You can change the difficulty of these questions, which will help you determine what areas appertain to more study before taking your Microsoft SC-401 Exam Dumps. Here we listed some of the most important benefits you can get from using our Microsoft SC-401 practice questions.

Microsoft SC-401 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Implement Information Protection: This section measures the skills of Information Security Analysts in classifying and protecting data. It covers identifying and managing sensitive information, creating and applying sensitivity labels, and implementing protection for Windows, file shares, and Exchange. Candidates must also configure document fingerprinting, trainable classifiers, and encryption strategies using Microsoft Purview.
Topic 2	<ul style="list-style-type: none">• Implement Data Loss Prevention and Retention: This section evaluates Data Protection Officers on designing and managing data loss prevention (DLP) policies and retention strategies. It includes setting policies for data security, configuring Endpoint DLP, and managing retention labels and policies. Candidates must understand adaptive scopes, policy precedence, and data recovery within Microsoft 365.

Topic 3	<ul style="list-style-type: none"> • Manage Risks, Alerts, and Activities: This section assesses Security Operations Analysts on insider risk management, monitoring alerts, and investigating security activities. It covers configuring risk policies, handling forensic evidence, and responding to alerts using Microsoft Purview and Defender tools. Candidates must also analyze audit logs and manage security workflows.
Topic 4	<ul style="list-style-type: none"> • Protect Data Used by AI Services: This section evaluates AI Governance Specialists on securing data in AI-driven environments. It includes implementing controls for Microsoft Purview, configuring Data Security Posture Management (DSPM) for AI, and monitoring AI-related security risks to ensure compliance and protection.

SC-401 Latest Test Cram, Cost Effective SC-401 Dumps

In order to serve you better, we have a complete service system for you if you purchasing SC-401 learning materials. We offer you free demo to have a try before buying, so that you can have a better understanding of what you are going to buy. After your payment for SC-401 exam dumps, you can receive your downloading link and password within ten minutes, if you don't receive, you can contact with us, and we will solve it for you. You can enjoy free update for 365 days after buying SC-401 Exam Dumps, and the update version will be sent to your email automatically. If you have any questions about SC-401 exam dumps after buying, you can contact with our after-sale service.

Microsoft Administering Information Security in Microsoft 365 Sample Questions (Q127-Q132):

NEW QUESTION # 127

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You implement Microsoft 365 Endpoint data loss prevention (Endpoint DLP).

You have computers that run Windows 11 and have Microsoft 365 Apps installed. The computers are joined to a Microsoft Entra tenant.

You need to ensure that Endpoint DLP policies can protect content on the computers.

Solution: You onboard the computers to Microsoft Defender for Endpoint.

Does this meet the goal?

- A. Yes
- B. No

Answer: A

NEW QUESTION # 128

You have a Microsoft 365 E5 subscription that contains the data loss prevention (DLP) policies shown in the following table.

You have a custom employee information form named Template1.docx.

You plan to create a sensitive info type named Sensitive1 that will use the document fingerprint from Template1.docx.

What should you use to create Sensitive1, and in which DLP policies can you use Sensitive1? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

Step 1 - Requirement

You want to create a custom sensitive info type named Sensitive1.

This SIT will be created from a document fingerprint of Template1.docx.

You then want to use Sensitive1 in DLP policies.

Step 2 - Where do you create custom Sensitive Info Types?

Custom SITs (including document fingerprinting) can only be created in the Microsoft Purview compliance portal.

They cannot be created in the Exchange admin center, SharePoint admin center, or directly in PowerShell.

Answer for creation: The Microsoft Purview portal

Reference: Create a custom sensitive information type with document fingerprinting Step 3 - Where can custom Sensitive Info Types be used?

Once created, custom SITs are tenant-wide and can be used across all workloads that support DLP:

Exchange email

SharePoint Online sites

OneDrive

Teams chat and channel messages

In the table, the DLP policies are:

DLP1 # Exchange Online email

DLP2 # SharePoint Online sites

DLP3 # Teams chat and channel messages

Since Sensitive1 is a custom SIT, it can be used in all three policies.

Answer for usage: DLP1, DLP2, and DLP3

NEW QUESTION # 129

You have a Microsoft 365 E5 subscription that uses Microsoft Purview.

You create a communication compliance policy named Policy1 and select Detect Microsoft Copilot interactions.

Which two trainable classifiers will be added to Policy1 automatically? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Threat
- B. Corporate Sabotage
- C. Unauthorized disclosure
- D. Protected Materials
- E. Prompt Shields

Answer: D,E

NEW QUESTION # 130

You have a Microsoft 365 E5 subscription that contains a trainable classifier named Trainable1.

You plan to create the items shown in the following table.

Which items can use Trainable 1?

- A. Label2, Policy1, and DLP1 only
- B. Label1 and Policy1 only
- C. Label2 only
- D. Label1 and Label2 only
- E. Label1, Label2, Policy1, and DLP1

Answer: A

Explanation:

A trainable classifier in Microsoft Purview is used to automatically identify and classify unstructured data based on content patterns.

The classifier can be used in:

1. Retention Labels (Label2) # Supported

Trainable classifiers can be linked to retention labels to automatically classify and apply retention policies to documents.

2. Retention Label Policies (Policy1) # Supported

Retention label policies define how and where retention labels are applied, including automatically using trainable classifiers.

3. Data Loss Prevention (DLP) Policies (DLP1) # Supported

Trainable classifiers can be used in DLP policies to detect and protect sensitive content automatically.
