Guide 300-815 Torrent - Reliable 300-815 Test Prep

You may doubt about such an amazing data, which is unimaginable in this industry. But our 300-815 exam questions have made it. You can imagine how much efforts we put into and how much we attach importance to the performance of our 300-815 study materials. We use the 99% pass rate to prove that our 300-815 practice materials have the power to help you go through the exam and achieve your dream. Most candidates show their passion on our 300-815 guide materials, because we guarantee all of the customers that you will pass for sure with our 300-815 exam questions.

Cisco Implementing Cisco Advanced Call Control and Mobility Services Sample Questions (Q63-Q68):

NEW QUESTION # 63

Refer to the exhibit. An administrator has configured a SIP trunk between two Cisco UCM clusters. For calls that should use the trunk, the calls fail with a fast busy. The administrator checks the Cisco CallManager SDL traces and found that the cluster to which the calling device is registered never sends an INVITE to the destination cluster. The administrator also verifies that all nodes from both clusters are powered on, and the CallManager service is running.

How is this issue resolved?

- A. The administrator needs to disable OPTIONS pings on the SIP trunks for both clusters.
- B. The administrator must allow connectivity so that TCP connections do not fail between the nodes.
- C. The administrator must associate the route pattern with a calling search space the device can dial.
- D. The administrator needs to enable OPTIONS pings on the SIP trunks for both clusters.

Answer: B

NEW QUESTION # 64

Refer to the exhibit. An administrator configured a new SIP trunk between Cisco UCM and Cisco Unified Border Element. Calls that use this new trunk are failing, and debugs from the Cisco Unified Border Element do not show any signaling received from Cisco UCM. The administrator verified that OPTIONS is enabled on the SIP profile configured on the trunk on Cisco UCM. The route pattern matched for this call is correctly configured to send calls to the Cisco Unified Border Element using this new trunk. What is the cause of this failure?

- A. The called party number is not complete because it contains only 7 digits
- B. There are multiple matches for the dialed number, and Cisco UCM is trying to send the call to SEP2834A2824611 rather than Cisco Unified Border Element
- C. The calling search space on the calling line/device does not contain the partition of the route pattern
- D. A connectivity issue between Cisco UCM and Cisco Unified Border Element prevents Cisco UCM from receiving a response to the OPTIONS it is sending to Cisco Unified Border Element

Answer: D

NEW QUESTION # 65

When you troubleshoot H.323 call setup, which message informs you that the called party is being notified about the call?

- A. RINGING
- B. PROCEEDING
- C. CONNECT
- D. ALERTING

Answer: C

Explanation:
Section: Signaling and Media Protocols

NEW QUESTION # 66

The company implemented Cisco Unified Mobility on the Cisco UCM. The users are satisfied and can transfer voice calls between devices. Mobile users want to extend the timer that controls the time given to pick up a voice call on an IP phone from 4 to 6 seconds. Which configuration change satisfies this requirement?

- A. Change the "Maximum Wait Time for Desk Pickup" setting from 4000 to 6000.
- B. Change the "Maximum Wait Time for Mobility Pickup" setting from 4000 to 6000.
- C. Change the "Maximum Wait Time for Desk Pickup" setting from 4 to 6.
- D. Change the "Maximum Wait Time for Mobility Pickup" setting from 4 to 6.

Answer: A

NEW QUESTION # 67

An administrator manages an environment with mobile users who commonly move between locations and take IP phones to remote sites. When mobile users are at one of the sites, users report issues with call quality, such as the audio cutting in and out. In addition, the affected area has a low bandwidth connection compared to other sites, so the administrator has put these devices in a region with an inter-region restriction of 8 kbps per call. Which feature must the administrator configure to mitigate the issue?

- A. Extension Mobility
- B. Extension Mobility Cross Cluster
- C. Device Mobility
- D. Location Bandwidth Manager

Answer: D

NEW QUESTION # 68

......

As a professional dumps vendors, we provide the comprehensive 300-815 pass review that is the best helper for clearing 300-815 actual test, and getting the professional certification quickly. It is a best choice to improve your professional skills and ability to face the challenge of 300-815 Practice Exam with our online training. We have helped thousands of candidates to get succeed in their career by using our 300-815 study guide.
