ASIS Physical Security Professional Exam Sample Questions (Q321-Q326):

NEW QUESTION # 321

Asset value is determined by which of the following elements?

- A. Original cost, criticality, and ease of replacement
- B. **Criticality, ease of replacement, and some measure of value**
- C. Ease of replacement, some measure of value, and original cost
- D. Value, original cost, and criticality

Answer: B

Explanation:

Comprehensive Detailed Explanation:

Asset value in physical security is determined not just by its original purchase cost, but by:

Criticality: How essential the asset is to operations or mission success.

Ease of Replacement: Difficulty or time involved in replacing the asset.

Some Measure of Value: This may include financial worth, proprietary importance, or symbolic significance.

This broader view reflects operational risk more accurately than financial cost alone.

A, B, and C mention components but do not include all three core elements correctly.

NEW QUESTION # 323

What can be used as servers and do not require special installation?

- A. Workstations
- B. Minicomputers
- C. Supercomputers
- D. None of the above

Answer: A

Explanation:

Workstations can serve as basic servers in small networks. While they are typically used for individual tasks, they can be configured to act as servers for file sharing, printing, or hosting lightweight applications without needing specialized installation or infrastructure.

Minicomputers (B) are outdated mid-range systems.

Supercomputers (C) are specialized, high-cost systems for massive computations, not typical servers.

"None of the above" (D) is incorrect because workstations can indeed be used as servers.
