Salesforce Certified Slack Administrator Slack-Admn-201 Prüfungsfragen mit Lösungen (Q204-Q209):

204. Frage

You're a Workspace Owner on a Slack Business+ plan.

Your organization plans to expand Slack usage to the entire company of 4,000 people, and your security team wants workspace access restricted to company email addresses.

What is the most secure option for onboarding all 4,000 users into Slack?

(Select the best answer.)

- A. Turn on Just-In-Time (JIT) provisioning and distribute an invite link that will allow those with the link to join the workspace.
- B. Enable admins to invite their departments into the workspace so that new members are automatically added to the correct channels.
- C. Enable email signup so that those with an approved company email address can join by clicking your workspace's sign-up link or entering their email on the sign in page.
- **D. Integrate with a SAML-based identity provider (IdP) and SCIM API connector so that you can pre-provision members to the workspace.**

Antwort: D

Begründung:

Slack recommends for secure, large-scale onboarding:

"Using a SAML-based IdP with SCIM provisioning allows automatic user creation and deactivation based on your identity provider, ensuring security and control." Email signup (B) and JIT provisioning (C) are less secure. Admin invites (D) are manual and error-prone at this scale.

205. Frage

Teara is a Workspace Owner. She has discovered that projects and key decisions are being discussed via direct messages because public channel message retention settings are set to delete messages after 20 days.

The decision regarding this setting was made 2 years ago, and now the setting is no longer required.

Team members are experiencing difficulty creating channels. Teara is wondering if there are other settings she should review that might be contributing to the direct message conversations.

Which settings and permissions should Teara change to promote increased communication outside of direct messages?

- **A. Changing the workspace's public channel message retention and deletion policy to "Keep Everything", changing the direct message retention and deletion policy to delete messages after 1 day, and allowing everyone to create channels**

- B. Changing the workspace's public channel message retention and deletion policy to "Keep Everything", changing the direct message retention and deletion policy to delete messages after 1 day, and restricting the creation of channels to Owners only
- C. Sending an announcement in the #general channel notifying everyone to move conversations to channels and to DM Teara if you need a channel created
- D. Changing the workspace's message retention and deletion policy for all channels and direct messages to "Keep Everything" and allowing everyone to create channels

Antwort: A

Begründung:

Slack's best practices for promoting open communication are:

"Keep everything in public channels for transparency and collaboration. Set public channel message retention to 'Keep Everything' and restrict DM retention to minimize private, siloed communication." Also:

"Allow everyone to create channels to lower barriers to collaboration and prevent bottlenecks." Restricting channel creation (Option C) would hinder users and reinforce the DM reliance problem.

206. Frage

You're planning a surprise milestone birthday party for your Team Leader virtually.

Currently, the planning committee consists of two direct team members, with plans to invite cross-functional friends.

What should you do to facilitate the conversation?

(Select the best answer.)

- A. Create a group direct message (group DM) with the two members of your team since they are the only ones involved in the planning process.
- B. Create a new private channel for planning the birthday party, and add the planning committee as well as the cross-functional friends.
- C. Create a new public channel for planning the birthday party, and add the planning committee as well as the cross-functional friends.
- D. Create a thread for planning in your existing team channel and @mention the team members on the planning committee.

Antwort: B

Begründung:

Slack's best practices for private, sensitive, or surprise planning activities:

"Create a private channel when planning events that should remain confidential to a specific group of people." This protects the surprise. Public channels (A) expose planning. Group DMs (B) are limited (maximum of 8 people) and informal. A thread in a public space (C) is risky for surprises.

(Reference: Slack Administration Study Guide - Managing Sensitive Conversations)

-

207. Frage

You're a Slack Org Owner at Acme Inc. Several employees report that public channels are difficult to search and find. This results in channel sprawl or duplicative channels being created by employees. The Slack experience is now noisy and confusing. You need a solution to address this while still enabling members to create channels quickly.

What should you do?

(Select the best answer.)

- A. Create a process to request public channel creation through Slack admins.
- B. Post a list of global org-wide public channels in your Slack announcement channels to create awareness amongst employees.
- C. Create and communicate a channel naming and creation policy that includes channel structure and naming convention for your organization.
- D. Pin your organization's Slack Etiquette Guide to the org-wide Slack tips and tricks channel.

Antwort: C

Begründung:

Slack recommends setting and communicating a strong channel naming and creation policy to improve discoverability and reduce confusion.

According to Slack best practices for channel management:

"A consistent channel naming convention helps employees find information more easily and prevents the creation of duplicative channels. A documented and communicated policy ensures that channel creators follow structure guidelines without needing admin intervention." Pinning guides (A) and posting lists (B) are helpful for awareness but do not solve the underlying structural issues.

Requiring admins for every new channel (C) is too restrictive and counter to Slack's flexibility model.

208. Frage

You're a Workspace Owner at a small business that used Slack's Free plan in their first year. However, its business is growing fast enough to justify upgrading to a paid plan.

The requirements:

- * Users want to be able to access their old messages and integrate Slack with their calendars.
- * You want to use Okta to provision users in order to provide additional security and simplicity to the employee onboarding process.
- * Field representatives need to be able to access Slack securely on their company-owned mobile devices.

Based on the requirements, what should you recommend?

(Select the best answer.)

- A. Stay with the Slack Free plan for another year.
- B. Move to the Slack Enterprise Grid plan.
- **C. Move to the Slack Business+ plan.**
- D. Move to the Slack Pro plan.

Antwort: C

Begründung:

The Business+ plan is the appropriate recommendation here because:

- * It includes full message history access (unlike the Free plan, which limits access to recent messages only).
- * It supports SAML-based SSO integrations like Okta, allowing for secure user provisioning and onboarding.
- * It provides Enterprise Mobility Management (EMM) integrations for managing and securing Slack access on company-owned mobile devices.

Official Slack documentation confirms:

"Slack Business+ includes enhanced administration and security controls, including SAML-based SSO, user provisioning with supported IdPs, and mobile device management (MDM) support via EMM." Enterprise Grid (option D) would be overkill for a small growing business unless they required multi-workspace organization and complex compliance features.
