

# Reliable CIPT - Reliable Certified Information Privacy Technologist (CIPT) Real Test

## CIPT, CIPT - Certified Information Privacy Technologist, CIPT, IAPP-CIPT Exam Q & A Verified 100% Correct!!

**Access Control List** - ✓✓ A list of access control entries (ACE) that apply to an object. Each ACE controls or monitors access to an object by a specified user. In a discretionary access control list (DACL), the ACL controls access; in a system access control list (SACL) the ACL monitors access in a security event log which can comprise part of an audit trail.

**Accountability** - ✓✓ A fair information practices principle, it is the idea that when personal information is to be transferred to another person or organization, the personal information controller should obtain the consent of the individual or exercise due diligence and take reasonable steps to ensure that the recipient person or organization will protect the information consistently with other fair use principles.

**Active Data Collection** - ✓✓ When an end user deliberately provides information, typically through the use of web forms, text boxes, check boxes or radio buttons.

**AdChoices** - ✓✓ A program run by the Digital Advertising Alliance to promote awareness and choice in advertising for internet users. Websites with ads from participating DAA members will have an AdChoices icon near advertisements or at the bottom of their pages. By clicking on the AdChoices icon, users may set preferences for behavioral advertising on that website or with DAA members generally across the web.

**Adequate Level of Protection** - ✓✓ A label that the EU may apply to third-party countries who have committed to protect data through domestic law making or international commitments. Conferring of the label requires a proposal by the European Commission, an Article 29 Working Group Opinion, an opinion of the article 31 Management Committee, a right of scrutiny by the European Parliament and adoption by the European Commission.

**Advanced Encryption Standard** - ✓✓ An encryption algorithm for security sensitive non-classified material by the U.S. Government. This algorithm was selected in 2001 to replace the previous algorithm, the Data Encryption Standard (DES), by the National Institute of Standards and Technology (NIST), a unit of the U.S. Commerce Department, through an open competition. The winning algorithm (Rijndael, pronounced rain-dahl), was developed by two Belgian cryptographers, Joan Daemen and Vincent Rijmen.

If you want to get a desirable opposition and then achieve your career dream, you are a right place now. Our CIPT study tool can help you pass the exam. So, don't be hesitate, choose the CIPT test torrent and believe in us. Let's strive to our dreams together. Life is short for us, so we all should cherish our life. Our CIPT Guide Torrent can help you to save your valuable time and let you have enough time to do other things you want to do. Just buy our CIPT exam questions, then you will pass the CIPT exam easily.

The experts and professors of our company have designed the three different versions of the CIPT prep guide, including the PDF version, the online version and the software version. Now we are going to introduce the online version for you. There are a lot of advantages about the online version of the CIPT exam questions from our company. For instance, the online version can support any electronic equipment and it is not limited to all electronic equipment. More importantly, the online version of CIPT study practice dump from our company can run in an off-line state, it means that if you choose the online version, you can use the CIPT exam questions when you are in an off-line state. In a word, there are many advantages about the online version of the CIPT prep guide from our company.

## Technologist (CIPT) Real Test

IAPP CIPT certification exams play a significant role to verify skills, experience, and knowledge in a specific technology. Enrollment in the Certified Information Privacy Technologist (CIPT) CIPT is open to everyone. Participants in the Certified Information Privacy Technologist (CIPT) CIPT come from all over the world and receive the credentials for the IAPP CIPT. They can quickly advance their careers in the fiercely competitive market and benefit from certification after earning the Certified Information Privacy Technologist (CIPT) CIPT badge.

To earn the CIPT certification, candidates must pass a rigorous exam that covers four key areas: privacy laws and regulations, privacy program governance, data lifecycle management, and information technology. CIPT exam is designed to test a candidate's knowledge and understanding of privacy laws and regulations, data protection principles, and privacy-enhancing technologies. CIPT Exam is also designed to assess a candidate's ability to design and implement privacy solutions that are compliant with relevant regulations and standards.

## IAPP Certified Information Privacy Technologist (CIPT) Sample Questions (Q10-Q15):

### NEW QUESTION # 10

#### SCENARIO

Clean-Q is a company that offers house-hold and office cleaning services. The company receives requests from consumers via their website and telephone, to book cleaning services. Based on the type and size of service, Clean-Q then contracts individuals that are registered on its resource database - currently managed in-house by Clean-Q IT Support. Because of Clean-Q's business model, resources are contracted as needed instead of permanently employed.

The table below indicates some of the personal information Clean-Q requires as part of its business operations:

Category	Types of Personal Information
Customers	Name, address (location), contact information, billing information
Resources (contracted)	Name, contact information, banking details, address

Clean-Q has an internal employee base of about 30 people. A recent privacy compliance exercise has been conducted to align employee data management and human resource functions with applicable data protection regulation. Therefore, the Clean-Q permanent employee base is not included as part of this scenario.

With an increase in construction work and housing developments, Clean-Q has had an influx of requests for cleaning services. The demand has overwhelmed Clean-Q's traditional supply and demand system that has caused some overlapping bookings.

In a business strategy session held by senior management recently, Clean-Q invited vendors to present potential solutions to their current operational issues. These vendors included Application developers and Cloud-Q's solution providers, presenting their proposed solutions and platforms.

The Managing Director opted to initiate the process to integrate Clean-Q's operations with a cloud solution (LeadOps) that will provide the following solution one single online platform: A web interface that Clean-Q accesses for the purposes of resource and customer management. This would entail uploading resource and customer information.

\* A customer facing web interface that enables customers to register, manage and submit cleaning service requests online.

\* A resource facing web interface that enables resources to apply and manage their assigned jobs.

\* An online payment facility for customers to pay for services.

Which question would you most likely ask to gain more insight about LeadOps and provide practical privacy recommendations?

- A. What is LeadOps' annual turnover?
- **B. Where are LeadOps' operations and hosting services located?**
- C. Does LeadOps practice agile development and maintenance of their system?
- D. How big is LeadOps' employee base?

#### Answer: B

#### Explanation:

To gain more insight about LeadOps and provide practical privacy recommendations, asking where LeadOps' operations and hosting services are located is essential.

\* Explanation:

\* Data Residency and Sovereignty: The physical location of data processing and storage facilities impacts compliance with data protection laws. Different countries have different regulations concerning data privacy and security.

\* Jurisdictional Issues: Knowing the location helps assess the legal jurisdiction governing the data. This includes understanding any potential requirements for data transfer, local laws, and the legal obligations LeadOps must comply with.

\* Cross-Border Data Transfers: If data is hosted in a different country, Clean-Q must ensure that adequate safeguards are in place

for cross-border data transfers. This is particularly relevant under GDPR, which requires appropriate data transfer mechanisms like Standard Contractual Clauses (SCCs) or Binding Corporate Rules (BCRs).

\* Risk Assessment: The geopolitical stability and data protection framework of the hosting location can influence the security and privacy risks associated with using LeadOps.

### NEW QUESTION # 11

A BaaS provider backs up the corporate data and stores it in an outsider provider under contract with the organization. A researcher notifies the organization that he found unsecured data in the cloud. The organization looked into the issue and realized \$ne of its backups was misconfigured on the outside provider's cloud and the data fully exposed to the open internet. They quickly secured the backup. Which is the best next step the organization should take?

- A. Investigate how the researcher discovered the unsecured data.
- B. Review its contract with the outside provider.
- C. Review the content of the data exposed.
- D. Investigate using alternate BaaS providers or on-premise backup systems.

**Answer: C**

Explanation:

After securing the misconfigured backup, the next best step for the organization is to review the content of the data that was exposed. This is crucial to assess the potential impact of the exposure, determine the sensitivity of the data, and identify any specific risks or compliance issues that may arise. Understanding the nature of the exposed data helps in making informed decisions about notification, mitigation, and further actions. According to IAPP, this step is essential for evaluating the severity of the breach and preparing appropriate responses, including regulatory notifications and communication with affected parties if necessary.

### NEW QUESTION # 12

SCENARIO

Wesley Energy has finally made its move, acquiring the venerable oil and gas exploration firm Lancelot from its long-time owner David Wilson. As a member of the transition team, you have come to realize that Wilson's quirky nature affected even Lancelot's data practices, which are maddeningly inconsistent. "The old man hired and fired IT people like he was changing his necktie," one of Wilson's seasoned lieutenants tells you, as you identify the traces of initiatives left half complete.

For instance, while some proprietary data and personal information on clients and employees is encrypted, other sensitive information, including health information from surveillance testing of employees for toxic exposures, remains unencrypted, particularly when included within longer records with less-sensitive data.

You also find that data is scattered across applications, servers and facilities in a manner that at first glance seems almost random.

Among your preliminary findings of the condition of data at Lancelot are the following:

\* Cloud technology is supplied by vendors around the world, including firms that you have not heard of.

You are told by a former Lancelot employee that these vendors operate with divergent security requirements and protocols.

\* The company's proprietary recovery process for shale oil is stored on servers among a variety of less-sensitive information that can be accessed not only by scientists, but by personnel of all types at most company locations.

\* DES is the strongest encryption algorithm currently used for any file.

\* Several company facilities lack physical security controls, beyond visitor check-in, which familiar vendors often bypass.

\* Fixing all of this will take work, but first you need to grasp the scope of the mess and formulate a plan of action to address it.

Which is true regarding the type of encryption Lancelot uses?

- A. It is a data masking methodology.
- B. Its decryption key is derived from its encryption key.
- C. It employs the data scrambling technique known as obfuscation.
- D. It uses a single key for encryption and decryption.

**Answer: D**

Explanation:

Data Encryption Standard (DES) is a symmetric-key algorithm, which means it uses the same key for both encryption and decryption. This is a fundamental characteristic of symmetric encryption, distinguishing it from asymmetric encryption, where a pair of

keys (public and private) are used. In the scenario described, DES is noted as the strongest encryption algorithm used, indicating that Lancelot's encryption method involves a single key for both processes.

### NEW QUESTION # 13

What is the distinguishing feature of asymmetric encryption?

- A. It uses distinct keys for encryption and decryption.
- **B. It has a stronger key for encryption than for decryption.**
- C. It employs layered encryption using dissimilar methods.
- D. It is designed to cross operating systems.

**Answer: B**

### NEW QUESTION # 14

Which activity would best support the principle of data quality?

- A. Ensuring that the number of teams processing personal information is limited.
- B. Delivering information in a format that the data subject understands.
- C. Providing notice to the data subject regarding any change in the purpose for collecting such data.
- **D. Ensuring that information remains accurate.**

**Answer: D**

Explanation:

Reference:

The principle of data quality states that personal data should be relevant to the purposes for which they are to be used and, to the extent necessary for those purposes, should be accurate, complete, and up to date<sup>1</sup>. Therefore, ensuring that information remains accurate is an activity that would best support this principle<sup>1</sup>. The other options are not directly related to the principle of data quality, but rather to other principles such as purpose specification, security safeguards, or openness.

### NEW QUESTION # 15

.....

In traditional views, CIPT practice materials need you to spare a large amount of time on them to accumulate the useful knowledge may appearing in the real exam. However, our CIPT learning questions are not doing that way. According to data from former exam candidates, the passing rate has up to 98 to 100 percent. There are adequate content to help you pass the CIPT Exam with least time and money.
