We can promise that quality first, service upmost. If you buy the PL-200 learning dumps from our company, we are glad to provide you with the high quality PL-200 study question and the best service. The philosophy of our company is "quality is life, customer is god." We can promise that our company will provide all customers with the perfect quality guarantee system and sound management system. It is not necessary for you to have any worry about the quality and service of the PL-200 learning dumps from our company. We can make sure that our company will be responsible for all customers. If you decide to buy the PL-200 study question from our company, you will receive a lot beyond your imagination. So hurry to buy our products, it will not let you down.

**Microsoft Power Platform Functional Consultant Sample Questions (Q259-Q264):**

### NEW QUESTION # 259

You are examining several processes to determine if you can automate the processes by using Power Automate.

The processes must run without human intervention when possible.

You need to determine which flow type should be used for each process.

Which flow type should you use? To answer, drag the appropriate processes to the correct flow types. Each process may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

#### Answer:

Explanation:

□ Explanation

Text Description automatically generated

□ Box 1: Attended desktop flow

Desktop flows are used to automate tasks on the Web or the desktop.

To run an attended desktop flow, you need to have an active Windows user session that matches the name of the user configured for your connection.

Note: Web applications are critical components of most organizations, and they are commonly used to access data from servers.

Most CRM and ERP platforms run through web browsers, while the most popular business productivity tools are web services.

Web applications are unquestionably an integral part of the technological infrastructure of most companies.

To provide automation solutions for these applications, Power Automate Desktop supports all major browsers through its web automation actions.

Box 2: Unattended desktop flow.

Unattended desktop flows are best for applications that do not need human supervision.

### NEW QUESTION # 260

You are designing a canvas app that connects to Common Data Service.

You need to configure the app to meet the requirements and ensure that the canvas app is available offline.

What should you implement? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

#### Answer:

Explanation:

□ Explanation

### NEW QUESTION # 261

A company is configuring a Power Apps portal using Microsoft Dataverse.

The company requires the following:

\* Only authenticated users must be able to sign into the portal.

\* Authenticated users must have varying degrees of access to the different parts of the portal.

\* Users must enter one of several external identities when creating an account during the open registration process.

You need to configure user authentication and permissions.

Which component should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

#### Answer:

Explanation:

□ Explanation:

Box 1: Contact table record

In Power Apps portals, each authenticated portal user is associated with a contact record in Microsoft Dataverse.

## Box 2: Web roles

Portal users must be assigned to web roles to gain permissions beyond unauthenticated users.

### NEW QUESTION # 262

You have a business process flow.

You need to update the business process flow while minimizing administrative and maintenance efforts.

What should you implement? To answer, drag the appropriate features to the correct requirements. Each feature may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

**Answer:**

Explanation:

### NEW QUESTION # 263

You create a Power Automate flow as part of a managed solution. The flow alerts users when files are uploaded to a SharePoint location.

Files are uploaded to SharePoint at a much higher rate than expected. Users report that they receive too many notifications about uploaded files.

You need to stop the flow and correct the issue.

What should you do? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**Answer:**

Explanation:

Explanation

Graphical user interface, text, application Description automatically generated
