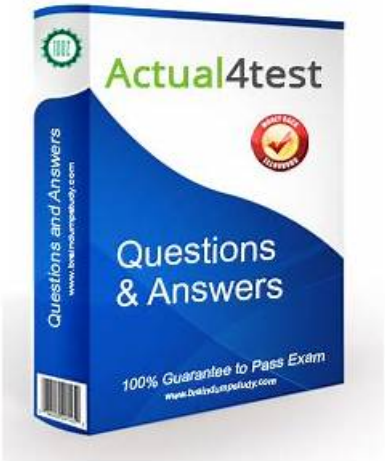
C-BW4H-2505 Official Practice Test, Exam Dumps C-BW4H-2505 Zip



BTW, DOWNLOAD part of PrepAwayExam C-BW4H-2505 dumps from Cloud Storage: https://drive.google.com/open?id=1HLSsHC6GSEzZI01g-lsVmDNDyXv0YfU7

Our C-BW4H-2505 dumps pdf vce is absolutely the right and valid study material for candidates who desired to pass the C-BW4H-2505 actual test. Now, please go and free download our C-BW4H-2505 practice demo first. The questions & answers of C-BW4H-2505 free demo are parts of the complete exam dumps, which can give you some reference to assess the valuable of the C-BW4H-2505 Training Material. In addition, there is one year time for the access of the updated C-BW4H-2505 practice dumps after purcahse. You will get C-BW4H-2505 latest study pdf all the time for preparation.

SAP C-BW4H-2505 Exam Syllabus Topics:

Topic	Details
Topic 1	• Native SAP HANA Modeling:This section evaluates the ability of SAP Consultants to describe and apply native modeling options in SAP HANA. It emphasizes understanding how to build optimized data structures directly within the HANA platform.
Topic 2	• Fundamentals: This section of the exam measures the foundational understanding of SAP Consultants and covers essential terms and concepts related to SAP BW • 4HANA and SAP Business Data Cloud. It focuses on the core framework and architecture necessary to navigate and work with these platforms.

Topic 3	• SAP BW • 4HANA Data Flow: This section of the exam measures the practical ability of SAP Consultants to load data within the SAP BW • 4HANA environment. It assesses familiarity with data movement and transformation processes across different layers of the system.
Topic 4	• Data Acquisition into SAP BW • 4HANA: This section tests how Data Engineers manage data integration into SAP BW • 4HANA from multiple sources. It covers essential knowledge of tools and processes used for data extraction, transformation, and loading into the SAP environment.
Topic 5	• SAP BW Query Design: This section of the exam assesses the ability of Data Engineers to create and run queries using SAP BW • 4HANA. It evaluates how well candidates can work with query components to retrieve and structure data effectively for reporting and analysis.
Topic 6	• SAP Analytics Tools and SAP Analytics Cloud: This section evaluates the skills of SAP Consultants in using tools like SAP Analytics Cloud, Lumira, and Analysis for Office to visualize and interpret data. It focuses on the consultant's ability to apply business intelligence tools within the SAP ecosystem.
Topic 7	• InfoObjects and InfoProviders:This section tests the knowledge of Data Engineers in working with InfoObjects and InfoProviders in SAP BW • 4HANA. It involves handling data structures used for organizing, storing, and accessing analytical data.
Topic 8	• Data Acquisition into SAP HANA: This section evaluates the capacity of SAP Consultants to integrate various data sources into SAP HANA. It assesses their ability to understand different ingestion techniques and ensure data accessibility for processing.

Exam Dumps C-BW4H-2505 Zip & C-BW4H-2505 Latest Exam Online

Selecting the right method will save your time and money. If you are preparing for C-BW4H-2505 exam with worries, maybe the professional exam software provided by IT experts from PrepAwayExam will be your best choice. Our PrepAwayExam aims at helping you successfully Pass C-BW4H-2505 Exam. If you are unlucky to fail C-BW4H-2505 exam, we will give you a full refund of the cost you purchased our dump to make up part of your loss. Please trust us, and wish you good luck to pass C-BW4H-2505 exam.

SAP Certified Associate - Data Engineer - SAP BW/4HANA Sample Questions (Q59-Q64):

NEW QUESTION # 59
You create an SAP HANA HDI Calculation View.What are some of the reasons to choose the data category Cube with Star Join instead of data category Dimension? Note: There are 3 correctanswers to this question.

- A. You can combine master data transactional data.
- B. You can create restricted columns.
- C. You can aggregate measures as a sum.
- D. You can persist transactional data.
- E. You can provide default time characteristics.

Answer: A,C,D

NEW QUESTION # 60
Which source types are available to create a generic DataSource in SAP ERP? Note: There are 3 correct answers to this question.

- A. ABAP class method
- B. SAP query
- C. ABAP managed database procedure
- D. Database view
- E. ABAP function module

Answer: A,B,E

Explanation:
InSAP ERP, aGeneric DataSourceis used to extract data from various source types and make it available for consumption in SAP BW/4HANA or other systems. The source type defines the origin of the data and how it is extracted. Below is an explanation of the correct answers and why they are valid.
* A. ABAP class method
* AnABAP class methodcan be used as a source type for a Generic DataSource. This approach allows developers to encapsulate complex logic within an ABAP class and expose the data extraction logic through a specific method.
* The method is called during the data extraction process, and its output is used as the data source.
This is particularly useful for scenarios where custom logic or calculations are required to prepare the data.
1: SAP provides support for ABAP class methods as part of its Generic DataSource framework, enabling flexible and reusable data extraction.
B). SAP query
AnSAP querycan also serve as a source type for a Generic DataSource. SAP queries are predefined reports created using the SAP Query tool, which allows users to extract data from logical databases or user-defined views.
By leveraging SAP queries, non-technical users can create data sources without requiring extensive programming knowledge. The query output is then used as the basis for the Generic DataSource.
Reference: SAP Query is a widely used tool in SAP ERP for creating ad-hoc reports and data extracts, making it a convenient option for Generic DataSources.
D). ABAP function module
AnABAP function moduleis one of the most common source types for Generic DataSources. Function modules are reusable ABAP routines that encapsulate specific business logic or data extraction processes.
During the extraction process, the function module is executed, and its output is passed to the Generic DataSource. This approach is highly flexible and supports complex data transformations and filtering.
Reference: SAP BW/4HANA extensively uses ABAP function modules for data extraction, as they provide a robust and scalable way to retrieve data from SAP ERP systems.
Incorrect Options:C. ABAP managed database procedure
ABAP Managed Database Procedures (AMDPs)are used to execute database-specific logic directly on the database layer. While AMDPs are powerful for performance optimization, they are not supported as a source type for Generic DataSources.
Generic DataSources rely on higher-level ABAP constructs like function modules or class methods rather than low-level database procedures.
Reference: AMDPs are primarily used for advanced SQLScript-based processing and are not integrated into the Generic DataSource framework.
E). Database view
Whiledatabase viewsare commonly used to structure and organize data in SAP ERP, they cannot be directly used as a source type for Generic DataSources. Instead, database views are typically accessed indirectly through ABAP function modules or class methods.
Reference: SAP recommends using higher-level ABAP constructs (e.g., function modules) to encapsulate the logic for accessing database views, ensuring better flexibility and maintainability.
Conclusion:The correct answers areA. ABAP class method,B. SAP query, andD. ABAP function module, as these are the supported source types for creating Generic DataSources in SAP ERP. These options provide flexibility, reusability, and ease of use for extracting data from SAP ERP systems.

NEW QUESTION # 61
Which objects values can be affected by the key date in a BW query? Note: There are 3 correct answers to this question.

- A. Time characteristics
- B. Hierarchies
- C. Display attributes
- D. Navigation attributes
- E. Basic key figures

Answer: A,B,C

NEW QUESTION # 62
You defined a condition in a BW query for the top 10 of 100 customers based on sales revenuUsing key figure properties in the BW query which two scenarios regarding result presentation can be achieved? Note:
There are 2 correctanswers to this question.

- A. One result row with the sales revenue sum of the top 10 customers
- B. One result row with the sales revenue sum of the top 10 customers a second result row with the sales revenue sum of all 100 customers
- C. One result row with the sales revenue sum of all 100 customers
- D. One result row with the sales revenue sum of the top 10 customers a second result row with the sales revenue sum of the other 90 customers

Answer: C,D

NEW QUESTION # 63
What does a CompositeProvicer allow you to do in SAP BW/4HANA?Note: There are 3 correctanswers to this question.

- A. Create new calculated fields
- B. Integrate SAP HANA calculation views
- C. Define new restricted key figures
- D. Join two ABAP CDS views
- E. Combine InfoProviders using Joins and Unions

Answer: A,C,E

NEW QUESTION # 64
.....

Our C-BW4H-2505 study materials are designed by many experts in the field of qualification examination, from the user's point of view, combined with the actual situation of users, designed the most practical learning materials, so as to help customers save their valuable time. Whether you are a student or a working family, we believe that no one will spend all their time preparing for C-BW4H-2505 Exam, whether you are studying professional knowledge, doing housework, looking after children, and so on, everyone has their own life, all of which have to occupy your time to review the exam.
