

# New DP-700 Test Braindumps - DP-700 Latest Exam Papers

DOWNLOAD the newest Pass4Leader DP-700 PDF dumps from Cloud Storage for free: <https://drive.google.com/open?id=1ncLsGKEeVGpTCxGIP6yoxflyFSIk6ck>

The study system of our company will provide all customers with the best study materials. If you buy the DP-700 latest questions of our company, you will have the right to enjoy all the DP-700 certification training dumps from our company. More importantly, there are a lot of experts in our company; the first duty of these experts is to update the study system of our company day and night for all customers. By updating the study system of the DP-700 training materials, we can guarantee that our company can provide the newest information about the exam for all people. We believe that getting the newest information about the exam will help all customers pass the DP-700 Exam easily. If you purchase our study materials, you will have the opportunity to get the newest information about the DP-700 exam. More importantly, the updating system of our company is free for all customers. It means that you can enjoy the updating system of our company for free.

## Microsoft DP-700 Exam Syllabus Topics:

| Topic   | Details   |
|---------|---|
| Topic 1 | <ul style="list-style-type: none"><li>Monitor and optimize an analytics solution: This section of the exam measures the skills of Data Analysts in monitoring various components of analytics solutions in Microsoft Fabric. It focuses on tracking data ingestion, transformation processes, and semantic model refreshes while configuring alerts for error resolution. One skill to be measured is identifying performance bottlenecks in analytics workflows.</li></ul> |
| Topic 2 | <ul style="list-style-type: none"><li>Ingest and transform data: This section of the exam measures the skills of Data Engineers that cover designing and implementing data loading patterns. It emphasizes preparing data for loading into dimensional models, handling batch and streaming data ingestion, and transforming data using various methods. A skill to be measured is applying appropriate transformation techniques to ensure data quality.</li></ul>         |
|         |   |

|         |   |
|---------|---|
| Topic 3 | <ul style="list-style-type: none"> <li>• Implement and manage an analytics solution: This section of the exam measures the skills of Microsoft Data Analysts regarding configuring various workspace settings in Microsoft Fabric. It focuses on setting up Microsoft Fabric workspaces, including Spark and domain workspace configurations, as well as implementing lifecycle management and version control. One skill to be measured is creating deployment pipelines for analytics solutions.</li> </ul> |

## Will Microsoft DP-700 Practice Questions help You to Pass the certification exam?

Pass4Leader is a trusted platform that has been helping Implementing Data Engineering Solutions Using Microsoft Fabric DP-700 candidates for many years. Over this long time period, countless candidates have passed their Implementing Data Engineering Solutions Using Microsoft Fabric DP-700 Exam and they all got help from Implementing Data Engineering Solutions Using Microsoft Fabric practice questions and easily pass the final exam.

## Microsoft Implementing Data Engineering Solutions Using Microsoft Fabric Sample Questions (Q19-Q24):

### NEW QUESTION # 19

You have a Fabric workspace that contains a warehouse named Warehouse1. Warehouse1 contains a table named Customer. Customer contains the following data.

☐ You have an internal Microsoft Entra user named User1 that has an email address of user1@contoso.com

You need to provide User1 with access to the Customer table. The solution must prevent User1 from accessing the CreditCard column.

How should you complete the statement? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

☐

**Answer:**

Explanation:

☐

### NEW QUESTION # 20

You have a Fabric workspace named Workspace1 that contains a data pipeline named Pipeline1 and a lakehouse named Lakehouse1.

You have a deployment pipeline named deployPipeline1 that deploys Workspace1 to Workspace2.

You restructure Workspace1 by adding a folder named Folder1 and moving Pipeline1 to Folder1.

You use deployPipeline1 to deploy Workspace1 to Workspace2.

What occurs to Workspace2?

- A. Folder1 is created, Pipeline1 moves to Folder1, and Lakehouse1 is deployed.
- B. Only Folder1 is created and Pipeline1 moves to Folder1.
- C. Folder1 is created, and Pipeline1 and Lakehouse1 move to Folder1.
- D. Only Pipeline1 and Lakehouse1 are deployed.

**Answer: A**

Explanation:

When you restructure Workspace1 by adding a new folder (Folder1) and moving Pipeline1 into it, deployPipeline1 will deploy the entire structure of Workspace1 to Workspace2, preserving the changes made in Workspace1. This includes:

Folder1 will be created in Workspace2, mirroring the structure in Workspace1.

Pipeline1 will be moved into Folder1 in Workspace2, maintaining the same folder structure.

Lakehouse1 will be deployed to Workspace2 as it exists in Workspace1.

### NEW QUESTION # 21

#### HOTSPOT

You have a Fabric workspace.

You are debugging a statement and discover the following issues:

Sometimes, the statement fails to return all the expected rows.

The PurchaseDate output column is NOT in the expected format of mmm dd, yy.

You need to resolve the issues. The solution must ensure that the data types of the results are retained. The results can contain blank cells.

How should you complete the statement? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

☐

**Answer:**

Explanation:

☐

Explanation:

☐

### NEW QUESTION # 22

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a Fabric eventstream that loads data into a table named Bike\_Location in a KQL database. The table contains the following columns:

BikepointID

Street

Neighbourhood

No\_Bikes

No\_Empty\_Docks

Timestamp

You need to apply transformation and filter logic to prepare the data for consumption. The solution must return data for a neighbourhood named Sands End when No\_Bikes is at least 15. The results must be ordered by No\_Bikes in ascending order.

Solution: You use the following code segment:

☐

Does this meet the goal?

- A. Yes
- B. no

**Answer: A**

Explanation:

Filter Condition: It correctly filters rows where Neighbourhood is "Sands End" and No\_Bikes is greater than or equal to 15.

Sorting: The sorting is explicitly done by No\_Bikes in ascending order using sort by No\_Bikes asc.

Projection: It projects the required columns (BikepointID, Street, Neighbourhood, No\_Bikes, No\_Empty\_Docks, Timestamp), which minimizes the data returned for consumption.

### NEW QUESTION # 23

You plan to process the following three datasets by using Fabric:

\* Dataset1: This dataset will be added to Fabric and will have a unique primary key between the source and the destination. The unique primary key will be an integer and will start from 1 and have an increment of 1.

\* Dataset2: This dataset contains semi-structured data that uses bulk data transfer. The dataset must be handled in one process between the source and the destination. The data transformation process will include the use of custom visuals to understand and work with the dataset in development mode.

\* Dataset3. This dataset is in a takehouse. The data will be bulk loaded. The data transformation process will include row-based windowing functions during the loading process.

You need to identify which type of item to use for the datasets. The solution must minimize development effort and use built-in functionality, when possible. What should you identify for each dataset? To answer, select the appropriate options in the answer area.
