## SAP Certified Associate - Managing SAP S/4HANA Cloud Public Edition Projects Sample Questions (Q64-Q69):

### NEW QUESTION # 64

How is SAP's organizational change management framework connected with the SAP Activate methodology?

Note: There are 2 correct answers to this question.

- A. Some change management activities are executed in more than one SAP Activate phase.
- B. The SAP Activate phases build the dimensions of the organizational change management framework.
- C. Each change management dimension is assigned to a specific SAP Activate phase.
- D. The start of each change management activity is assigned to one specific SAP Activate phase.

**Answer: A,D**

Explanation:

SAP's Organizational Change Management (OCM) framework is tightly integrated with the SAP Activate methodology to ensure effective adoption of SAP S/4HANA Cloud Public Edition. The connection between OCM and SAP Activate is structured to align change management with project phases.

\* Option A: Each change management dimension is assigned to a specific SAP Activate phase.

Incorrect. OCM dimensions (e.g., strategy, leadership, realization) span multiple phases, not one specific phase. The SAP S/4HANA Cloud OCM Guidestates, "OCM dimensions are applied across the SAP Activate phases, not confined to a single phase."

\* Option B: The SAP Activate phases build the dimensions of the organizational change management framework. Incorrect. The

OCM dimensions are predefined and independent, not built by SAP Activate phases. The SAP Activate Methodology Guidenotes, "The OCM framework's dimensions are established to support SAP Activate, but the phases do not define the dimensions."

\* Option C: The start of each change management activity is assigned to one specific SAP Activate phase. Correct. Each OCM activity has a defined starting point within a specific SAP Activate phase, ensuring alignment with project milestones. The SAP S/4HANA Cloud OCM Guide explains, "Change management activities are mapped to specific SAP Activate phases, with clear starting points to ensure timely execution, such as stakeholder analysis in the Prepare phase."

\* Option D: Some change management activities are executed in more than one SAP Activate phase.

Correct. Activities like communication or training span multiple phases to sustain engagement. The SAP Activate Methodology Guide confirms, "Certain change management activities, such as stakeholder engagement and communication, are executed across multiple SAP Activate phases to maintain momentum and support adoption." Extract from Official Documentation:

\* SAP S/4HANA Cloud OCM Guide (SAP Help Portal, <https://help.sap.com>): "The OCM framework integrates with SAP Activate by assigning the start of each change management activity to a specific phase, while some activities, like communication, extend across multiple phases to ensure continuous engagement."

\* SAP Activate Methodology Guide (SAP Community, <https://community.sap.com>): "Change management activities are aligned with SAP Activate phases, with defined starting points for each activity and some activities spanning multiple phases to support sustained adoption." Additional Context:

The integration of OCM with SAP Activate ensures that change management is proactive and iterative, aligning with the agile nature of cloud implementations. This structured yet flexible approach maximizes user adoption and project success.

## NEW QUESTION # 65

You have assigned a business role to an end user who has been granted access to only one specific application. While you have a day off, it turns out that the app doesn't show up on the user's launchpad. What can the user do?

- A. Create a page and assign it to the launchpad space.
- B. Assign a launchpad space to the business role.
- **C. Use the search function to find the app.**
- D. Assign a different business role that provides access.

**Answer: C**

Explanation:

The SAP Fiori Launchpad is the primary interface for end users in SAP S/4HANA Cloud Public Edition, providing access to applications based on assigned business roles. If an application does not appear on the user's launchpad, the issue is often related to visibility or navigation rather than role assignment, especially since the user has already been granted access to the specific application.

\* Option A: Use the search function to find the app. Correct. The SAP Fiori Launchpad includes a search function that allows users to locate applications, even if they are not immediately visible on their launchpad. According to the SAP S/4HANA Cloud Public Edition User Guide (SAP Help Portal), "The search bar in the SAP Fiori Launchpad enables users to quickly find applications, tiles, or content by entering keywords, even if the application is not pinned to the user's homepage." This is a practical solution for end users to access their assigned applications without requiring administrative intervention.

\* Option B: Assign a launchpad space to the business role. Incorrect. Assigning a launchpad space to a business role is an administrative task typically performed by a system administrator, not an end user.

The SAP Fiori Launchpad Configuration Guide states, "Launchpad spaces are configured by administrators to organize applications for business roles." End users lack the permissions to perform this action.

\* Option C: Create a page and assign it to the launchpad space. Incorrect. Creating a page and assigning it to a launchpad space is also an administrative task. The SAP Fiori Launchpad Administration Guidenotes, "Pages within launchpad spaces are created and managed by administrators to customize the user experience." This is not something an end user can do.

\* Option D: Assign a different business role that provides access. Incorrect. Assigning a different business role requires administrative privileges, as outlined in the SAP S/4HANA Cloud Security Guide:

"Business role assignments are managed by administrators through the Maintain Business Roles app." The end user cannot perform this action, and it's unnecessary since the question confirms the user already has access to the application.

Extract from Official Documentation:

\* SAP Help Portal - SAP Fiori Launchpad User Guide (<https://help.sap.com>): "Users can utilize the search functionality in the SAP Fiori Launchpad to locate applications or content that may not be immediately visible on their personalized launchpad. This feature enhances user productivity by providing quick access to authorized applications."

\* SAP S/4HANA Cloud Implementation Guide: "The SAP Fiori Launchpad is designed to provide intuitive navigation, with a search bar that allows users to find applications assigned to their business roles without requiring additional configuration." Additional Context:

The issue described in the question likely stems from the application tile not being pinned to the user's launchpad or being part of a less visible launchpad space. The search function is the most accessible and user-friendly solution, aligning with SAP's focus on user empowerment in the Fiori Launchpad.

SAP Activate Methodology: Emphasizes user enablement and intuitive navigation in the Fiori Launchpad.

### NEW QUESTION # 66

Which of the following cloud services are available on SAP Business Technology Platform? Note: There are 3 correct answers to this question.

- A. SAP Integration Suite
- B. SAP Master Data Governance
- C. SAP HANA Cloud
- D. SAP Data Migration Cockpit
- E. SAP Cloud ALM

**Answer: A,C,E**

Explanation:

SAP Business Technology Platform (BTP) is a unified platform that provides a range of cloud services to support development, integration, and analytics for SAP S/4HANA Cloud Public Edition and other SAP solutions.

\* Option A: SAP Cloud ALM Correct. SAP Cloud ALM is available as a cloud service on SAP BTP, supporting application lifecycle management. The SAP Cloud ALM Documentation states, "SAP Cloud ALM is a cloud service hosted on SAP Business Technology Platform, providing project management, testing, and monitoring capabilities for SAP implementations."

\* Option B: SAP HANA Cloud Correct. SAP HANA Cloud is a core database and data management service on SAP BTP. The SAP BTP Documentation explains, "SAP HANA Cloud is a key service on SAP Business Technology Platform, offering scalable database and data management capabilities for cloud applications."

\* Option C: SAP Integration Suite Correct. SAP Integration Suite enables integration between SAP and non-SAP systems and is part of SAP BTP. The SAP Integration Suite Guide confirms, "SAP Integration Suite is a cloud service on SAP Business Technology Platform, providing tools for seamless integration across enterprise applications."

\* Option D: SAP Master Data Governance Incorrect. SAP Master Data Governance is a separate application, not a BTP service, though it can integrate with BTP. The SAP S/4HANA Cloud Study Guide notes, "SAP Master Data Governance is an application, not a native service on SAP BTP, though it leverages BTP for integration."

\* Option E: SAP Data Migration Cockpit Incorrect. The SAP Data Migration Cockpit is a tool within SAP S/4HANA, not a BTP service. The SAP S/4HANA Cloud Migration Guide clarifies, "The SAP Data Migration Cockpit is embedded in SAP S/4HANA Cloud, not a service on SAP Business Technology Platform." Extract from Official Documentation:

\* SAP BTP Documentation (SAP Help Portal, <https://help.sap.com>): "SAP Business Technology Platform hosts cloud services such as SAP Cloud ALM, SAP HANA Cloud, and SAP Integration Suite, enabling comprehensive support for SAP S/4HANA Cloud implementations."

\* SAP Cloud ALM Documentation (SAP Community, <https://community.sap.com>): "SAP Cloud ALM, SAP HANA Cloud, and SAP Integration Suite are key services on SAP BTP, providing lifecycle management, database, and integration capabilities for cloud solutions." Additional Context:

SAP BTP's services like SAP Cloud ALM, SAP HANA Cloud, and SAP Integration Suite are integral to extending and managing SAP S/4HANA Cloud Public Edition, offering a scalable platform for innovation and integration. These services enhance the cloud ecosystem, supporting the Intelligent Enterprise vision.
