

Pass Guaranteed Quiz Fantastic Microsoft - SC-401 - Administering Information Security in Microsoft 365 PDF

BONUS!!! Download part of TrainingQuiz SC-401 dumps for free: <https://drive.google.com/open?id=1b3R1R3zsXQZEKE1cDFLLuLCM5aG7Dzzq>

Many of our users have told us that they are really busy. Students have to take a lot of professional classes and office workers have their own jobs. They can only learn our SC-401 exam questions in some fragmented time. And our SC-401 training guide can meet your requirements. For there are three versions of SC-401 learning materials and are not limited by the device. They are the versions of PDF, Software and APP online.

Can you imagine that ust a mobile phone can let you do SC-401 exam questions at any time? With our SC-401 learning guide, you will find studying for the exam can be so easy and interesting. If you are a student, you can lose a heavy bag with SC-401 Study Materials, and you can save more time for making friends, traveling, and broadening your horizons. Please believe that SC-401 guide materials will be the best booster for you to learn.

>> SC-401 PDF <<

Providing You Reliable SC-401 PDF with 100% Passing Guarantee

Passing a exam for most candidates may be not very easy, our SC-401 Exam Materials are trying to make the make the difficult things become easier. With the experienced experts to revise the SC-401 exam dump, and the professionals to check timely, the versions update is quietly fast. Thinking that if you got the certificate, you can get a higher salary, and you're your position in the company will also in a higher level.

Microsoft SC-401 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Manage Risks, Alerts, and Activities: This section assesses Security Operations Analysts on insider risk management, monitoring alerts, and investigating security activities. It covers configuring risk policies, handling forensic evidence, and responding to alerts using Microsoft Purview and Defender tools. Candidates must also analyze audit logs and manage security workflows.
Topic 2	<ul style="list-style-type: none">• Protect Data Used by AI Services: This section evaluates AI Governance Specialists on securing data in AI-driven environments. It includes implementing controls for Microsoft Purview, configuring Data Security Posture Management (DSPM) for AI, and monitoring AI-related security risks to ensure compliance and protection.

Topic 3	<ul style="list-style-type: none"> • Implement Information Protection: This section measures the skills of Information Security Analysts in classifying and protecting data. It covers identifying and managing sensitive information, creating and applying sensitivity labels, and implementing protection for Windows, file shares, and Exchange. Candidates must also configure document fingerprinting, trainable classifiers, and encryption strategies using Microsoft Purview.
Topic 4	<ul style="list-style-type: none"> • Implement Data Loss Prevention and Retention: This section evaluates Data Protection Officers on designing and managing data loss prevention (DLP) policies and retention strategies. It includes setting policies for data security, configuring Endpoint DLP, and managing retention labels and policies. Candidates must understand adaptive scopes, policy precedence, and data recovery within Microsoft 365.

Microsoft Administering Information Security in Microsoft 365 Sample Questions (Q109-Q114):

NEW QUESTION # 109

You have a Microsoft 365 E5 subscription.

You need to prevent users from uploading data loss prevention (DLP)-protected documents to the following third-party websites:

web1.contoso.com

web2.contoso.com

The solution must minimize administrative effort.

To what should you set the Service domains setting for Endpoint DLP?

- A. contoso.com
- B. *.contoso.com
- C. web*.contoso.com
- D. web1.contoso.com and web2.contoso.com

Answer: D

Explanation:

The Service domains setting in Microsoft 365 Endpoint Data Loss Prevention (Endpoint DLP) allows administrators to block or allow specific domains for file uploads. The goal is to prevent users from uploading DLP-protected documents to web1.contoso.com and web2.contoso.com.

Setting the Service domains to "web1.contoso.com and web2.contoso.com" precisely targets the two specific third-party websites, minimizing administrative effort while ensuring strict control.

NEW QUESTION # 110

SIMULATION

Username and password

Use the following login credentials as needed:

To enter your username, place your cursor in the Sign in box and select the username below.

To enter your password, place your cursor in the Enter password box and select the password below.

Microsoft 365 Username:

admin@WWLx971455.onmicrosoft.com

Microsoft 365 Password: XXXXXXXXXX

If the Microsoft Edge browser or Microsoft 365 portal does not load successfully, select the Microsoft Edge browser icon from the task bar, type the URL "https://admin.microsoft.com", and press Enter.

The following information is for technical support purposes only:

Lab Instance: XXXXXXXX.

Task 1

You need to provide users with the ability to manually classify files that contain product information that are stored in SharePoint Online sites. The solution must meet the following requirements:

- The users must be able to apply a classification of Product1 to the files.
- Any authenticated user must be able to open files classified as Product1.
- Files classified as Product1 must be encrypted.

Answer:

Explanation:

Restrict access to content by using sensitivity labels to apply encryption When you create a sensitivity label, you can restrict access to content that the label will be applied to. For example, with the encryption settings for a sensitivity label, you can protect content so that:

- * Only users within your organization can open a confidential document or email.

- * Etc.

How to configure a label for encryption

Step 1: From the Microsoft Purview compliance portal, select Solutions > Information protection > Labels Step 2: Locate and select label Product1.

Step 3: On the Define the scope for this label page, the options selected determine the label's scope for the settings that you can configure and where they'll be visible when they're published:

- Step 4: Select Items, and Files. Deselect the other options.

- Step 5: Then, on the Choose protection settings for the types of items you selected page, make sure you select Control access.

- Step 6: On the Access control page, select Configure access control settings: Turns on encryption with rights management and makes the following settings visible:

- Step 7: Assign permissions to specific users or groups. Add users or groups Step 7a: For users: Any authenticated users.

- Step 7b: Permissions: Select View

Note: You can grant permissions to specific people so that only they can interact with the labeled content:

1. First, add users or groups that will be assigned permissions to the labeled content.

2. Then, choose which permissions those users should have for the labeled content.

Assigning permissions:

- Step 8: Click Save

NEW QUESTION # 111

Case Study 1 - Contoso, Ltd

Overview

Contoso, Ltd. is a consulting company that has a main office in Montreal and three branch offices in Seattle, Boston, and Johannesburg.

Existing Environment

Microsoft 365 Environment

Contoso has a Microsoft 365 E5 tenant. The tenant contains the administrative user accounts shown in the following table.

- Users store data in the following locations:

- SharePoint sites
- OneDrive accounts
- Exchange email
- Exchange public folders
- Teams chats
- Teams channel messages

When users in the research department create documents, they must add a 10-digit project code to each document. Project codes that start with the digits 999 are confidential.

SharePoint Online Environment

Contoso has four Microsoft SharePoint Online sites named Site1, Site2, Site3, and Site4.

Site2 contains the files shown in the following table.

- Two users named User1 and User2 are assigned roles for Site2 as shown in the following table.

- Site3 stores documents related to the company's projects. The documents are organized in a folder hierarchy based on the project.

Site4 has the following two retention policies applied:

- Name: Site4RetentionPolicy1

Locations to apply the policy: Site4

Delete items older than: 2 years

Delete content based on: When items were created

- Name: Site4RetentionPolicy2

Locations to apply the policy: Site4

Retain items for a specific period: 4 years

Start the retention period based on: When items were created

At the end of the retention period: Do nothing

Problem Statements

Management at Contoso is concerned about data leaks. On several occasions, confidential research department documents were leaked.

Requirements

Planned Changes

Contoso plans to create the following data loss prevention (DLP) policy:

- Name: DLPpolicy1

Locations to apply the policy: Site2

Conditions:

Content contains any of these sensitive info types: SWIFT Code

- Instance count: 2 to any

Actions: Restrict access to the content

Technical Requirements

Contoso must meet the following technical requirements:

- All administrative users must be able to review DLP reports.

- Whenever possible, the principle of least privilege must be used.

- For all users, all Microsoft 365 data must be retained for at least one year.

- Confidential documents must be detected and protected by using Microsoft 365.

- Site1 documents that include credit card numbers must be labeled automatically.

- All administrative users must be able to create Microsoft 365 sensitivity labels.

- After a project is complete, the documents in Site3 that relate to the project must be retained for 10 years.

You need to meet the retention requirement for the users' Microsoft 365 data.

What is the minimum number of retention policies required to achieve the goal?

- A. 0
- B. 1
- C. 2
- **D. 3**
- E. 4

Answer: D

Explanation:

If you select the Teams or Yammer locations when you create a retention policy, the other locations are automatically excluded. This means that the instructions to follow depend on whether you need to include the Teams or Yammer locations.

<https://docs.microsoft.com/en-us/microsoft-365/compliance/create-retention-policies?view=o365-worldwide#create-and-configure-a-retention-policy>

NEW QUESTION # 112

Drag and Drop Question

You have a Microsoft 365 E5 subscription that has data loss prevention (DLP) implemented.

You need to create a custom sensitive info type. The solution must meet the following requirements:

- Match product serial numbers that contain a 10-character alphanumeric string.

- Ensure that the abbreviation of SN appears within six characters of each product serial number.

- Exclude a test serial number of 1111111111 from a match.

Which pattern settings should you configure for each requirement? To answer, drag the appropriate settings to the correct requirements. Each setting may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

□

Answer:

Explanation:

□

Explanation:

Microsoft custom sensitive info types use pattern settings to refine detection accuracy for data loss prevention (DLP) policies. The Primary element defines the main pattern that must be detected. Since we need to match a 10-character alphanumeric string, this should be defined in the primary element. Character proximity determines how close a supporting keyword (e.g., "SN") must be to the detected data. Since "SN" must be within six characters of the product serial number, this setting ensures a valid match. Additional checks allow for exceptions and exclusions in the detection logic. This ensures that 1111111111 (a test serial number) is excluded from triggering a match.

NEW QUESTION # 113

You have a Microsoft 365 E5 subscription that contains a Microsoft SharePoint Online site named Site1.

Site1 contains the files shown in the following table.

In the Microsoft Purview portal, you create a content search named Content1 and configure the search conditions as shown in the following exhibit.

Which files will be returned by Content1?

- A. File3.docx only
- B. File1 .docx, File2.docx, and File3.docx
- C. File2.docx only
- D. File1 .docx and File3.docx only
- E. File1.docx and File2.docx only

Answer: C

Explanation:

The content search uses the KQL editor with the query -Author:USER1. In eDiscovery/Content search, the minus sign denotes NOT and KQL is case-insensitive for property values. Therefore, this query returns items whose Author is not 'User1'.

File1.docx # Author = User1 # excluded

File2.docx # Author = User2 # included

File3.docx # Author = USER1 (same as User1, case-insensitive) # excluded Result: File2.docx only.

Reference: Microsoft Search (KQL) property restrictions and case-insensitive behavior for queries in content search.

NEW QUESTION # 114

.....

To be successful in your social life and own a high social status you must own good abilities in some area and plenty of knowledge. Passing the test SC-401 exam can make you achieve those goals and prove that you are competent. Buying our SC-401 practice test can help you pass the SC-401 Exam fluently and the learning costs you little time and energy. The questions and answers of our SC-401 test question are chosen elaborately and to simplify the important information to make your learning relaxing and efficient.
