

Pass Guaranteed Netskope NSK300 - Marvelous Netskope Certified Cloud Security Architect Exam Actual Questions

P.S. Free 2026 Netskope NSK300 dumps are available on Google Drive shared by VCEPrep: <https://drive.google.com/open?id=1KTyKIJDOCibT3p3teuwNTolxomwWowL5>

In order to meet the demands of all customers, our company has a complete set of design, production and service quality guarantee system, the Netskope Certified Cloud Security Architect test guide is perfect. We can promise that quality first, service upmost. If you buy the NSK300 learning dumps from our company, we are glad to provide you with the high quality NSK300 study question and the best service. The philosophy of our company is "quality is life, customer is god." We can promise that our company will provide all customers with the perfect quality guarantee system and sound management system. It is not necessary for you to have any worry about the quality and service of the NSK300 learning dumps from our company. We can make sure that our company will be responsible for all customers. If you decide to buy the NSK300 study question from our company, you will receive a lot beyond your imagination. So hurry to buy our products, it will not let you down.

With our NSK300 practice materials, you don't need to spend a lot of time and effort on reviewing and preparing. For everyone, time is precious. Office workers and mothers are very busy at work and home; students may have studies or other things. Using NSK300 guide torrent, you only need to spend a small amount of time to master the core key knowledge to pass the NSK300 Exam and get a NSK300 certificate. It is proved that if you spend 20 to 30 hours to study our NSK300 exam questions, it is easy for you to pass the NSK300 exam.

Reliable NSK300 Braindumps Free - Latest NSK300 Material

NSK300 Dumps Torrent and NSK300 learning materials are created by our IT workers who are specialized in the study of real Netskope test questions for many years and they check the updating of dumps pdf everyday to make sure the valid of questions and answer, so you can totally rest assure of the accuracy of our VCEPrep vce braindumps.

Netskope Certified Cloud Security Architect Sample Questions (Q22-Q27):

NEW QUESTION # 22

A company's architecture includes a server subnet that is logically isolated from the rest of the network with no Internet access, no default gateway, and no access to DNS. New resources can only be provisioned on virtual resources in that segment and there is a firewall that is tunnel-capable securing the perimeter of the segment. The only requirement is to have content filtering for any server that might access the Internet using a browser.

Which two Netskope deployment methods would achieve this requirement? (Choose two.)

- A. Install the Netskope Client on the servers
- B. Deploy IPsec or GRE tunnels in the segment to steer traffic from the servers to Netskope.
- C. Deploy Data Plane on Premises (DPoP) with a proxy configuration on the servers.
- D. Deploy a mobile profile on the servers.

Answer: B,C

Explanation:

For a server subnet that is isolated and requires content filtering for any server that might access the Internet using a browser, the two Netskope deployment methods that would meet this requirement are:

* B. Deploy Data Plane on Premises (DPoP) with a proxy configuration on the servers: Deploying DPoP would allow the isolated servers to connect to the Netskope cloud for content filtering through a proxy configuration. This setup would enable the servers to have controlled access to the Internet for content filtering purposes without requiring direct Internet access¹.

* C. Deploy IPsec or GRE tunnels in the segment to steer traffic from the servers to Netskope: By deploying IPsec or GRE tunnels, the traffic from the servers can be securely directed to Netskope for content filtering. This method is suitable for environments where servers do not have direct Internet access, as the tunnel provides a secure path for traffic to reach Netskope's cloud services¹. These deployment methods are designed to work in environments with strict network isolation and provide the necessary content filtering capabilities for servers accessing the Internet.

The deployment methods and their suitability for isolated server subnets are based on Netskope's documentation and resources, which detail various deployment options and their use cases².

NEW QUESTION # 23

You successfully configured Advanced Analytics to identify policy violation trends. Upon further investigation, you notice that the activity is NULL. Why is this happening in this scenario?

- A. The SSPM policy was not configured during setup.
- B. A user accessed a static Web page.
- C. The REST API v1 token has expired.
- D. A policy violation was identified using API Protection.

Answer: B

Explanation:

The reason for the activity being NULL in this scenario is likely because a user accessed a static Web page. In Netskope's Advanced Analytics, when the activity is reported as NULL, it often indicates that there was no dynamic interaction or transaction to record, which is typical when a static web page is accessed¹. Static web pages do not generate the kind of events or activities that are tracked by policies, hence they appear as NULL in the activity field.

This explanation is supported by the Netskope Knowledge Portal, which mentions that applications fields with null values indicate incidents generated from web traffic, such as accessing static web pages². Further information on interpreting NULL values in Advanced Analytics reports can be found in the Netskope documentation¹.

In Advanced Analytics, the Activity field is populated only when Netskope can identify a specific app activity (e.g., upload, download, edit, share, delete).

When the traffic is simply generic web browsing - especially static web pages (HTML, images, CSS, JS)

- Netskope cannot map the request to an application-level activity, so the Activity field becomes:

NULL

This is expected behavior for traffic that is:

Not associated with a sanctioned/unsanctioned cloud app

Does not contain a user action like upload/download

Classified only as generic web content (static website)

Why other options are incorrect

A). The SSPM policy was not configured during setup SSPM configuration does not impact the Activity field in Analytics for inline events.

B). The REST API v1 token has expired API token expiration would impact API logs collection, not inline event Activity values.

C). A policy violation was identified using API ProtectionAPI Protection events always include an activity type (e.g., "Download via API"), so they wouldn't show NULL.

NEW QUESTION # 24

You are building an architecture plan to roll out Netskope for on-premises devices. You determine that tunnels are the best way to achieve this task due to a lack of support for explicit proxy in some instances and IPsec is the right type of tunnel to achieve the desired security and steering.

What are three valid elements that you must consider when using IPsec tunnels in this scenario? (Choose three.)

- A. cipher support on tunnel-initiating devices
- B. bandwidth considerations
- C. Netskope Client behavior when on-premises
- D. the categories to be blocked
- E. the impact of threat scanning performance

Answer: A,B,E

Explanation:

When using IPsec tunnels, especially in the context of deploying Netskope for on-premises devices, several factors must be considered to ensure a secure and efficient architecture:

Cipher support on tunnel-initiating devices (A): It is crucial to ensure that the devices initiating the IPsec tunnels support the ciphers used by Netskope. This compatibility is necessary for establishing secure connections.

Bandwidth considerations (B): The bandwidth available for the IPsec tunnels will affect the data throughput and performance of the connection. Adequate bandwidth must be allocated to handle the expected traffic without causing bottlenecks.

The impact of threat scanning performance (D): The performance of threat scanning can be affected by the encryption and decryption processes in IPsec tunnels. It is important to consider how the threat scanning capabilities will perform under the additional load of encrypted traffic.

These elements are essential for the successful implementation of IPsec tunnels in a Netskope architecture plan for on-premises devices¹².

NEW QUESTION # 25

You want to integrate with a third-party DLP engine that requires ICAP. In this scenario, which Netskope platform component must be configured?

- A. Secure Forwarder
- B. Netskope Cloud Exchange
- C. On-Premises Log Parser (OPLP)
- D. Netskope Adapter

Answer: A

Explanation:

To integrate Netskope with a third-party DLP engine using ICAP, you must configure the Netskope Secure Forwarder. Secure Forwarder is the only Netskope component that supports:

* ICAP communication

* Forwarding inline web traffic to external DLP engines

* Bidirectional ICAP requests/responses (REQMOD/RESPMOD)

This allows Netskope to send inspected content to your on-prem or third-party DLP appliance for additional scanning.

Why the other options are incorrect

* A. On-Premises Log Parser (OPLP)Used for ingesting logs into Netskope - not for ICAP or traffic processing

* C. Netskope Cloud ExchangeUsed for integrations with SIEM, SOAR, ticketing, threat intel - not for inline DLP.

* D. Netskope AdapterUsed mainly for SSPM/API integrations - not relevant for ICAP or external DLP engines.

NEW QUESTION # 26

You are assisting your network administrator to troubleshoot an issue with client-based NPA.

In the Netskope UI, what information do you need from the administrator to run the NPA troubleshooter for this user? (Choose two.)

- A. Private App Name
- B. Private App ID
- C. Publisher Name
- D. User & Device

Answer: A,D

NEW QUESTION # 27

.....

Our NSK300 questions pdf is up to date, and we provide user-friendly NSK300 practice test software for the NSK300 exam. Moreover, we are also providing money back guarantee on all of NSK300 test products. If the NSK300 braindumps products fail to deliver as promised, then you can get your money back. The NSK300 Sample Questions include all the files you need to prepare for the NSK300 exam. With the help of the NSK300 practice exam questions and test software, you will be able to feel the real NSK300 exam scenario, and it will allow you to assess your skills.
