2026 Latest AZ-700 Dumps Pdf | Efficient Designing and Implementing Microsoft Azure Networking Solutions 100% Free Study Materials Review

Prepare for the Microsoft AZ-700 exam with ease using It-Tests Microsoft AZ-700 exam questions in a convenient PDF format. Our PDF files can be easily downloaded and accessed on various devices, including PCs, laptops, Macs, tablets, and smartphones. With the Designing and Implementing Microsoft Azure Networking Solutions (AZ-700) PDF questions, you have the flexibility to study anytime and anywhere, eliminating the need for additional classes. Our comprehensive PDF guide contains all the essential information required to pass the AZ-700 in one shot.

The Microsoft AZ-700 Exam measures the candidate's ability to plan, implement, and manage Azure networking solutions, including virtual networks, load balancing, and network security. It also evaluates their understanding of Azure networking best practices, such as network topology design, network security design, and disaster recovery planning.

Schedule exam

Languages: English

Retirement date: none

This exam measures your ability to design, implement, manage, secure, and monitor the following technical tasks: Hybrid Networking; Core Networking Infrastructure; Routing; Networks; and Private Access to Azure Services.

Microsoft Designing and Implementing Microsoft Azure Networking Solutions Sample Questions (Q24-Q29):

NEW QUESTION # 24

You have an Azure subscription that contains the public IPv4 addresses shown in the following table.

You plan to create a load balancer named LB1 that will have the following settings:

- * Name: LB1
- * Location: West US
- * Type: Public
- * SKU: Standard

Which public IPv4 addresses can be used by LB1?

- A. IP1 and IP3 only
- B. IP3 only
- C. IP1, IP3, IP4, and IP5 only
- D. IP2 only
- E. IP1, IP2, IP3, IP4, and IP5
- F. IP3 and IP5 only

Answer: F

Explanation:

Reference:

<https://docs.microsoft.com/en-us/azure/virtual-network/virtual-network-public-ip-address>

NEW QUESTION # 25

Hotspot Question

You have an Azure subscription that contains a virtual network named VNet1. VNet1 contains the resources shown in the following table.

You need to publish App1 by using AG1 and a URL of <https://app1.contoso.com>. The solution must meet the following requirements:

- TLS connections must terminate on AG1.
- Minimize the number of targets in the backend pool of AG1.
- Minimize the number of deployed copies of the SSL certificate of App1.

How many locations should you import to the certificate, and how many targets should you add to the backend pool of AG1? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION # 26

Hotspot Question

You have an Azure application gateway named AppGW1 that provides access to the following hosts:

- www.adatum.com
- www.contoso.com
- www.fabrikam.com

AppGW1 has the listeners shown in the following table.

You create Azure Web Application Firewall (WAF) policies for AppGW1 as shown in the following table.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

Say your application gateway has a global policy applied to it. Then you apply a different policy to a listener on that application gateway. The listener's policy now takes effect for just that listener.

The application gateway's global policy still applies to all other listeners and path-based rules that don't have a specific policy assigned to them.

<https://docs.microsoft.com/en-us/azure/web-application-firewall/ag/policy-overview#per-site-waf-policy>

NEW QUESTION # 27

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have an Azure subscription that contains the following resources:

- * A virtual network named Vnet1
- * A subnet named Subnet1 in Vnet1
- * A virtual machine named VM1 that connects to Subnet1
- * Three storage accounts named storage1, storage2, and storage3

You need to ensure that VM1 can access storage1. VM1 must be prevented from accessing any other storage accounts.

Solution: You configure the firewall on storage1 to only accept connections from Vnet1.

Does this meet the goal?

- A. Yes
- B. No

Answer: B

NEW QUESTION # 28

You have an on premises web server that hosts a web app named App1 and has the following configurations:

- * IP address 131.107.50.60
- * FQDN server1.contoso.com

You have an Azure subscription.

You need to publish App1 by using Azure Front Door. The solution must meet the following requirements:

- * Ensure that internet users can connect to App1 by using an FQDN of appl.contoso.com
- * Minimize the changes required to the configuration of Front Door if Server 1 is migrated to Azure.

What should you include in the solution? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

☐

Answer:

Explanation:

☐

Explanation:

☐
