SAP Certified Associate - Implementation Consultant - SAP S/4HANA Cloud Public Edition Sample Questions (Q40-Q45):

NEW QUESTION # 40
If you cannot find a prepackaged solution process that addresses integration requirements in SAP Signavio Process Navigator,

where do you look next?

- A. SAP Business Accelerator Hub
- B. SAP Discovery Center
- C. SAP Business Technology Platform
- D. SAP Cloud ALM

Answer: A

Explanation:
If you cannot find a prepackaged solution process that addresses integration requirements in SAP Signavio Process Navigator, you should look next at the SAP Business Accelerator Hub. The SAP Business Accelerator Hub is a central repository of integration content that can help you to connect SAP S/4HANA Cloud Public Edition with other SAP and non-SAP applications. You can browse, search, and filter the available integration packages, scenarios, and APIs, and access the relevant documentation and configuration guides1. The SAP Business Accelerator Hub also provides links to the SAP Integration Suite tools, such as SAP Cloud Integration, SAP API Management, and SAP Cloud Integration Automation Service, that you can use to implement and manage the integrations2.
The other options are not the correct places to look for integration requirements. SAP Discovery Center is a portal that helps you to discover, try, and buy SAP solutions and services3. SAP Business Technology Platform is a platform that enables you to extend, integrate, and build applications in the cloud4. SAP Cloud ALM is a cloud-based application lifecycle management tool that supports you in implementing, operating, and enhancing your cloud solutions5. References = SAP Business Accelerator Hub, SAP S/4HANA Cloud Public Edition - Integration, SAP Discovery Center, SAP Business Technology Platform, SAP Cloud ALM.

NEW QUESTION # 41
What do you use to collect the values that are entered into the configuration activities in SAP Central Business Configuration?

- A. SAP Cloud ALM Processes app
- B. Availability and Dependencies of Solution Processes Excel
- C. Business Driven Configuration Questionnaire
- D. SAP Cloud ALM Requirements app

Answer: C

Explanation:
The Business Driven Configuration Questionnaire is a tool that helps you collect the values that are entered into the configuration activities in SAP Central Business Configuration. It is a web-based questionnaire that guides you through the configuration settings for each solution process. You can use the questionnaire to enter the values for the configuration activities, review the values, and export them to an Excel file. You can then import the Excel file to SAP Central Business Configuration and apply the values to the configuration activities. References = Business Driven Configuration Questionnaire, Importing Configuration Values from Business Driven Configuration Questionnaire, Using SAP Central Business Configuration to Activate Content in the SAP S/4HANA Cloud Starter System

NEW QUESTION # 42
What have SAP S/4HANA Cloud Business Workflows been designed for? Note: There are 3 correct answers to this question.

- A. To create very simple release or approval procedures
- B. To create cross-product workflow procedures
- C. To create standard procedures from SAP Signavio Process Navigator
- D. To create complex, repeated work processes with iterative cycles
- E. To create business processes with a high number of people involved in a pre-defined sequence

Answer: B,D,E

Explanation:
SAP S/4HANA Cloud Business Workflows are designed to enhance and automate business processes within the organization. They serve multiple purposes:
* To create complex, repeated work processes with iterative cycles: These workflows are designed to handle intricate processes that occur regularly within the business environment, allowing for automation and efficiency in tasks that require repetition and involve multiple steps or conditions.

* To create cross-product workflow procedures: This capability allows for the integration of various SAP products and services into a cohesive workflow, ensuring smooth and interconnected operations across different aspects of the business. It enables workflows that span across different SAP applications and solutions, providing a unified approach to managing business processes.
* To create business processes with a high number of people involved in a pre-defined sequence: SAP S /4HANA Cloud Business Workflows are capable of handling processes that involve many participants, orchestrating the sequence of tasks to be completed by different individuals or departments. This ensures that each step of the process is executed in the right order by the right person, enhancing collaboration and efficiency.

NEW QUESTION # 43

In which deployment models is application management the responsibility of the customer? Note: There are 3 correct answers to this question.

- A. On premise
- B. Infrastructure as a Service
- C. Software as a Service
- D. Platform as a Service
- E. Private Cloud

Answer: A,D,E

Explanation:

In different deployment models, the responsibility for application management varies, with the customer typically taking on more responsibility in certain models:
* Platform as a Service (PaaS): In this model, the customer is responsible for managing the applications they develop or deploy on the platform, even though the provider manages the underlying infrastructure, operating systems, and middleware.
* On premise: In an on-premise deployment, the customer has full responsibility for managing both the applications and the infrastructure they run on. This includes maintenance, updates, security, and compliance for both the applications and the hardware/software infrastructure.
* Private Cloud: Similar to on-premise deployments, customers in a private cloud model are typically responsible for managing their applications, including SAP S/4HANA Cloud Public Edition. The cloud provider may manage the cloud infrastructure and virtualization layer, but the customer often handles application-level management tasks, including updates, customization, and user management.
These deployment models contrast with Software as a Service (SaaS), where the service provider is generally responsible for managing the application, including its maintenance, updates, and availability.

NEW QUESTION # 44

In SAP Central Business Configuration, which activities can you perform during Product-Specific Configuration? Note: There are 3 correct answers to this question.

- A. Add new sales organizations.
- B. Create new scope items.
- C. Add blocking reasons for billing.
- D. Modify building blocks.
- E. Change approval thresholds.

Answer: A,C,E

NEW QUESTION # 45

......
