Candidates can also access online resources such as practice exams, study guides, and video tutorials to help them prepare for the exam.

## **Salesforce Certified Sharing and Visibility Architect Sample Questions (Q24-**

## Q29):

### NEW QUESTION # 24

A Sales Rep at Universal Containers wants to create a dashboard to see how his sales numbers compare with his peers. Assuming a Private model, which two permissions would the Sales Rep need to meet this requirement?

- **A. Manage Dashboards**
- B. Manage Custom Report Types
- C. Customize Application
- **D. View All Data**

**Answer: A,D**

### NEW QUESTION # 25

Universal Containers (UC) has 200 distributors that use Partner Community licenses.

Partners cannot see each other's data, but UC is also trying to give more visibility to data for certain individuals at a distributor.

HOW can an Architect give users in the partner user role access to all Case and Container records owned by any user, regardless of role, at the same distributor?

- **A. Give super user permission to the individual partner users.**
- B. Create sharing sets.
- C. Create an ownership-based sharing rule.
- D. Create a Permission Set granting "View All" permission to Case and Container records.

**Answer: A**

### NEW QUESTION # 26

Universal Containers maintains Job information in a Custom Object that contains sensitive information. The only users who should be able to view and edit Job records are the user who owns the record and all users in the Delivery profile. Which three platform sharing tools are required to support the above requirements?

Choose 3 answers.

- **A. "Modify All" permission for Job Object on the Delivery Profile.**
- B. "View All Data" profile permission on the Delivery Profile.
- C. Criteria-Based sharing rule for the Delivery Profile on the Job Object.
- **D. Grant access Using Hierarchy sharing setting on the Job Object set to false.**
- **E. Organization-Wide Default sharing setting of Private on the Job Object.**

**Answer: A,D,E**

Explanation:

Explanation

To support the requirement of allowing only the owner and users in the Delivery profile to view and edit Job records, you need to use three platform sharing tools:

Organization-Wide Default sharing setting of Private on the Job Object: This will restrict access to Job records to only the owner by default.

Grant access Using Hierarchy sharing setting on the Job Object set to false: This will prevent users above the owner in the role hierarchy from accessing Job records.

"Modify All" permission for Job Object on the Delivery Profile: This will grant users in the Delivery profile full access to all Job records regardless of ownership.

Criteria-Based sharing rule and "View All Data" profile permission are not required for this scenario.

Criteria-Based sharing rule would grant additional access to users who meet certain criteria, which is not necessary. "View All Data" profile permission would grant access to all data in the organization, which is too broad and may violate data security.

### NEW QUESTION # 27

Universal Container is a global Telco that has recently implemented enterprise territory management to better align their sales teams and sales processes. They are in Q4 of the FY and they have completely revamped their territory structure and created a plan for a

new structure that would support the new FY. Their current territory model has 8k territories. Their new model would be a new set of 8,5K territories, and their org limit is 10k.

What enterprise territory management feature can US take advantage of in order to help them stay within their org limits?

- A. Territory Hierarchy
- **B. Territory Model State**
- C. Territory type priority
- D. Territory Type

**Answer: B**

Explanation:

Explanation

Territory Model State is the feature that can help UC stay within their org limits. It allows them to create multiple territory models and activate only one at a time. The inactive models do not count towards the org limit

### NEW QUESTION # 28

Universal containers (UC) service reps are assigned to a profile which has View All in Case object (Private OWD). To make sure service reps have access to all relevant information to attend to customer requests, Which two details should leasable force Architects consider? Choose 2 answers:

- **A. Service reps will not be able to access all the UC Account records because Account OWD is private.**
- B. Service rep swill be able to access all the UC Account records due to Implicit Sharing.
- C. Service reps will not be able to access all UC contact records if they are controlled by parent.
- D. Service reps will be able to access all UC contact records if they are controlled by parent.

**Answer: A**
