

CDPSE Exam Collection: Certified Data Privacy Solutions Engineer & CDPSE Top Torrent & CDPSE Exam Cram

2026 Latest PassSureExam CDPSE PDF Dumps and CDPSE Exam Engine Free Share: <https://drive.google.com/open?id=1IUfgMyRF573Ye0zhOfUvmXtKIvHrBr6S>

For candidates who are going to buy CDPSE Exam Materials online, they may have the concern about the website safety. If you choose us, we will offer you a clean and safe online shopping environment. In addition, CDPSE exam dumps are high quality and accuracy, and you can pass your exam just one time. We apply the international recognition third party for the payment, therefore your money safety can also be guaranteed. In order to let you access to the latest information, we offer you free update for 365 days after purchasing, and the update version will be sent to your email automatically.

To pass the hard Certified Data Privacy Solutions Engineer CDPSE exam on the first try, you must invest more time, effort, and money. To pass the Certified Data Privacy Solutions Engineer CDPSE Exam, you must have the right CDPSE Exam Dumps, which are quite hard to get online. Get it right away to begin preparing. The following file types are available: Certified Data Privacy Solutions Engineer CDPSE Dumps PDF file, and Practice test software for CDPSE and web-based practise test software for Certified Data Privacy Solutions Engineer CDPSE Exams. All these three formats consist of Certified Data Privacy Solutions Engineer CDPSE Actual Questions that are not only helpful for the preparation but also provide useful information about the Certified Data Privacy Solutions Engineer CDPSE Valid Dumps certification preparation.

PassSureExam CDPSE Free Sample/Download Instantly

There are three different versions of our CDPSE study guide which are PDF, Software and APP online versions. For their varied advantages, our CDPSE learning questions have covered almost all the interests and habits of varied customers groups. No matter you are a student, a working staff, or even a house wife, you will find the exact version of your CDPSE Exam Materials to offer you a pleasant study experience.

ISACA CDPSE (Certified Data Privacy Solutions Engineer) Certification Exam is a globally recognized certification for individuals who specialize in data privacy and security. The CDPSE certification program is developed and administered by the Information Systems Audit and Control Association (ISACA), a leading global association for IT governance, audit, and cybersecurity professionals.

ISACA Certified Data Privacy Solutions Engineer Sample Questions (Q121-Q126):

NEW QUESTION # 121

When tokenizing credit card data, what security practice should be employed with the original data before it is stored in a data lake?

- A. Classification
- **B. Encryption**
- C. Backup
- D. Encoding

Answer: B

Explanation:

Reference:

Encryption is a security practice that transforms data into an unreadable format using a secret key or algorithm. Encryption protects the confidentiality and integrity of data, especially when they are stored in a data lake or other cloud-based storage systems.

Encryption ensures that only authorized parties can access and use the original data, while unauthorized parties cannot decipher or modify the data without the key or algorithm. Encryption also helps to comply with data protection laws and regulations, such as the General Data Protection Regulation (GDPR) or the California Consumer Privacy Act (CCPA), which require data controllers and processors to implement appropriate technical and organizational measures to safeguard personal data.

The other options are less effective or irrelevant for securing the original data before storing them in a data lake. Encoding is a process of converting data from one format to another, such as base64 or hexadecimal. Encoding does not protect the data from unauthorized access or use, as it can be easily reversed without a key or algorithm. Backup is a process of creating a copy of data for recovery purposes, such as in case of data loss or corruption. Backup does not protect the data from unauthorized access or use, as it may create additional copies of sensitive data that need to be secured. Classification is a process of assigning labels or categories to data based on their sensitivity, value or risk level, such as public, confidential or restricted. Classification helps to identify and manage the data according to their security requirements, but it does not protect the data from unauthorized access or use by itself.

Tokenization: Your Secret Weapon for Data Security? - ISACA, section 2: "Encryption is one of the most effective security controls available to enterprises, but it can be challenging to deploy and maintain across a complex enterprise landscape." Credit Card

Tokenization: What It Is, How It Works - NerdWallet, section 2: "Encrypting personal data automatically before sending them through email, using encryption standards and algorithms that are compliant with data protection laws and regulations." Tokenized

Credit Card Data: Everything You Need to Know - Koombea, section 3: "The sensitive card data itself is stored on a server with much higher security." What is Data Tokenization and Why is it Important? | Immuta, section 2: "Tokenization replaces the original sensitive data with randomly generated, nonsensitive substitute characters as placeholder data."

NEW QUESTION # 122

Which of the following helps define data retention time in a stream-fed data lake that includes personal data?

- A. Privacy impact assessments (PIAs)
- B. Data lake configuration
- C. Data privacy standards
- D. Information security assessments

Answer: A

Explanation:

A privacy impact assessment (PIA) is a systematic process of identifying and evaluating the potential privacy risks and impacts of a data processing activity or system. A PIA helps to ensure that privacy is considered and integrated into the design and development of data processing activities or systems, and that privacy risks are mitigated or eliminated. A PIA also helps to determine the appropriate retention periods for personal data based on the purpose and necessity of the data processing, as well as the legal and regulatory obligations that apply to the data. Therefore, a PIA helps to define data retention time in a stream-fed data lake that includes personal data. Reference: : CDPSE Review Manual (Digital Version), page 99

NEW QUESTION # 123

Which of the following BEST supports an organization's efforts to create and maintain desired privacy protection practices among employees?

- A. Code of conduct principles
- B. Performance evaluations
- C. Awareness campaigns
- D. Skills training programs

Answer: C

Explanation:

Awareness campaigns are initiatives that aim to educate and inform employees about the importance of privacy protection, the organization's privacy policies and procedures, the applicable laws and regulations, and the best practices and behaviors to safeguard personal data. Awareness campaigns can support an organization's efforts to create and maintain desired privacy protection practices among employees by raising their awareness, understanding and commitment to privacy, as well as by influencing their attitudes, values and culture. Awareness campaigns can use various methods and channels, such as posters,

newsletters, videos, webinars, quizzes, games or events, to deliver consistent and engaging messages to the target audience. The other options are not the best ways to support an organization's efforts to create and maintain desired privacy protection practices among employees. Skills training programs are focused on developing specific technical or functional skills related to privacy, but they may not address the broader aspects of privacy awareness or culture. Performance evaluations are focused on measuring and rewarding individual or team performance based on predefined criteria or objectives, but they may not reflect the actual level of privacy awareness or practice. Code of conduct principles are focused on establishing and enforcing ethical standards and rules of behavior for employees, but they may not be sufficient to create or maintain privacy awareness or practice without effective communication and education¹, p. 103-104 Reference: 1: CDPSE Review Manual (Digital Version)

NEW QUESTION # 124

An organization has initiated a project to enhance privacy protections by improving its information security controls. Which of the following is the MOST useful action to help define the scope of the project?

- A. Review proposed privacy rules that govern the processing of personal data
- B. Review recent audit reports on the internal control environment
- C. Identify databases that do not have encryption in place.
- D. Identify databases that contain personal data

Answer: A

Explanation:

Reviewing proposed privacy rules that govern the processing of personal data is the most useful action to help define the scope of the project because it helps identify the legal and regulatory requirements, the data protection principles and the privacy objectives that the information security controls need to support. Reviewing recent audit reports, identifying databases that contain personal data or do not have encryption in place are helpful actions to assess the current state of privacy and security, but they do not provide a clear direction for the project scope.

NEW QUESTION # 125

Which of the following principles is MOST important to apply when granting access to an enterprise resource planning (ERP) system that contains a significant amount of personal data?

- A. Data minimization
- B. Segregation of duties
- C. Least privilege
- D. Read-only access

Answer: C

Explanation:

The principle of least privilege is the most important principle to apply when granting access to an ERP system that contains a significant amount of personal data. The principle of least privilege states that users should only have the minimum level of access and permissions necessary to perform their legitimate tasks and functions, and no more. Applying the principle of least privilege helps to protect the privacy and security of the personal data in the ERP system, as it reduces the risk of unauthorized or inappropriate access, disclosure, modification, or deletion of the data. It also helps to comply with the privacy laws and regulations, such as the GDPR, that require data controllers and processors to implement appropriate technical and organizational measures to ensure a level of security appropriate to the risk.

NEW QUESTION # 126

.....

Due to lots of same products in the market, maybe you have difficulty in choosing the CDPSE guide test. We can confidently tell you that our products are excellent in all aspects. You can directly select our products. Firstly, we have free trials of the CDPSE exam study materials to help you know our products. Once you find it unsuitable for you, you can choose other types of the study

materials. You will never be forced to purchase our CDPSE Test Answers. Just make your own decisions. We can satisfy all your demands and deal with all your problems.
