## AD0-E724 Valid Test Voucher & AD0-E724 Practice Test Engine

We have compiled the AD0-E724 test guide for these candidates who are trouble in this exam, in order help they pass it easily, and we deeply believe that our AD0-E724 exam questions can help you solve your problem. Believe it or not, if you buy our study materials and take it seriously consideration, we can promise that you will easily get the certification that you have always dreamed of. We believe that you will never regret to buy and practice our AD0-E724 latest question as the high pass rate of our AD0-E724 exam questions is 99% to 100%.

## Adobe Commerce Developer Professional Sample Questions (Q11-Q16):

### NEW QUESTION # 11

A developer has informed the Adobe Support team about a planned traffic surge on an Adobe Commerce Cloud project that will take place in a little over 48 hours.

What is an advantage of this prior notice?

- A. When the traffic arrives, extra server resources will be available.
- B. The project will temporarily use an upgraded Fastly plan
- C. The Support team will monitor the website during that time

**Answer: C**

Explanation:

Informing the Adobe Support team about a planned traffic surge allows them to monitor the website during that time. With prior notice, the support team can ensure that they are prepared to quickly respond to any issues that arise due to the surge. While extra

server resources or an upgraded Fastly plan may be possible outcomes, the primary advantage of advance notice is proactive monitoring and support during expected high traffic events.

### NEW QUESTION # 12

Which hashing algorithm will Adobe Commerce choose to hash customer passwords?

- A. It does not matter if the Sodium extension is installed or not, the Magento hashing default algorithm will be SHA256.
- **B. If the Sodium extension is installed, Argon 2ID13 will be chosen, otherwise SHA256 will be used as the Magento default hashing algorithm.**
- C. If the Sodium extension is installed, SHA256 will be chosen, otherwise MD5 will be used as the Magento default hashing algorithm.

**Answer: B**

Explanation:

If the Sodium extension is installed, Argon 2ID13 will be chosen as the Magento default hashing algorithm.

Otherwise, SHA256 will be used.

The Sodium extension is a PHP extension that provides cryptographic functions. Argon 2ID13 is a password hashing algorithm that is considered to be more secure than SHA256.

If the Sodium extension is installed, Magento will use Argon 2ID13 as the default hashing algorithm for customer passwords. If the Sodium extension is not installed, Magento will use SHA256 as the default hashing algorithm.

Adobe Commerce uses secure hashing algorithms for customer passwords. As of the more recent updates, Adobe Commerce defaults to using the Argon2ID13 hashing algorithm, provided that the Sodium PHP extension is available. Argon2ID is considered a secure and modern hashing algorithm designed to protect against brute-force attacks.

If the Sodium extension is not available, Adobe Commerce falls back to using SHA256, which, while secure, is not as robust as Argon2ID13.

This functionality ensures that customer data is safeguarded with the highest level of security available based on the server configuration.

\* Adobe Commerce Developer Guide: Hashing Algorithms

\* PHP Documentation: Argon2 and Sodium

### NEW QUESTION # 13

Which Magento project directory is the recommended webroot for the web server?

- A. app/
- **B. Pub/**
- C. bin/

**Answer: B**

Explanation:

The Pub/ directory is the recommended webroot for the web server in Magento. This is because it contains all of the static content that is used by the Magento store, such as images, CSS, and JavaScript files.

The recommended webroot for the web server in a Magento project is thepub/directory. This directory is used to access Magento static files and is the safer option for webroot as it minimizes security risks by not exposing the entire application structure to the web.

Thepub/directory in Magento is designed to be the root directory for web servers. This design choice is intended to enhance security and efficiency by serving static files directly from this location, thereby reducing the need for PHP processing for these files. By setting the webroot topub/, it ensures that only the necessary files are publicly accessible, protecting the application's core code and structure from external access. This setup is a recommended best practice in Magento development for maintaining a secure and well-organized file system structure.

### NEW QUESTION # 14

A product has been added to the Adobe Commerce Store, and it contains a value for the custom product attribute. A merchant reports that the attribute value is not displayed in the Additional Information tab on the product detail page.

Which action will correct this problem?

- A. The attribute property "Visible on Catalog Pages on Storefront" must be set to "yes".
- B. The attribute property "Use in Product Tab" must be set to "yes"
- C. The attribute must be moved to the specific group in the attribute set

**Answer: A**

Explanation:

The "Visible on Catalog Pages on Storefront" attribute property determines whether or not the attribute value is displayed in the Additional Information tab on the product detail page. If this property is set to "no", the attribute value will not be displayed.

For a custom product attribute to be displayed in the Additional Information tab on the product detail page in Magento, it needs to be visible on the catalog pages on the storefront. This visibility is controlled by the attribute property "Visible on Catalog Pages on Storefront". When this property is set to "yes", Magento includes the attribute in the Additional Information tab, making it visible to customers browsing the product.

This setting ensures that only relevant and intended attributes are shown on the storefront, allowing for better product information management and customer experience.

### NEW QUESTION # 15

How would a developer enable the magnification of CSS files on an Adobe Commerce Cloud Staging environment?

- A. SSH to the Adobe Commerce Staging environment. From the command line

```
ece-tools config:set dev/css/minify_files 1
bin/magento setup:static-content:deploy
```

- B. Locally from the command line  
bin/magento config:set --lock-config dev/css/minify\_files 1  
Commit the app/etc/config.php file and redeploy.
- C. Update the stores > setting > configuration > Advanced > Developer > css configuration in the Admin Panel.

**Answer: A**

Explanation:

For Adobe Commerce Cloud environments, modifying configuration settings often involves using the ece- tools command-line interface. To enable CSS minification on a staging environment, SSH into the environment and use ece-tools to set the configuration.

\* Using ece-tools for Cloud Environments:

\* The ece-tools command sets environment configurations, which is preferable in Cloud environments as changes are made outside of the database, allowing for consistent configuration across deployments.

\* Why Option C is Correct:

\* SSH access to the environment and using ece-tools ensures that settings are deployed properly.

Option A involves committing app/etc/config.php, which is not directly related to Adobe Commerce Cloud's best practices. Option B involves the Admin panel, which is less practical for deployment consistency.

\* Steps:

\* After setting the configuration, run bin/magento setup:static-content:deploy to apply the changes.

### NEW QUESTION # 16

.....

Are you still worried about the exam? Don't worry! Our AD0-E724 exam torrent can help you overcome this stumbling block during your working or learning process. Under the instruction of our AD0-E724 test prep, you are able to finish your task in a very short time and pass the exam without mistakes to obtain the AD0-E724 certificate. We will tailor services to different individuals and help them take part in their aimed exams after only 20-30 hours practice and training. Moreover, we have experts to update AD0-E724 quiz torrent in terms of theories and contents on a daily basis.

**AD0-E724 Valid Test Voucher:** <https://www.pdf.dumps.com/AD0-E724-valid-exam.html>

Our AD0-E724 study materials are devoted to research on which methods are used to enable users to pass the test faster, Adobe AD0-E724 Book Pdf This exam tests a candidate's knowledge and skills related to network fundamentals, LAN switching technologies, IPv4 and IPv6 routing technologies, WAN technologies, infrastructure services, infrastructure security, and infrastructure management, Whether you have just graduated from college, making a career change, already working in the sector, or searching for new ways to progress, the Adobe AD0-E724 certification is ideal for you.
