ASIS PSP Practice Exams & Valid PSP Exam Fee

Our ASIS PSP practice exam software will record all the attempts you have made in the past and display any modifications or improvements made in each attempt. This ASIS Physical Security Professional Exam (PSP) exam simulation software enables you to track your progress and quantify how much you have improved.

ASIS Physical Security Professional Exam Sample Questions (Q111-Q116):

NEW QUESTION # 111
What method would be the best way to determine the most likely as-built critical path of a project that is underway, and the schedule of which has been partially progressed?

- A. Use the progressed portion of the critical path of all the updates previous to the current update.
- B. Use the forward-looking critical path of the most current updates.
- C. Use the progressed portion of the critical path of the baseline schedule.
- D. Interview the project personnel for their perceptions and opinions because the schedule is usually inadequate.

Answer: A

Explanation:
Understanding As-Built Critical Path Analysis:
* Determining the as-built critical path of a project involves identifying the sequence of activities that actually dictated the completion of the project. This is especially important in projects that are underway, as schedules often deviate from the original baseline due to progress updates and unplanned changes.
* Explanation of Each Option:
* A. Use the progressed portion of the critical path of all the updates previous to the current update:
This is correct. To determine the most likely as-built critical path, analyzing the progressed portion of the critical path from all previous updates provides the most accurate representation of the project's actual execution. By reviewing the progression over time, you can piece together the actual sequence of critical activities.
* B. Use the progressed portion of the critical path of the baseline schedule:This is incorrect. The baseline schedule reflects the original plan, which may no longer be accurate due to progress deviations, delays, or changes in logic. Using the baseline alone does not account for the dynamic nature of the project.
* C. Interview the project personnel for their perceptions and opinions because the schedule is usually inadequate:This is incorrect. While project personnel may provide insights, relying solely on subjective opinions introduces biases and inconsistencies. A properly maintained and updated schedule is far more reliable for determining the critical path.
* D. Use the forward-looking critical path of the most current updates:This is incorrect. The forward- looking critical path only reflects what is expected to happen from the current point onward. It does not provide an accurate representation of the as-built critical path up to the current point.
Study Guide References:
* The PSP Study Guide emphasizes the importance of analyzing progress updates to trace the actual sequence of critical activities. Section 2.3.2 (Tracking Schedule Progress) discusses the role of historical updates in understanding project performance.
* The guide also highlights that a proper as-built analysis requires a review of all updates to identify shifts in the critical path over time.

NEW QUESTION # 112
_____ of risk involves planning for an eventual loss without benefit of insurance.

- A. Transfer
- B. Planning
- C. locking
- D. Self-assumption

Answer: D

NEW QUESTION # 113
Which of the following is NOT true?

- A. Multiple calendars can affect the total float calculation.
- B. Constraints can interfere with the longest path calculation.
- C. A network must contain only one Critical Path.

- D. Remaining durations can exceed original durations.

Answer: D

NEW QUESTION # 114

Which of these letters, symbols or words best approximates the graphical shape of a project's cumulative BCWS?

- A. Bell curve
- B. /
- C. _
- D. S

Answer: C

Explanation:
Shape of Cumulative BCWS:
* The Budgeted Cost of Work Scheduled (BCWS) reflects a cumulative expenditure curve over time, typically shaped like an "S".
Explanation of the S-Curve:
* Initially slow expenditure, acceleration during peak work, and tapering off near completion.
Verification with PSP Guidelines:
The PSP Study Guide discusses BCWS as part of earned value management (Ref: PSP Study Guide, Chapter 1D: Earned Value Analysis).

NEW QUESTION # 115

Using the "normal" schedule, if you start Activity 7001 on April 1, 2002, and using a 5-day workweek, what the finish date for Activity 7001?

- A. 06-04-02.
- B. 06-11-02.
- C. 06-05-02.
- D. 06-18-02.

Answer: C

Explanation:
* Start Date: April 1, 2002.
* Duration of Activity 7001 (Normal Schedule): 48 days.
* Workweek: 5-day workweek (Monday to Friday).
* No holidays are mentioned in the problem.
Given Data
Step 1: Calculate Total Working DaysUsing a 5-day workweek:
* Determine the number of full weeks in 48 days:$48 \div 5 = 9$ weeks with 3 additional workdays.$48 \div 5 = 9$
\, \text{weeks with 3 additional workdays.}$48 \div 5 = 9$weeks with 3 additional workdays.
* Total work period = 9 weeks + 3 workdays = 45 weekdays.
* Starting from April 1, 2002 (Monday):
* Add 9 full weeks: April 1 + 9 weeks = May 31, 2002 (Friday).
* Add the remaining 3 workdays:
* Monday, June 3.
* Tuesday, June 4.
* Wednesday, June 5, 2002.
Step 2: Calculate Calendar End Date
Step 3: Validate AnswerThe finish date for Activity 7001 is June 5, 2002.

NEW QUESTION # 116

......

ASIS PSP Exam is very popular in IT field. Having PSP certificate is the best for those people who want to be promoted and is also

a valid selection. And with the aid of PSP certification test, you can improve your skills and master some useful techniques in your job so that you can finish your work better and demonstrate your great ability before other people. Only in this way can you get more development opportunities.
