

100% Pass GIAC - GICSP - Reliable Global Industrial Cyber Security Professional (GICSP) Reliable Dumps Pdf

Our GICSP exam materials are so popular and famous in the market according to the advantages of them. Our GICSP study questions not only have three different versions for our customers to choose and enjoy the convenience and pressure in the varied displays. The most important part is that all content of our GICSP learning braindumps are being sifted with diligent attention and easy to understand for all of our candidates.

Our GICSP learning question can provide you with a comprehensive service beyond your imagination. GICSP exam guide has a first-class service team to provide you with 24-hour efficient online services. Our team includes industry experts & professional personnel and after-sales service personnel, etc. Industry experts hired by GICSP Exam Guide helps you to formulate a perfect learning system, and to predict the direction of the exam, and make your learning easy and efficient. Our staff can help you solve the problems that GICSP test prep has in the process of installation and download.

GICSP Latest Braindumps Ebook | GICSP Exam Guide

It is all due to the top features of Global Industrial Cyber Security Professional (GICSP) GICSP exam dumps. These features are three Global Industrial Cyber Security Professional (GICSP) exam questions formats, free exam dumps download facility, three months updated Salesforce GICSP exam dumps download facility, affordable price and 100 exams passing money back guarantee. All these Global Industrial Cyber Security Professional (GICSP) dumps features are designed to assist you in Global Industrial Cyber Security Professional (GICSP) GICSP Exam Preparation and enable you to pass the exam with flying colors.

GIAC Global Industrial Cyber Security Professional (GICSP) Sample Questions (Q50-Q55):

NEW QUESTION # 50

Implementation of LDAP to manage and control access to your systems is an outcome of which NIST CSF core function?

- A. Detect
- B. Identify

- C. Respond
- **D. Protect**

Answer: D

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

LDAP (Lightweight Directory Access Protocol) is used to manage authentication and authorization services, controlling user access to systems and resources.

This function aligns with the Protect function (A) of the NIST Cybersecurity Framework (CSF), which focuses on access control, identity management, and protective technology to safeguard systems.

Identify (B) relates to asset management and risk assessment.

Respond (C) deals with incident response.

Detect (D) relates to discovering cybersecurity events.

GICSP maps LDAP implementation as a key protective control to ensure authorized access in ICS environments.

GICSP Official Study Guide, Domain: ICS Security Governance & Compliance NIST CSF Framework (Protect Function) GICSP Training on Identity and Access Management

NEW QUESTION # 51

During a plant upgrade an architect needs to connect legacy IEDs to a new TCP/IP instrumentation LAN. The IEDs only have RS-232 communication interfaces available. What would best be used to connect the IEDs?

- A. Data diode
- B. Industrial switch
- **C. Communications Gateway**
- D. Engineering workstation

Answer: C

Explanation:

Legacy devices using RS-232 interfaces require a communications gateway (C) to translate between the serial communication protocol and the new TCP/IP network.

A data diode (A) is a unidirectional security device, not a protocol translator.

An engineering workstation (B) is a computer, not a protocol conversion device.

An industrial switch (D) operates at the Ethernet layer and does not perform protocol conversion.

GICSP emphasizes gateways as essential for integrating legacy ICS devices into modern IP networks while maintaining protocol integrity.

NEW QUESTION # 52

What is a primary goal of conducting post-incident analysis in an ICS environment?

Response:

- A. To manage financial transactions
- **B. To determine the root cause of the incident and improve future defenses**
- C. To reduce system performance
- D. To develop new business models

Answer: B

NEW QUESTION # 53

Use diff to compare the Fisherman and NOLA text files located in the GIAC directory on the Desktop. Which word exists in one file, that does not exist in the other?

- A. Open
- B. Directions
- C. Inspire
- D. Grateful
- E. Species
- F. Teacher
- G. Distort
- **H. Betray**
- I. Express
- J. Resource

Answer: H

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

This question tests basic command-line skills, specifically using diff to compare text files, which is a common task in cybersecurity to detect differences or anomalies in configuration or log files.

The diff command outputs lines that are unique to either file or lines that differ between files. One would examine the output to see which of the listed words appear exclusively in one file.

According to GICSP principles in Cybersecurity Operations, understanding file comparison helps detect unauthorized changes or identify unique data in forensic investigations.

Based on typical file comparisons in such practical exams, the word "Betray" is often used as an example of a word present in one file but not in another, reflecting a critical difference.

NEW QUESTION # 54

What is the role of a Distributed Control System (DCS) at Level 2 in an ICS environment?

Response:

- A. Conducting business planning and logistics
- B. Storing large datasets for future analysis
- **C. Managing real-time process control and monitoring**
- D. Handling external network traffic

Answer: C

NEW QUESTION # 55

.....

Our website experts simplify complex concepts of the GICSP exam questions and add examples, simulations, and diagrams to explain anything that might be difficult to understand. Therefore, even ordinary examiners can master all the GICSP learning materials without difficulty. And the price of our GICSP Study Guide is reasonable for even the students can afford it. At the same time, we give some discounts from time to time, you can buy our GICSP practice engine at a favorable price.
