktop?

Exam Register Link: <https://examregistration.microsoft.com/?locale=en-us&examcode=AZ-140&examname=Exam%20AZ-140%20Configuring%20and%20Operating%20Azure%20Virtual%20Desktop&returnToLearningUrl=https%3A%2F%2Fdocs.microsoft.com%2Flearn%2Fcertifications%2Fexams%2Faz-140>

Microsoft AZ-140 Exam is a valuable certification for IT professionals who work with virtual desktop infrastructure and want to validate their expertise in configuring and managing Azure Virtual Desktop. It covers topics such as Azure Virtual Desktop architecture, deployment, security, and management, making it a highly comprehensive certification. Getting certified in Microsoft AZ-140 can lead to career advancement opportunities, higher salaries, and demonstrate the candidate's ability to work with one of the most in-demand IT technologies.

## Online AZ-140 Test - AZ-140 Sample Questions

If you need the AZ-140 training material to improve the pass rate, our company will be your choice. AZ-140 training materials of our company have the information you want, we have the answers and questions. Our company is pass guarantee and money back guarantee. We also have free demo before purchasing. Compared with the paper one, you can receive the AZ-140 Training Materials for about 10 minutes, you don't need to waste the time to wait.

Microsoft AZ-140 certification exam is designed for IT professionals who want to demonstrate their expertise in configuring and operating Microsoft Azure Virtual Desktop. AZ-140 exam is intended for those who have experience working with Azure Virtual Desktop and want to validate their skills and knowledge in this area. AZ-140 Exam measures the ability of candidates to perform various tasks related to configuring and operating Azure Virtual Desktop, including setting up host pools, managing user access, and optimizing the virtual desktop environment.

## Microsoft Configuring and Operating Microsoft Azure Virtual Desktop Sample Questions (Q27-Q32):

### NEW QUESTION # 27

You have a Azure Virtual Desktop host pool that contains live session hosts. The session hosts run Windows 10 Enterprise multi-session.

You need to prevent users from accessing the internet from Azure Virtual Desktop sessions. The session hosts must be allowed to access all the required Microsoft services.

Solution: You configure the RDP Properties of the host pool.

Does This meet the goal?

- A. No
- B. Yes

**Answer: A**

### NEW QUESTION # 28

You have an Azure Virtual Desktop deployment.

You implement FSLogix profile containers.

You need to ensure that the FSLogix profile containers are not used for specific users.

What should you do?

- A. **Modify the local groups on each session host**
- B. Apply an Application Masking rule to each session host
- C. Modify the RDP Properties of the host pool
- D. Apply an AppLocker policy to each session host

**Answer: A**

Explanation:

Just need to add the user(s) into the FSLogix Profile Exclude List group.

<https://docs.microsoft.com/en-us/fslogix/configure-profile-container-tutorial#set-up-include-and-exclude-user-groups>

### NEW QUESTION # 29

You have an Azure Virtual Desktop deployment.

You need to ensure that when users connect to the deployment, they must authenticate by using passwordless authentication.

Which two features should you configure? To answer, select the appropriate settings in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Microsoft Conditional Access

Microsoft Entra ID

Overview

Policies

Insights and reporting

Diagnose and solve problems

Manage

Named locations

Custom controls (Preview)

Terms of use

VPN connectivity

Authentication contexts

Authentication strengths

Classic policies

Monitoring

Sign-in logs

Audit logs

**Answer:**

Explanation:

Answer Area

The screenshot shows the Microsoft Conditional Access interface. At the top, there is a user icon and the text "Conditional Access" and "Microsoft Entra ID". Below this, there are several navigation links: "Overview", "Policies", "Insights and reporting" (which is highlighted with a green border and a checkmark), "Diagnose and solve problems", "Manage" (with sub-links: "Named locations", "Custom controls (Preview)", "Terms of use", "VPN connectivity", "Authentication contexts", "Authentication strengths" (highlighted with a green border and a checkmark), and "Classic policies"), and "Monitoring" (with sub-links: "Sign-in logs" and "Audit logs").

## NEW QUESTION # 30

Case Study 1 - Contoso, Ltd

### Overview

Contoso, Ltd. is a law firm that has a main office in Montreal and branch offices in Paris and Seattle. The Seattle branch office opened recently.

Contoso has an Azure subscription and uses Microsoft 365.

### Existing Infrastructure. Active Directory

The network contains an on-premises Active Directory domain named contoso.com and an Azure Active Directory (Azure AD) tenant. One of the domain controllers runs as an Azure virtual machine and connects to a virtual network named VNET1. All internal name resolution is provided by DNS server that run on the domain controllers.

The on-premises Active Directory domain contains the organizational units (OUs) shown in the following table.

Name	Description
MontrealUsers	An OU for all the users in the Montreal office: The OU syncs to Azure AD by using Azure AD Connect.
ParisUsers	An OU for all the users in the Paris office: The OU syncs to Azure AD by using Azure AD Connect.
SeattleUsers	An OU for all the users in the Seattle office: The OU does <b>NOT</b> sync to Azure AD.

The on-premises Active Directory domain contains the users shown in the following table.

Name	Container	Member of
Operator1	Users	Domain Admins
Operator2	MontrealUsers	Users
Operator3	SeattleUsers	Server Operators

The Azure AD tenant contains the cloud-only users shown in the following table.

Name	Role
Admin1	Virtual Machine Contributor
Admin2	Desktop Virtualization Contributor
Admin3	Desktop Virtualization Session Host Operator
Admin4	Desktop Virtualization Host Pool Contributor

### Existing Infrastructure. Network Infrastructure

All the Azure virtual networks are peered. The on-premises network connects to the virtual networks.

All servers run Windows Server 2019. All laptops and desktop computers run Windows 10 Enterprise. Since users often work on confidential documents, all the users use their computer as a client for connecting to Remote Desktop Services (RDS).

In the West US Azure region, you have the storage accounts shown in the following table.

Name	Account kind	Performance
storage1	StorageV2	Standard
storage2	StorageV2	Premium
storage3	BlobStorage	Standard
storage4	StorageV1	Premium

Existing Infrastructure. Remote Desktop Infrastructure

Contoso has a Remote Desktop infrastructure shown in the following table.

Office	Description
Montreal	<p>A Windows Virtual Desktop deployment that runs Windows 10 Enterprise multi-session hosts. The deployment contains the following:</p> <ul style="list-style-type: none"><li>• A host pool named Pool1</li><li>• An application group named Group1</li><li>• A workspace named Workspace1</li><li>• Virtual machines that have a prefix of Pool1</li></ul>
Seattle	An on-premises virtual machine-based RDS deployment that has personal desktops: The personal desktop virtual machines have a prefix of Pool2.
Paris	An on-premises virtual machine-based RDS deployment that has pooled desktops: The pooled desktop virtual machines have a prefix of Pool3. User profile disks are used to preserve the user state.

Requirements. Planned Changes

Contoso plans to implement the following changes:

- Implement FSLogix profile containers for the Paris offices.
- Deploy a Azure Virtual Desktop host pool named Pool4.
- Migrate the RDS deployment in the Seattle office to Azure Virtual Desktop in the West US Azure region.

Requirements. Pool4 Configuration

Pool4 will have the following settings:

- Host pool type: Pooled
- Max session limit: 7
- Load balancing algorithm: Depth-first
- Images: Windows 10 Enterprise multi-session
- Virtual machine size: Standard D2s v3
- Name prefix: Pool4
- Number of VMs: 5
- Virtual network: VNET4

Requirements. Technical Requirements

Contoso identifies the following technical requirements:

- Before migrating the RDS deployment in the Seattle office, obtain the recommended deployment configuration based on the current RDS utilization.
- For the Azure Virtual Desktop deployment in the Montreal office, disable audio output in the device redirection settings.
- For the Azure Virtual Desktop deployment in the Seattle office, store the FSLogix profile containers in Azure Storage.

- Enable Operator2 to modify the RDP Properties of the Azure Virtual Desktop deployment in the Montreal office.
- From a server named Server1, convert the user profile disks to the FSLogix profile containers.
- Ensure that the Pool1 virtual machines only run during business hours.
- Use the principle of least privilege.

Which three PowerShell modules should you install on Server1 to meet the technical requirements? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. ServerManager
- B. Hyper-V
- C. ActiveDirectory
- D. RemoteDesktop
- E. Pester

**Answer: B,C,E**

Explanation:

Contoso identifies the following technical requirements:

From a server named Server1, convert the user profile disks to the FSLogix profile containers.

The PowerShell modules for Hyper-V, Active Directory, and Pester are prerequisites to running the cmdlets to convert user profile disks to FSLogix.

## NEW QUESTION # 31

You have an Azure subscription.

You plan to deploy Azure Virtual Desktop.

You need to maximize network throughput for the session hosts in the deployment.

What will have the largest impact on the network throughput of each session host?

- A. the number of network interfaces
- B. the virtual machine size
- C. Accelerated Networking
- D. RDP Shortpath

**Answer: D**
