Apple Deployment and Management Exam Sample Questions (Q122-Q127):

NEW QUESTION # 122
What must a user have to be able to upgrade macOS on their iMac?

- A. An MDM bootstrap token
- B. Volume ownership
- C. Local administrator rights
- D. A Managed Apple Account

Answer: B

Explanation:
Upgrading macOS requires volume ownership, tied to an admin account with permissions to modify the system volume. The macOS Deployment Reference states, "To install or upgrade macOS, the user must have volume ownership, which allows the system to authenticate the operation against the secure volume." Option B is for MDM updates, C is insufficient alone in newer macOS versions, and D is for content, not upgrades.
References:
macOS Deployment Reference, "Software Updates" section.
Apple Platform Security Guide, "System Volume Protections" section.

NEW QUESTION # 123
What's the benefit of using Apple Business Manager?

- A. Allows personalization
- B. Improves network performance
- C. Enables device and content management
- D. Separates personal and managed data

Answer: C

Explanation:
Apple Business Manager (ABM) enables device and content management by providing a portal to enroll devices via ADE, purchase and distribute apps/books through Managed Distribution, and manage user accounts. This centralizes organizational control over Apple deployments. Personalization (option A) is user- driven, not an ABM benefit. Network performance (option C) is enhanced by content caching, not ABM. Data separation (option D) is a User Enrollment feature. The Apple Business Manager User Guide highlights device and content management as ABM's core benefit.
Reference: Apple Business Manager User Guide (Section: Overview).

NEW QUESTION # 124
What's the benefit of using content caching?

- A. Simplifies enrollment
- B. Improves network performance
- C. Separates personal and managed data
- D. Enhances device security

Answer: B

Explanation:
Content caching on a Mac improves network performance by storing frequently accessed content (e.g., app updates, iCloud data) locally, reducing internet bandwidth usage and speeding up downloads for connected devices. It doesn't enhance security (option

A), separate data (option C, a User Enrollment feature), or simplify enrollment (option D, an ADE benefit). The Apple Platform Deployment Guide emphasizes bandwidth optimization as the primary benefit of content caching.
Reference: Apple Platform Deployment Guide (Chapter: Content Caching).

NEW QUESTION # 125

Which feature allows IT administrators to manage notifications settings on a device?

- A. Find My
- B. MDM
- C. iCloud
- D. Configuration profiles

Answer: D

Explanation:
Configuration profiles allow IT administrators to manage notification settings on a device, such as disabling notifications for specific apps, configuring Do Not Disturb, or restricting Notification Center access. These profiles are deployed via MDM or manually. Find My (option B) and iCloud (option C) are unrelated to notification management. MDM (option D) delivers profiles, but the profiles contain the settings. The Apple Platform Deployment Guide details notification control via profiles.
Reference: Apple Platform Deployment Guide (Chapter: Configuration Profiles).

NEW QUESTION # 126

Which two of these can MDM optionally provide with the EraseDevice command when you use the Return to Service workflow?

- A. Wi-Fi payload
- B. Enrollment profile
- C. Preserve supervision status
- D. Location Services
- E. Register data plan

Answer: A,B

Explanation:
The Return to Service workflow is designed to redeploy iPhones and iPads with minimal IT interaction. Apple Learning details that when sending the EraseDevice command, MDM can optionally attach a Wi-Fi payload and the enrollment profile. The Wi-Fi payload ensures the freshly erased device automatically reconnects to the network during Setup Assistant, enabling seamless MDM re-enrollment. The enrollment profile ensures the device knows which MDM server to connect to. Apple specifies that supervision status is retained automatically for supervised devices; it is not an optional payload. Data plans and Location Services are unrelated to the Return to Service workflow. These options allow organizations to quickly cycle devices for redeployment, particularly in education and enterprise shared-use environments.
References: Apple Platform Deployment - "Return to Service workflow with EraseDevice."

NEW QUESTION # 127

......

By these three versions of DEP-2025 practice materials we have many repeat orders in a long run. The PDF version helps you read content easier at your process of studying with clear arrangement, and the PC Test Engine version of DEP-2025 practice materials allows you to take stimulation exam to check your process of exam preparing, which support windows system only. Moreover, there is the APP version of DEP-2025 practice materials, you can learn anywhere at any time with it at your cellphones without the limits of installation.
