

# Quiz 2026 Cisco 300-620: Marvelous Implementing Cisco Application Centric Infrastructure Exam Discount

P.S. Free & New 300-620 dumps are available on Google Drive shared by ActualVCE: [https://drive.google.com/open?id=1HrmABJ62O\\_RuEf6KKvVzDGs3qKcXZAjl](https://drive.google.com/open?id=1HrmABJ62O_RuEf6KKvVzDGs3qKcXZAjl)

Before we decide to develop the 300-620 preparation questions, we have make a careful and through investigation to the customers. We have taken all your requirements into account. Firstly, the revision process is long if you prepare by yourself. If you collect the keypoints of the 300-620 exam one by one, it will be a long time to work on them. Secondly, the accuracy of the 300-620 Exam Questions And Answers is hard to master. Because the content of the exam is changing from time to time. But our 300-620 practice guide can help you solve all of these problems.

Implementing Cisco Application Centric Infrastructure Practice exams of ActualVCE i.e. desktop software and web-based are customizable and you can attempt them for multiple times. These practice exam save progress report of each attempt so you can assess it to find and overcome mistakes. As mentioned earlier, these Implementing Cisco Application Centric Infrastructure (300-620) practice exams can be customized according to your requirements. You can change their time and numbers of Implementing Cisco Application Centric Infrastructure (300-620) dumps questions as you want.

## ActualVCE Dumps Save Your Money with Up to one year of Free Updates

For the candidates, getting access to the latest Cisco 300-620 practice test material takes a lot of work. The study materials for the 300-620 test preparation are spread throughout a number of websites and the majority of them aren't updated. However, the applicants only have a short time to prepare for the Cisco 300-620 Exam. They want a platform that offers the latest and real 300-620 exam questions so they can get prepared within a few days.

To pass the Cisco 300-620 Exam, candidates must demonstrate their knowledge and skills in various areas related to ACI, including fabric infrastructure, network policies, virtualization, and automation. 300-620 exam consists of 60-70 questions and lasts for 90 minutes. Candidates who successfully pass the exam will earn the Cisco Certified Specialist - ACI Implementation certification, which validates their skills in implementing and managing ACI.

## Cisco Implementing Cisco Application Centric Infrastructure Sample Questions (Q205-Q210):

### NEW QUESTION # 205

When does the Cisco ACI leaf learn a source IP or MAC as a remote endpoint?

- A. When VXLAN traffic arrives on a leaf fabric port from the spine and inner source IP is in the Layer 3 Out EPG subnet range.
- **B. When VXLAN traffic arrives on a leaf fabric port from the spine and inner source IP is in the bridge domain subnets range.**
- C. When VXLAN traffic arrives on a leaf fabric port from the spine and outer source IP is in the Layer 3 Out EPG subnet range.
- D. When VXLAN traffic arrives on a leaf fabric port from the spine and outer source IP is in the bridge domain subnets range.

**Answer: B**

Explanation:

In Cisco ACI, a leaf switch learns a source IP or MAC as a remote endpoint when VXLAN traffic arrives on a leaf fabric port from the spine, and the inner source IP is within the range of the bridge domain subnets associated with the leaf. This process is part of the ACI's COOP (Council Of Oracles Protocol), which ensures that endpoint information is accurately disseminated across the fabric for efficient traffic forwarding.

### NEW QUESTION # 206

Refer to the exhibit.

□ Refer to the exhibit. The external subnet and internal EPG1 must communicate with each other, and the L3Out traffic must leak into the VRF named "VF1". Which configuration set accomplishes these goals?

- **A. External Subnets for External EPG  
Shared Route Control Subnet  
Shared Security Import Subnet**
- B. Export Route Control Subnet  
Shared Security Import Subnet  
Aggregate Shared Routes
- C. Export Route Control Subnet  
Import Route Control Subnet  
Aggregate Shared Routes
- D. External Subnets for External EPG  
Import Route Control Subnet  
Shared Route Control Subnet

**Answer: A**

Explanation:

To enable communication between the external subnet and internal EPG1, and to allow L3Out traffic to leak into the VRF named "VF1", the following configuration set should be used:

External Subnets for External EPG: This configuration defines the subnets that are external to the ACI fabric but need to be reachable from within the fabric. It is necessary to specify which subnets are to be considered part of the L3Out1.

Shared Route Control Subnet: This setting allows the subnets to be shared across different VRFs, enabling communication between EPGs that are in different tenants but within the same VRF1.

Shared Security Import Subnet: This configuration ensures that the security policies (contracts) associated with the shared subnets are also imported, allowing for the necessary traffic to flow between the internal and external endpoints1.

By applying this configuration set, the external subnet and internal EPG1 will be able to communicate, and the L3Out traffic will be properly leaked into the designated VRF, meeting the specified goals.

ACI Inter VRF/Tenant Route Leaking Configuration Example1

### NEW QUESTION # 207

Refer to the exhibit.

□

Which Adjacency Type value should be set when the client endpoint and the service node interface are in a different subnet?

- A. L3Out
- B. Unicast
- C. Routed
- **D. L3**

**Answer: D**

#### NEW QUESTION # 208

What do Pods use to allow Pod-to-Pod communication in a Cisco ACI Multi-Pod environment?

- A. over Layer 3 Out connectivity via border leafs
- B. over Layer 3 IPN connectivity via border leafs
- **C. over Layer 3 IPN connectivity via spines**
- D. over Layer 3 directly connected back-to-back spines

**Answer: C**

Explanation:

Section: ACI Anywhere

#### NEW QUESTION # 209

Refer to the exhibit. An administrator configures inter-VRF route leaking between Production:vrf-prod and Non-Production:vrf-nonprod. However, the route in the Non-Production:vrf-nonprod VRF to the production tenant is missing. Which action resolves the VRF route leaking issue?

- A. Change the contract scope to Global.
- **B. Enable the Shared between VRFs option for the BD subnet in the production VRF.**
- C. Enable the Shared between VRFs option for the EPG subnet in the non-production VRF.
- D. Export the contract from provider to consumer tenant.

**Answer: B**

#### NEW QUESTION # 210

.....

If you buy the 300-620 study materials of us, we ensure you to pass the exam. Since the 300-620 study materials have the quality and the accuracy, and it will help you pass exam just one time. Buying 300-620 exam dumps are pass guaranteed and money back guaranteed for the failure. Furthermore, we choose international confirmation third party for payment for the 300-620 Exam Dumps, therefore we can ensure you the safety of your account and your money. The refund money will return to your payment account.
