Take the right decision regarding your quick Administer, Extend, and Automate Salesforce (ADX-211) exam questions preparation and download the real, valid, and updated Salesforce ADX-211 exam dumps and start this journey.

Salesforce Administer, Extend, and Automate Salesforce Sample Questions (Q118-Q123):

NEW QUESTION # 118

An administrator need a business process automated, but only for certain user and profiles. The administrator will need to frequently update which users and profiles will use the process. After evaluating the declarative options, it was determined that this functionality must be done via an Apex trigger.

What software requirement should the administrator request so that process execution can be declaratively controlled?

- A. Use a custom permission set that is assigned to the user.
- B. Use a System permission that is assigned to the user or profile.

- C. Use Process Automation Setting in Setup to the appropriate users or profiles.
- D. Use Apex Class Access to assign the Apex code to the user or profile.

Answer: A

NEW QUESTION # 119

Cloud Kicks (CK) does business directly with individual consumers (B2C) and large businesses (B2B). Some of CK's B2C customers are employed at its larger customer accounts and should be tracked under both.

Which two options will CK need to use to manage its customers' accounts?

Choose 2 answers

- A. Contacts to Multiple Accounts
- B. Person Accounts
- C. Leads
- D. Campaign Members

Answer: A,B

NEW QUESTION # 120

An administrator created a new custom object. When trying to upload new records to the custom object using Date Loader, they are unable to see the new custom object in the list of available objects.

What should the administrator do to resolve the issue?

- A. Check the Field-Level Security of the new custom object's Name field.
- B. Assign a permission set to give them access to the new object.
- C. Ensure Allow Sharing is checked on the custom object.
- D. Confirm the object is marked as deployed and not in development.

Answer: D

Explanation:

When creating a new custom object, administrators can choose to mark it as deployed or in development. If an object is marked as in development, it is not visible to users or available in tools such as Data Loader, even if they have access to it through their profile or permission set. To make the object available for data import, the administrator needs to mark it as deployed. Reference:

NEW QUESTION # 121

AW Computers has enabled the feature for Contact to multiple Accounts. A rep is trying to remove the primary Account from a Contact but is unable to do so. The administrator has already updated the page layout to no longer require an Account.

What could be the issue?

- A. A primary Account relationship is required on a Contact regardless of the page layout settings.
- B. The Contact has indirect relationships to other Accounts.
- C. The Account Contact relationship record needs to be deleted first in order to disassociate the Contact from the Account.
- D. Private Contacts need to be enabled in Setup.

Answer: A

Explanation:

A primary account relationship is a feature that allows you to link a contact to a single account as its primary account. A primary account relationship is required on a contact regardless of the page layout settings or the contact to multiple accounts feature. This means that you cannot remove the primary account from a contact, but you can change it to another account. You can also add secondary accounts to a contact if you have enabled the contact to multiple accounts feature. Reference:

https://help.salesforce.com/s/articleView?id=sf.contacts_multiple_accounts.htm&type=5 https://help.salesforce.com/s/articleView?id=sf.contacts_fields.htm&type=5

NEW QUESTION # 122

Universal Containers has three different profiles for the support desk. The VP of Support requests permission to only reassign profiles for support desk users.
How should this access be granted?

- A. The administrator profile.
- **B. Delegated administration access to the three profiles.**
- C. A permission set with the manage users permission.
- D. The manage users permission to the profile.

Answer: B
