Topic 5	• Security Assessment and Testing: This section focuses on security audit principles and methodologies, penetration testing techniques, and the use of security metrics and reporting.

ServiceNow Certified Implementation Specialist - Strategic Portfolio Management Sample Questions (Q69-Q74):

NEW QUESTION # 69
If a user creates a new demand from the demand workbench, what state will the system save the record in?

- A. draft
- B. open
- C. approved
- D. qualified

Answer: D

Explanation:
Explanation
According to the Using the Demand Workbench document, if a user creates a new demand from the demand workbench, the system saves the record in the qualified state and displays it on the bubble chart. The other options are not correct, as they are not the default state for a new demand created from the demand workbench.
The approved state is the final state for a demand that has passed all the assessments. The open state is the initial state for a demand that is created from the Service Catalog. The draft state is the state for a demand that is created from the Demand form.

NEW QUESTION # 70
Idea [im_idea_core] is directly extended from which table?

- A. Idea Modules
- B. Project
- C. Task
- D. It is not extended from any table

Answer: D

Explanation:
Explanation
According to the ServiceNow documentation1, the Idea [im_idea_core] table is a base table that is not extended from any other table. It stores information about ideas and their categories. The other options are incorrect because:
Task: The Task table is a base table that is extended by many other tables, such as Project, Demand, Incident, etc2.
Idea Modules: The Idea Modules table is a child table of the Idea [im_idea_core] table that defines the idea modules displayed on the Idea Portal3.
Project: The Project table is a child table of the Task table that stores information about projects.

NEW QUESTION # 71

A project expense line is cost associated with a specific source, except for:

- A. Resource.
- B. Program.
- C. Software.
- D. Fixed Assets.

Answer: B

Explanation:

According to the Project Expense Lines document, a project expense line is cost associated with a specific source, such as fixed assets, resource, or software. The program field on the project expense line form is not a source of cost, but a reference to the program that the project belongs to. Therefore, the correct answer is B. Program. The other options are not correct, as they are sources of cost for a project expense line.

NEW QUESTION # 72

A program is a container for the following except for:

- A. Issues
- B. Portfolios
- C. Cost plans
- D. Program tasks

Answer: B

Explanation:

According to the ServiceNow documentation1, a program is a container for the following:

Program tasks: Tasks that define the scope and deliverables of the program2.

Issues: Problems that affect the program or its outcome3.

Cost plans: Plans that estimate the cost of the program and its components4.

A portfolio is not a part of a program, but rather a collection of programs and projects that are aligned with a strategic goal or objective.

NEW QUESTION # 73

If an it_project_manager does not want to equally distribute hours across the resource plan time frame, what allocation spread should be used?

- A. Back Load.
- B. Even.
- C. Any.
- D. Front Load.

Answer: C

Explanation:

Explanation

If an it_project_manager does not want to equally distribute hours across the resource plan time frame, the allocation spread should be set to Any. This option allows the it_project_manager to manually enter the hours for each month or quarter in the resource plan. The other options (Even, Back Load, and Front Load) automatically distribute the hours evenly, from the end, or from the start of the time frame, respectively. You can find more information about the allocation spread in the Product Documentation for

ServiceNow.
