General pest management 7a

To control pests of structures, pesticide application is the only means for suppressing pests.
False
When technicians use other practices in addition to pesticide use for controlling pests:
These practices often reduce pesticide use or make such use a secondary operation of the program.
The title technician is used in this manual to denote:
All of the above.
Which Michigan regulation requires that pesticide applications be made in a manner that prevents off-target discharges of pesticides, and that pesticide application equipment be properly calibrated and in sound mechanical condition?
Regulation 637
Which Michigan legislation gives the MDARD authority to certify commercial applicators and to prescribe standards for certification?
Natural Resources and Environmental Protection Act
Which federal legislation specifies that all pesticides be classified as either general-use or restricted-use?
FIFRA
Which Michigan legislation establishes the types of certified applicators and expands the pesticide record-keeping requirements?
Regulation 636
Structural pest managers do not have to concern themselves with the possibility of harming endangered species.
False
In Michigan, a vehicle used to transport pesticides for a pesticide application business must:
Have the name of the pesticide applicator firm and the business phone number printed on the exterior
In Michigan, commercial pesticide applicators must provide their customer written information in the Applicator Service Agreement including:
All of the above.
Describe what type of pesticide information should be a part of the risk and benefit information provided to customers.
Definition, general description, why pesticide is used, general toxicity information (i.e. compound type, where applied, exposure information, amount/type applied, label compliance), precautionary measures and instructions to customer on site preparation, precautions, etc.
If requested, a commercial pesticide applicator must provide the customer with pesticide product labels and MSDS sheets.
True
Pesticide drift is not a concern to Category 7A applicators.
False
Notification and posting requirements include:

General-and-Household-Pest-Control: Pesticide Applicator Category 7A General and Household Pest Control Exam

持ってきた製品があなたにふさわしくないと感じることはよくありますか？ Category-7A-General-and-Household-Pest-Control学習ガイドを使用することに決めた場合、問題に遭遇することは決してないことを伝えたいと思います。私たちのCategory-7A-General-and-Household-Pest-Control学習教材は、あなたが期待できない高品質を持っています。Category-7A-General-and-Household-Pest-Control学習教材のガイダンスで経験を積むと、以前よりも短時間で過ごすことができ、明らかに進歩を感じることができます。また、Category-7A-General-and-Household-Pest-Controlのテストクイズは、進歩に役立つことがわかります。。

OCPE Pesticide Applicator Category 7A General and Household Pest Control Exam 認定 Category-7A-General-and-Household-Pest-Control 試験 問題 (Q21-Q26):

質問 # 21

Chemical resistant gloves should be worn:

- A. Only when mixing a pesticide
- **B. When mixing or applying a pesticide**
- C. Only when applying a pesticide

正解: B

解説:

Chemical-resistant gloves are a critical piece of personal protective equipment (PPE) for pesticide applicators. The General Pest Management: Guide for Commercial Applicators - Category 7A (Chapter

3: Pesticide Safety) and NJDEP guidelines require gloves to be worn when mixing or applying a pesticide, as both activities pose a risk of dermal exposure, the most common cause of pesticide poisoning (see Question 18). Option A (only when applying) ignores the risk during mixing, and Option C (only when mixing) ignores the risk during application.

質問 # 22

The most frequently reported vector-borne illness is:

- A. Tick Paralysis
- **B. Lyme Disease**
- C. Rocky Mountain Spotted Fever

正解: B

解説:

Lyme Disease is the most frequently reported vector-borne illness in the U.S., including New Jersey, transmitted by the blacklegged tick. The General Pest Management: Guide for Commercial Applicators

- Category 7A (Chapter 7: Ticks) highlights its prevalence, with thousands of cases reported annually.

Option A (Rocky Mountain Spotted Fever) is less common. Option B (Tick Paralysis) is rare and not a disease but a condition caused by tick bites.

質問 # 23

The IPM style of pest control includes:

- **A. A reduction of pesticide use**
- B. One-time reactive pesticide applications
- C. Pre-established pesticide applications according to a schedule

正解: A

解説:

Integrated Pest Management (IPM) focuses on sustainable pest control by minimizing pesticide use and integrating multiple control methods (e.g., cultural, mechanical, biological). The General Pest Management: Guide for Commercial Applicators - Category

7A(Chapter 4: IPM) highlights that IPM aims for a reduction of pesticide use through prevention and non-chemical methods. Option A (pre- established applications) contradicts IPM's reactive, need-based approach. Option B (one-time reactive applications) may be part of IPM but does not capture its broader goal of reducing pesticide reliance.

質問 # 24

Carpenter ant control is obtained by the elimination of:

- A. Inside colonies and perimeter control
- **B. Both inside and near building colonies**
- C. The outside colony

正解: B

解説:

Carpenter ants often have multiple colonies, including satellite colonies inside structures and parent colonies outside near the building. Effective control, as outlined in the General Pest Management: Guide for Commercial Applicators - Category 7A(Chapter 7: Ants), requires eliminating both inside and near building colonies to prevent reinfestation. Option B (outside colony only) is insufficient, as satellite colonies inside will persist. Option C (inside colonies and perimeter control) is part of the strategy but does not address the parent colony outside.

質問 # 25

The yellow jacket is a:

- **A. Social wasp usually nesting in the ground**
- B. Social bee usually nesting in trees
- C. Solitary wasp nesting in the ground
- D. Ant with wings

正解: A

解説:

Yellow jackets are social wasps that typically nest in the ground, often in abandoned rodent burrows or other cavities. They live in colonies with a queen and workers, as described in the General Pest Management: Guide for Commercial Applicators - Category 7A(Chapter 7: Wasps). Option B (social bee) is incorrect, as yellow jackets are wasps, not bees, and they do not typically nest in trees. Option C (solitary wasp) is incorrect, as yellow jackets are social. Option D (ant with wings) is incorrect, as yellow jackets are distinct from ants.

質問 # 26
