With iPassleader real questions and answers, when you take the exam, you can handle it with ease and get high marks.

## Apple DEP-2025 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>Software Updates: This section of the exam measures the skills of an MDM Specialist and covers update management strategies using MDM. It includes handling deadlines, updating behavior, and ensuring that updates are properly delivered and installed.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>Device Configuration: This section of the exam measures the skills of an IT Administrator and covers declarative configuration properties and how they relate to the device enrollment type. It ensures that configurations align with organizational needs.</li></ul>

Topic 3	<ul style="list-style-type: none"> <li>Device Support: This section of the exam measures the skills of an IT Administrator and covers troubleshooting Mac startup, recovery, and password reset processes using macOS Recovery. It ensures support professionals can maintain and restore device functionality.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>Device Setup: This section of the exam measures the skills of an MDM Specialist and covers strategies and use cases for managing Setup Assistant via MDM. It also covers the configuration of enrollment-related settings and pane options.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>Device Enrollment: This section of the exam measures the skills of an MDM Specialist and covers the three main enrollment methods for Apple devices, their core concepts, and their properties. It prepares candidates to make appropriate choices based on organizational needs.</li> </ul>
Topic 6	<ul style="list-style-type: none"> <li>Network Integration: This section of the exam measures the skills of an IT Administrator and covers assessing network responsiveness and device connectivity. It also covers wireless auto-join behavior on Apple devices and ensures strong network coverage.</li> </ul>
Topic 7	<ul style="list-style-type: none"> <li>Apple Business Manager and Apple School Manager: This section of the exam measures the skills of an MDM Specialist and covers managing connections to resellers and managing device suppliers. It emphasizes the use of Apple Business Manager or School Manager to streamline large-scale deployments.</li> </ul>
Topic 8	<ul style="list-style-type: none"> <li>Manage Content and Data Flow: This section of the exam measures the skills of an IT Administrator and covers app distribution methods including managed, custom, and proprietary apps. It focuses on content purchasing and delivery through Apple Business or School Manager.</li> </ul>
Topic 9	<ul style="list-style-type: none"> <li>Prepare Your Environment: This section of the exam measures the skills of an IT Administrator and covers the important factors involved in evaluating and preparing the environment for a successful MDM implementation. It emphasizes strategic planning before rollout.</li> </ul>
Topic 10	<ul style="list-style-type: none"> <li>Device Security: This section of the exam measures the skills of an MDM Specialist and covers encryption on Apple platforms, FileVault operations, and the importance of key management. It focuses on protecting sensitive data on managed devices.</li> </ul>
Topic 11	<ul style="list-style-type: none"> <li>Plan a Deployment: This section of the exam measures the skills of an MDM Specialist and covers the purpose and function of Apple's built-in MDM framework. It evaluates the foundational understanding needed to support the deployment of Apple devices at scale using MDM protocols and tools.</li> </ul>

## DEP-2025 Valid Test Pattern & iPassleader - Leader in Certification Exam Materials & Apple Apple Deployment and Management Exam

We cannot predicate the future but we can live in the moment. There are many meaningful things waiting for us to do. Try to immerse yourself in new experience. Once you get the DEP-2025 certificate, your life will change greatly. First of all, you will grow into a comprehensive talent under the guidance of our DEP-2025 Exam Materials, which is very popular in the job market. And you will get better jobs for your DEP-2025 certification as well.

### Apple Deployment and Management Exam Sample Questions (Q43-Q48):

#### NEW QUESTION # 43

Which role in Apple Business Manager can purchase apps and assign devices?

- A. Device Enrollment Manager
- B. Content Manager
- C. People Manager
- D. Administrator

**Answer: D**

**Explanation:**

In Apple Business Manager (ABM), the Administrator role has broad permissions, including purchasing apps and assigning devices to MDM servers. The Content Manager (option B) can manage and distribute content (e.g., apps, books) but cannot purchase apps or assign devices. The Device Enrollment Manager (option C) focuses on enrolling and assigning devices but lacks purchasing authority. The People Manager (option D) manages user accounts, not apps or devices. The Apple Business Manager User Guide outlines the Administrator's comprehensive responsibilities, making it the correct choice.

**NEW QUESTION # 44**

What's required to use Lost Mode on a device?

- A. A passcode
- B. Find My enabled
- C. iCloud enabled
- D. An MDM solution

**Answer: D**

**Explanation:**

Lost Mode is an MDM feature that allows administrators to lock a supervised device remotely, display a custom message, and track its location (if enabled). It requires an MDM solution to issue the command via APNs, and the device must be supervised. Find My (option B) enables user-initiated Lost Mode but isn't required for MDM's version. iCloud (option C) isn't a prerequisite, though it's often enabled. A passcode (option D) enhances security but isn't required to activate Lost Mode. The MDM Protocol Reference confirms MDM's role in Lost Mode for supervised devices.

**NEW QUESTION # 45**

What's the benefit of supervising a device?

- A. Enables additional restrictions
- B. Separates personal and managed data
- C. Allows personalization
- D. Simplifies enrollment

**Answer: A**

**Explanation:**

Supervising a device, typically done via Apple Configurator or ADE, enables additional restrictions and management capabilities not available on unsupervised devices. Examples include blocking app installation, enforcing single-app mode, or preventing profile removal, enhancing organizational control. Personalization (option A) is more aligned with unsupervised or User Enrollment devices. Data separation (option C) is a User Enrollment feature, not supervision. Simplified enrollment (option D) is a byproduct of ADE, not supervision's primary benefit. The Apple Platform Deployment Guide highlights supervision's enhanced control features. Reference: Apple Platform Deployment Guide (Chapter: Supervision).

**NEW QUESTION # 46**

Which feature in macOS allows IT administrators to manage software updates?

- A. Terminal
- B. System Preferences
- C. Apple Configurator
- D. MDM

**Answer: D**

**Explanation:**

Mobile Device Management (MDM) solutions provide IT administrators with the ability to manage software updates on macOS devices remotely. Through MDM, administrators can defer updates, enforce specific versions, or schedule installations, ensuring compliance and security across an organization's fleet. Apple Configurator (option A) is primarily for iOS/iPadOS/tvOS devices, not macOS update management. System Preferences (option C) allows individual users to manage updates locally, not administrators remotely.

Terminal (option D) can script updates but lacks the centralized control of MDM. The MDM Protocol Reference details MDM's software update management capabilities for macOS.

Reference: MDM Protocol Reference (Section: Software Update Management).

## NEW QUESTION # 47

What can you do with Apple Configurator for Mac?

- A. Buy apps and books.
- B. Enable Managed Lost Mode.
- C. Push profile updates over the air.
- D. Use Shortcuts automations.

Answer: D

Explanation:

Apple Configurator for Mac is a utility designed to supervise, restore, and configure iOS, iPadOS, and tvOS devices. Apple Learning highlights a newer feature: the ability to use Shortcuts automations with Configurator. This means administrators can script repeatable tasks - for example, restoring a device, applying enrollment settings, and erasing it - without manually repeating steps. Over-the-air profile updates are handled by MDM, not Configurator. Purchasing apps and books is managed through Apple Business Manager, not Configurator. Managed Lost Mode is an MDM feature, not part of Configurator. Shortcuts integration makes Configurator more powerful in high-volume environments, letting IT staff automate otherwise time-intensive preparation workflows, especially in education or labs. This reinforces Apple's commitment to automation and efficiency in deployment.
