For the complete, comprehensive, for Nutanix Certified Professional - Unified Storage v6.5 NCP-US Exam Preparation you can get assistance from Nutanix Certified Professional - Unified Storage v6.5 Exam Questions.

Nutanix Certified Professional - Unified Storage v6.5 Sample Questions (Q52-Q57):

NEW QUESTION # 52
What is the default password expiry for the machine account used to integrate Nutanix Files with Active Directory?

- A. 90 days
- B. 0 days
- C. 30 days
- D. 60 days

Answer: B

NEW QUESTION # 53

What is the most efficient way of enabling users to restore their files without administrator intervention in multiple Files shares?

- A. Assign the same Category to all FSVMs and adding that Category to a single Protection Policy in PC.
- B. Click Enable next to the name of the share in Manage Recovery Settings from Data Lens.
- C. Add all FSVMs to a Consistency Group within a single asynchronous Protection Domain in PE.
- D. Click Enable Self Service Restore in the Edit wizard for each share in Shares tab from Files Console.

Answer: D

NEW QUESTION # 54

An administrator is concerned that storage in the Nutanix File Server is being used to store personal photos and videos. How can the administrator determine if this is the case?

- A. Examine the File Distribution by Type widget from the Files Console for the File Server.
- B. Examine the File Activity widget in the File Analytics dashboard for the File Server.
- C. Examine the Usage Summary table for the File Server Container in the Prism Element Storage page.
- D. Examine the File Distribution by Type widget in the File Analytics dashboard for the File Server.

Answer: D

NEW QUESTION # 55

Which workload type describes I/O sizes for read and write operations that are less than or equal to 16 KB while file sizes are equal to 10 MB or more?

- A. Sequential
- B. Default
- C. Asynchronous
- D. Random

Answer: D

NEW QUESTION # 56

An administrator needs to deploy a new Linux log collector package which creates a directory for each monitored item. The logs would be analyzed by a Windows application.
Which action should the administrator take, that will provide the best performance and simplicity?

- A. Assign e Volume vDisk to the Linux collector VM,
- B. Configure Files Analytics to analyze the collected logs.
- C. Create a Files distributed share with multi-protocol access.
- D. Create an Objects bucket with versioning enabled.

Answer: C

Explanation:
Creating a Files distributed share with multi-protocol access would allow for easy and efficient transfer of log files between the Linux collector package and the Windows application. This would provide simplicity in terms of configuration and management, and would also ensure that the log files are stored in a distributed and highly available manner, making it easier to access them as and when required.

, Files is a software-defined scale-out file storage solution that provides a single namespace for unstructured data2. Files supports both SMB and NFS protocols, which means you can access the same share from both Linux and Windows machines3. This would provide the best performance and simplicity for your log collector package and analysis application.

NEW QUESTION # 57

......

Our NCP-US preparation exam have assembled a team of professional experts incorporating domestic and overseas experts and scholars to research and design related exam bank, committing great efforts to work for our candidates. Most of the experts have been studying in the professional field for many years and have accumulated much experience in our NCP-US Practice Questions.
