If you have any questions about the AZ-400 Study Materials, do not hesitate and ask us in your anytime, we are glad to answer your questions and help you use our AZ-400 study materials well.

Microsoft Designing and Implementing Microsoft DevOps Solutions Sample Questions (Q394-Q399):

NEW QUESTION # 394

You have a project in Azure DevOps that contains a Continuous Integration/Continuous Deployment (CI/CD) pipeline. You need to enable detailed logging by defining a pipeline variable.

How should you configure the variable? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation

NEW QUESTION # 395

You plan to use Desired State Configuration (DSC) to maintain the configuration state of virtual machines that run Windows Server.

You need to perform the following:

* Install Internet Information Services (IIS) on the virtual machines.

* Update the default home page of the IIS web server.

How should you configure the DSC configuration file? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

See the answer in image

Box 1: Windows Feature

Example:

```
Configuration Website Test {
```

```
    # Import the module that contains the resources we're using.
```

```
    Import-Dsc Resource -Module Name Ps Desired State Configuration
```

```
    # The Node statement specifies which targets this configuration will be applied to.
```

```
    Node 'localhost' {
```

```
        # The first resource block ensures that the Web-Server (IIS) feature is enabled.
```

```
        Windows Feature Web Server {
```

```
            Ensure = "Present"
```

```
            Name = "Web-Server"
```

```
}
```

Box 2: File

Example continued:

```
        # The second resource block ensures that the website content copied to the website root folder.
```

```
        File Website Content {
```

```
            Ensure = 'Present'
```

```
            Source Path = 'c:\test\index.htm'
```

```
            Destination Path = 'c:\inetpub\wwwroot'
```

```
}
```

NEW QUESTION # 396

You have an application named App1 that has a custom domain of app.contoso.com.

You create a test in Azure Application Insights as shown in the following exhibit.

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

Box 1: every five minutes at a random location

Test frequency: Sets how often the test is run from each test location. With a default frequency of five minutes and five test locations, your site is tested on average every minute.

Box 2:

Parse dependent requests: Test requests images, scripts, style files, and other files that are part of the web page under test. The recorded response time includes the time taken to get these files. The test fails if any of these resources cannot be successfully downloaded within the timeout for the whole test.

NEW QUESTION # 397

You need to replace the existing DevOps tools to support the planned changes.

What should you use? To answer, drag the appropriate tools to the correct targets. Each tool may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation

A picture containing text Description automatically generated

Box 1: Azure Boards

Azure Boards can be used to track work with Kanban boards, backlogs, team dashboards, and custom reporting. You can create multiple Trello boards, which are spaces to store tasks (for different work contexts, or even private boards). You can easily share Trello boards with another person.

Box 2: Azure Pipelines

You can use Bamboo to implement CI/CD (Continuous Integration and Continuous Delivery) for a simple Azure function app using Atlassian Bamboo. Bamboo does continuous delivery of the project from source code to deployment. It has stages including Build, Test and Deploy.

Software teams in every industry are upgrading their continuous delivery pipeline with Bamboo. Easy build import from popular open source tools, user and group import from JIRA, seamless integration with Bitbucket, and native support for Git, Hg, and SVN means you'll be building and deploying like a champ.

Box 3: GitHub repositories

Bitbucket can be used as the Git repository, but you can use any other Git repository (Like TFS Git) for source control of the code.

NEW QUESTION # 398

You are configuring an Azure DevOps deployment pipeline. The deployed application will authenticate to a web service by using a secret stored in an Azure key vault.

You need to use the secret in the deployment pipeline.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Answer:
