最新的 Salesforce Certified Administrator ADM-201 免費考試真題 (Q107-Q112):

問題 #107

You delete the CustomField Region. All data related to Region will also be deleted.

- A. True
- B. False

答案： A

問題 #108

A Platform Administrator at Cloud Kicks is trying to set up a new user but receives an error about a duplicate username when trying to save the user record. What is causing this error to happen?

- A. The email address and username must be unique across all Salesforce orgs.
- B. The username has a restricted domain name within it.
- C. The username was not configured in the format of an email address.
- D. The username must be unique across all Salesforce orgs.

答案： D

解題說明：

In the Salesforce architecture, the Username is a globally unique identifier⁴⁹. This means that once a username (e.g., admin@cloudkicks.com) is used in any Salesforce organization (including production, sandboxes, and developer editions), it cannot be used again in any other organization worldwide. This often causes confusion because while an Email Address can be reused across multiple Salesforce users and orgs, the Username must remain distinct⁵¹. If an administrator receives a duplicate username error, it means the desired username is already taken by a user in another instance of Salesforce. ⁵⁴Option A is incorrect because usernames must be in email format, but they don't have to be a valid functioning email. Option B is incorrect because only the username has this global uniqueness requirement, not the email address.

- A. From the Custom Report Type, Edit Object Relationships, then add the new fields to the report.
- B. From the Custom Report Type, Edit Layout, then add the new fields to the report. Calculator
- C. Create a new account report folder, go to share, and then add the new fields.
- D. Create a new account report and add the new fields from the Report Builder.

答案： B
