

Instant Construction-Manager Access | Construction-Manager Certification Dump

BTW, DOWNLOAD part of Test4Sure Construction-Manager dumps from Cloud Storage: <https://drive.google.com/open?id=1uJIsiucd1xOjZg-iazWEFc2Vml3z2Re8>

Our product is dedicated to providing a better understanding of the the Construction-Manager exa, through providing the stimulated environment of the Construction-Manager exam, it will benefit you while taking part in the exam. For your benefit, we also have money back gurantee if you fail to pass the exam. Once you have passed the Construction-Managereexam, it is directly linked to yur salary and the position of you in your copany. The certificate is also a stimulation of you, it proves that the ability of you is impoved,and it will offers you more opportunities in the future job market.

Our Construction-Manager free demo provides you with the free renewal in one year so that you can keep track of the latest points happening in the world. As the questions of exams of our Construction-Manager exam torrent are more or less involved with heated issues and customers who prepare for the exams must haven't enough time to keep trace of exams all day long, our Construction-Manager Practice Test can serve as a conducive tool for you make up for those hot points you have ignored. Therefore, you will have more confidence in passing the exam, which will certainly increase your rate to pass the Construction-Manager exam.

Construction-Manager Certification Dump - PDF Construction-Manager Cram Exam

In the mass job market, if you desire to be an outstanding person, an exam certificate is a necessity. Just as an old saying goes, "It's never too old to learn", so preparing for a Construction-Manager certification is becoming a common occurrence. Especially in the workplace of today, a variety of training materials and tools always makes you confused and spend much extra time to test its quality, which in turn wastes your time in learning. In fact, you can totally believe in our Construction-Manager Test Questions for us 100% guarantee you pass exam. If you unfortunately fail in the exam after using our Construction-Manager test questions, you will also get a full refund from our company by virtue of the proof certificate.

CMAA Certified Construction Manager (CCM) Sample Questions (Q49-

Q54):

NEW QUESTION # 49

As the owner's rep, a CM is providing on-site construction management services to a municipality for their new design-build city mall project.

The state requires a 40-hour value engineering workshop for all projects over \$10 million. What are the key talking points about the VE process that the CM will highlight to the city's director of public works?

- A. Scope reduction will reduce overall project budget.
- B. Interface with the design-build team is not needed at this time.
- **C. A multi-discipline review on functions and alternate solutions.**
- D. Life cycle and maintenance costs should not be considered.

Answer: C

Explanation:

Value Engineering (VE) is intended to improve value by optimizing the relationship between function, cost, and life-cycle performance. The CM would emphasize that VE is a multi-discipline review of project functions and alternate design solutions to reduce cost without sacrificing essential performance. In a proper VE workshop, participants from multiple disciplines review function, identify alternatives, and propose changes.

The incorrect choices are:

A is wrong because life cycle and maintenance costs should be considered - VE should look beyond initial cost to long-term costs.

C is simplistic: while scope reduction is one possible result, VE is not merely scope cutting but exploring alternatives to maintain functionality at lower cost.

D is incorrect, because interfacing with the design-build team is essential - VE must involve the DB team to ensure proposed changes are implementable and integrated.

NEW QUESTION # 50

At what stage of the design phase shall the CM conduct a constructability review?

- A. 30% design stage
- B. 90% design stage
- C. 60% design stage
- **D. Throughout the design process including 100% design documents**

Answer: D

Explanation:

According to the CMAA Construction Management Standards of Practice (SOP), constructability reviews are to be performed continuously throughout the design phase, rather than at a single fixed milestone. The SOP states:

"Constructability reviews should be conducted during all phases of design development - from conceptual design through completion of the 100 percent design documents - to ensure that the project can be built efficiently, safely, and economically." The CM's role is to provide feedback at each design milestone (conceptual, schematic, design development, and construction documents). Performing reviews only at one stage (e.g., 30%, 60%, or 90%) limits the CM's ability to identify and correct potential design or coordination issues early.

Therefore, the correct answer is C. Throughout the design process including 100% design documents.

"Constructability Review." CMAA CM Study Guide, Quality Management Domain, Objective 3.4: "Perform constructability reviews throughout design."

NEW QUESTION # 51

Which of the following addresses the administrative and reporting requirements for a Construction Manager during execution of a project?

- A. Project Administration Guidelines
- B. Standards of Practice
- C. Construction Administration Guidelines
- **D. Contract Administration Guidelines**

Answer: D

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

According to the CMAA Construction Management Standards of Practice (SOP), under Chapter 6 - Contract Administration, the Contract Administration Guidelines establish the administrative, documentation, and reporting requirements necessary for the Construction Manager (CM) to effectively manage and control project execution in accordance with the contract.

The CMAA defines Contract Administration as:

"The process of managing the relationship between the contracting parties, ensuring compliance with the terms and conditions of the contract, maintaining required documentation, processing payments and changes, and providing the necessary reports to support project management decisions." The Contract Administration Guidelines specifically describe the CM's duties in:

- * Maintaining contract files, correspondence logs, and submittal registers.
- * Processing Requests for Information (RFIs), submittals, and change orders.
- * Administering pay applications and progress reporting.
- * Ensuring documentation complies with project recordkeeping and audit requirements.

These guidelines serve as the CM's reference for consistent and compliant administrative procedures throughout the project's execution phase.

* Option A (Project Administration Guidelines) is not a recognized CMAA standard category.

* Option B (Standards of Practice) refers to the overall CMAA publication containing all management disciplines, not specific administrative procedures.

* Option C (Construction Administration Guidelines) is a general term and not formally identified by CMAA as a standalone set of guidelines.

Therefore, the correct answer is D. Contract Administration Guidelines because it directly addresses the CM's administrative and reporting responsibilities during project execution.

References (CMAA Construction Manager Documents / Study Guide):

* CMAA Construction Management Standards of Practice, 2010 Edition, Chapter 6 - Contract Administration, Section: "Administrative Procedures and Documentation," pp. 60-64.

* CMAA CM Study Guide, Contract Administration Domain, Objective 6.3: "Administer contract documentation and reporting in accordance with project and contractual requirements."

NEW QUESTION # 52

What are the basic responsibilities of an Agency CM related to safety on a construction project?

- A. To manage the safety of the construction contractor's personnel, the designer's personnel, and the Agency CM's personnel
- **B. To execute safety requirements that are spelled out by the Agency CM's contract with the owner and statutes/laws**
- C. To oversee the safety of the construction contractor's personnel
- D. To monitor the safety of the designer's personnel

Answer: B

Explanation:

The CMAA Standards of Practice, Chapter 7 - Safety Management clearly outlines that an Agency Construction Manager (Agency CM) does not assume direct responsibility for the contractor's or designer's safety programs. Instead, the CM must execute only those safety-related duties explicitly defined in the contract with the owner and applicable laws or regulations.

CMAA states:

"The Construction Manager is responsible for implementing safety-related requirements as defined in the contract and as required by law. The contractor retains primary responsibility for the safety of its workforce." Therefore, the Agency CM's role is limited to monitoring, verifying compliance, and ensuring contractual obligations regarding safety are met-not to directly oversee or manage site safety.

CMAA CM Study Guide, Safety Management Domain, Objective 7.1: "Define CM safety responsibilities as limited by contract and applicable regulations."

NEW QUESTION # 53

The CM is tasked with analyzing the schedule variance of a project on a regular basis. The contractor's recent payment application includes a dramatic increase in earned hours than what was budgeted for the project. This MOST likely indicates

- A. the project is behind schedule.
- B. the contractor will be submitting change orders.
- C. the contractor is making more profit than anticipated.
- D. the project is ahead of schedule.

Answer: A

Explanation:

In earned value or earned hours analysis, "earned hours" represent how much work has actually been completed (in units of schedule effort) compared to what was budgeted over time. If a contractor claims a significantly higher number of earned hours than budget expected at that point, that discrepancy often indicates the contractor is catching up for prior slippage or back-loading progress and may be masking a delay. In other words, the project is likely behind schedule; the contractor is accelerating or shifting resources to show a jump in performance, sometimes to avoid triggering delay claims or escalating scrutiny.

While CMAA's formal SOP does not provide a one-sentence treatment of this particular scenario, standard earned value (EV) and schedule variance (SV) theory (used in CMAA's time management domain) supports that an unexpected inflation in earned hours relative to budget can signal a retrospective correction for lagging progress, rather than true ahead-of-schedule condition.

NEW QUESTION # 54

.....

If you are one of such frustrated candidates, don't get panic. Test4Sure declares its services in providing the real Construction-Manager PDF Questions. It ensures that you would qualify for the Certified Construction Manager (CCM) (Construction-Manager) certification exam on the maiden strive with brilliant grades. Test4Sure has formulated the Certified Construction Manager (CCM) (Construction-Manager) product in three versions. You will find their specifications below to understand them better.
