

# NCP-NS Valid Exam Book, NCP-NS Latest Dumps

Our NCP-NS test guide is test-oriented, which makes the preparation become highly efficient. Once you purchase our NCP-NS exam material, your time and energy will reach a maximum utilization. Thus at that time, you would not need to be afraid of the society and peer pressure with NCP-NS Certification. In conclusion, a career enables you to live a fuller and safer life. So if you want to take an upper hand and get a well-pleasing career our NCP-NS learning question would be your best friend.

## Nutanix NCP-NS Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> <li>• Troubleshoot Flow Virtual Networking: Covers diagnosing and resolving connectivity failures, BGP issues, gateway health problems, and interpreting alerts and logs related to virtual networking components.</li> </ul>
Topic 2	<ul style="list-style-type: none"> <li>• Deploy and Upgrade a Flow Environment: Covers preparing clusters for Flow Network Security and Virtual Networking, managing upgrade paths and dependencies, configuring virtual switches and MTU, and administering user roles and RBAC permissions.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>• Troubleshoot Flow Network Security: Covers identifying policy-related traffic issues, analyzing security hit logs and audit logs, and troubleshooting identity based policy failures tied to Active Directory group mapping.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>• Configure Flow Virtual Networking: Covers creating and managing VPCs, overlay networks, external connectivity options, BGP peering, load balancing, and policy based routing within Nutanix Flow Virtual Networking.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>• Configure Flow Network Security: Covers analyzing application traffic flows, creating and configuring isolation, application, and identity based security policies, and managing policy lifecycle modes in Flow Network Security.</li> </ul>

## TOP NCP-NS Valid Exam Book 100% Pass | Latest Nutanix Certified Professional Network & Security v6.10 Latest Dumps Pass for sure

Up to now we classify our NCP-NS exam questions as three different versions. They are pdf, software and the most convenient one APP online. Though the content of these three versions is the same, but their displays are different. Each of them has their respective feature and advantage including new information that you need to know to pass the NCP-NS test. So you can choose the version of NCP-NS training quiz according to your personal preference.

### Nutanix Certified Professional Network & Security v6.10 Sample Questions (Q17-Q22):

#### NEW QUESTION # 17

An administrator is deploying a multi-tier application on a Nutanix AHV cluster. The Web tier needs to be accessible from the internet, the App tier must communicate only with the Web tier and the Database tier, and the Database tier should accept traffic only from the App tier.

The administrator must determine the correct configuration to ensure secure, reliable connectivity for the Web tier while maintaining isolation from the Internet for the App and Database tiers.

Which connectivity option should the administrator implement to meet the requirements?

- A. Assign direct external IPs to all VMs in the VPC.
- B. Connect all tiers directly to the external network with no NAT.
- C. Assign Floating IP assignments to Web tier only.
- D. Use overlay networks for the Web tier to provide internet access.

**Answer: C**

#### NEW QUESTION # 18

An administrator must delegate management of a single tenant VPC to a junior engineer. The engineer should be able to modify that VPC but must not see or change any other VPCs or networking configurations in Prism Central.

The administrator wants to meet this requirement using RBAC.

Which action should the administrator take to meet this requirement?

- A. Assign a Custom Role cloned from Network Infrastructure Admin and restrict its scope to the desired VP
- B. Assign a Custom Role cloned from VPC Admin and restrict its scope to the desired VPC.
- C. Assign the Network Infrastructure Admin role and restrict its scope to the desired VPC.
- D. Assign the VPC Admin role and restrict its scope to the desired VPC.

**Answer: D**

#### NEW QUESTION # 19

While configuring third-party services (Service Insertion) in Flow Network Security Next-Gen, an administrator notices dropped packets when redirecting traffic through a network function.

Which configuration change would address this issue?

- A. Increase the MTU by an additional 58 bytes for the Geneve header.
- B. Reduce the MTU size to 1400 to match Geneve encapsulation.
- C. Keep the default MTU at 1500. Encapsulation is handled automatically.
- D. Disable Geneve tunneling on the virtual switch.

**Answer: A**

#### NEW QUESTION # 20

A newly-deployed Flow Virtual Networking VPC environment is experiencing connectivity issues... A packet capture on the physical switch shows packets are being fragmented.

What is the probable cause of the packet fragmentation and performance issues?
