The sooner you make up your mind, the more efficient you will win.

Microsoft Identity and Access Administrator Sample Questions (Q142-Q147):

NEW QUESTION # 142

Your company has a Microsoft 365 tenant.

The company has a call center that contains 300 users. In the call center, the users share desktop computers and might use a different computer every day. The call center computers are NOT configured for biometric identification.

The users are prohibited from having a mobile phone in the call center.

You need to require multi-factor authentication (MFA) for the call center users when they access Microsoft 365 services.

What should you include in the solution?

- A. Windows Hello for Business authentication
- **B. FIDO2 tokens**
- C. a named network location
- D. the Microsoft Authenticator app

Answer: B

Explanation:

FIDO2 security device (biometrics, PIN, and NFC)

User can access device based on organization controls and authenticate based on PIN, biometrics using devices such as USB security keys and NFC-enabled smartcards, keys, or wearables.

NEW QUESTION # 143

You have an Azure AD tenant that contains the users shown in the following table.

Name	
User1	Security administrator
User2	Privileged authentication administrator
User3	Service support administrator

User2 reports that he can only configure multi-factor authenticating (MFA) to use the Microsoft Authenticator app.

You need to ensure that User2 can configure alternate MFA methods.

Which configuration is required, and which user should perform the configuration? To answer, select the appropriate options in the answer area.

Answer Area

Configuration:

User:

NEW QUESTION # 144

You have a Microsoft 365 tenant.

You need to identify users who have leaked credentials. The solution must meet the following requirements.

- * Identify sign-ins by users who are suspected of having leaked credentials.
- * Flag the sign-ins as a high risk event.
- * Immediately enforce a control to mitigate the risk, while still allowing the user to access applications.

What should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

The screenshot shows three dropdown menus in the Microsoft Entra ID console. The first menu, 'To classify leaked credentials as high-risk, use:', has four options: 'Azure Active Directory (Azure AD) Identity Protection', 'Azure Active Directory (Azure AD) Privileged Identity Management (PIM)', 'Identity Governance', and 'Self-service password reset (SSPR)'. The second menu, 'To trigger remediation, use:', has five options: 'Client apps not using Modern authentication', 'Device state', 'Sign-in risk', 'User location', and 'User risk'. The third menu, 'To mitigate the risk, select:', has four options: 'Apply app enforced restrictions', 'Block access', 'Grant access but require app protection policy', and 'Grant access but require password change'.

Answer:

Explanation:

This screenshot is identical to the one above but includes green highlights to indicate the correct selections. In the first dropdown, 'Azure Active Directory (Azure AD) Identity Protection' is highlighted. In the second dropdown, 'Client apps not using Modern authentication' and 'User risk' are highlighted. In the third dropdown, 'Grant access but require password change' is highlighted.

Explanation:

This screenshot is another instance of the same interface, showing the correct selections highlighted in green: 'Azure Active Directory (Azure AD) Identity Protection' for classification, 'Client apps not using Modern authentication' and 'User risk' for remediation, and 'Grant access but require password change' for mitigation.

NEW QUESTION # 145

You have a Microsoft Entra tenant named contoso.com that contains an administrative unit named AU1 and two users named User1 and User2. User1 is a member of AU1.

You need to perform the following role assignments:

* User1: Security Administrator

* User2: User Administrator

For which scopes can each user be assigned the role? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

The image shows two dropdown menus for role assignments. The first menu is for 'User1' and the second is for 'User2'. Both menus have the Microsoft logo on the left. The 'User1' menu is open, showing four options: 'AU1 and contoso.com', 'AU1 only', 'contoso.com only', and 'AU1 and contoso.com'. The 'AU1 and contoso.com' option is selected and highlighted in blue. The 'User2' menu is also open, showing the same four options, with 'AU1 and contoso.com' selected and highlighted in blue.

Answer:

Explanation:

The image shows a screenshot of the 'Answer Area' with the Microsoft logo. It contains two dropdown menus for 'User1' and 'User2'. Both menus are open, showing the same four options: 'AU1 and contoso.com', 'AU1 only', 'contoso.com only', and 'AU1 and contoso.com'. The 'AU1 and contoso.com' option is selected and highlighted in blue in both menus.

Explanation:

Answer Area

The image shows a screenshot of the 'Answer Area' with the Microsoft logo. It contains two dropdown menus for 'User1' and 'User2'. Both menus are closed, showing the selected option 'AU1 and contoso.com'.

NEW QUESTION # 146

You have an Azure Active Directory (Azure AD) tenant that contains the following group:

Name: Group1

Members: User1, User2

Owner: User3

On January 15, 2021, you create an access review as shown in the exhibit. (Click the Exhibit tab.)

Create an access review Microsoft

Access reviews allow reviewers to attest to whether users still need to be in a role.
