NEW QUESTION # 49
You need to design a Power Platform solution that meets the following requirements:
Capture data from a row during deletion to be used in an automated process.
Use AI to process forms and automate data entry from paper-based forms.
Which requirements can be met by using out-of-the box Power Platform components?
Instructions: For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:
Box 1: Yes
This can be done with Dataverse flows: The When a row is added, modified or deleted trigger runs a flow whenever a row of a selected table and scope changes or is created.
Box 2: Yes
AI Builder is a Microsoft Power Platform capability that provides AI models that are designed to optimize your business processes. AI Builder enables your business to use AI to automate processes and glean insights from your data in Power Apps and Power Automate.

NEW QUESTION # 51
You are reviewing a list of business requirements submitted by a plumbing company.
The company has the following requirements:
Send articles to technicians to allow technicians to help customers resolve issues.
Track work progress and inspections at customer sites.
Schedule technicians for service appointments.
You need to recommend solutions to meet the customer's requirements.
What should you recommend? To answer, drag the appropriate solutions to the correct business requirements.
Each solution may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation
Graphical user interface, application Description automatically generated
Box 1: Dynamics 365 Customer Insights
Dynamics 365 Customer Insights is a part of Microsoft's customer data platform (CDP) that helps deliver personalized customer experiences. The platform's capabilities provide insights into who your customers are and how they engage with your platform. Unify customer data across multiple sources to get a single view of customers.
Box 2: Dynamics 365 Field Service
Dynamics 365 Field Service helps to:
Organize and track resolution of customer issues
Keep customers updated with the status of their service call and when it's resolved
Note: The Dynamics 365 Field Service business application helps organizations deliver onsite service to customer locations. The application combines workflow automation, scheduling algorithms, and mobility to set up mobile workers for success when they're onsite with customers fixing issues.
The Field Service application enables you to:
Improve first-time fix rate
Complete more service calls per technician per week
Manage follow-up work and take advantage of upsell and cross sell opportunities Reduce travel time, mileage, and vehicle wear and tear Organize and track resolution of customer issues Communicate an accurate arrival time to customers Provide accurate account and equipment history to the field technician Keep customers updated with the status of their service call and when it's resolved Schedule onsite visits when it's convenient for the customer Avoid equipment downtime through preventative maintenance Box 3: Dynamics 365 Field Service Dynamics 365 Field Service: Schedule onsite visits when it's convenient for the customer.
