HOT Practice Test CIS-Discovery Pdf 100% Pass | High Pass-Rate Certified Implementation Specialist - Discovery Exam Tutorial Pass for sure

Do you want to get the valid and latest study material for CIS-Discovery actual test? Please stop hunting with aimless, TorrentVCE will offer you the updated and high quality ServiceNow study material for you. The CIS-Discovery training dumps are specially designed for the candidates like you by our professional expert team. CIS-Discovery Questions and answers are valuable and validity, which will give you some reference for the actual test. Please prepare well for the actual test with our CIS-Discovery practice torrent, 100% pass will be an easy thing.

ServiceNow CIS-Discovery Certification Exam is a must-have certification for IT professionals looking to broaden their knowledge in the ServiceNow Discovery module. With in-depth training materials, online courses, textbooks and practice exams, the exam is accessible to everyone with the desire to learn. If you are an IT professional, a ServiceNow Administrator or a ServiceNow Developer, then the ServiceNow CIS-Discovery Certification Exam is the right certification for you.

ServiceNow Certified Implementation Specialist - Discovery Sample Questions (Q41-Q46):

NEW QUESTION # 41

Which choice best describes how to use a Behavior for discovery?

- A. The Behavior checkbox on a CI.
- B. The Behavior drop-down menu on a Discovery Status.
- C. The Behavior drop-down menu on a Discovery IP Range.
- D. The MID Server selection method on a Discovery Schedule.

Answer: C

Explanation:
A Behavior is a set of rules that determines which MID Servers launch which types of probes during a Discovery1. It can be assigned to a Discovery IP Range, which is a range of IP addresses that Discovery scans for CIs2. By using the Behavior drop-down menu on a Discovery IP Range, one can control how Discovery behaves for each IP address in that range3. The other options are not related to using a Behavior for discovery. The MID Server selection method on a Discovery Schedule is a way to specify which MID Servers are eligible to run Discovery for a given schedule4. The Behavior drop-down menu on a Discovery Status is a way to filter the Discovery Status records by the Behavior used. The Behavior checkbox on a CI is a way to indicate whether the CI was discovered using a Behavior or not.
1: Discovery behaviors 2: Discovery IP ranges 3: Assign a behavior to an IP range 4: MID Server selection method : Discovery Status : Behavior field on the cmdb_ci table Reference: https://docs.servicenow.com/bundle/paris-it-operations-management/page/product/discovery/task/ create-disco-behavior.html

NEW QUESTION # 42
What pattern operation allows the transfer of a file from the MID Server to a target?

- A. Parse file
- B. Create Connection
- C. Manage Attachments
- D. Put file

Answer: D

Explanation:
The Put file operation allows the transfer of a file from the MID Server to a target1. This operation can be used to copy files from the MID Server to a target device, such as configuration files, scripts, or binaries2. The Put file operation requires the file path on the MID Server and the file path on the target as inputs2.
:
1: Put file
2: Define discovery steps

NEW QUESTION # 43
Discovery finds and maps dependencies for the following types of storage devices. (Choose three.)

- A. Network-attached storage (NAS)
- B. Multiple area network (MAN)
- C. Direct-attached storage (DAS)
- D. Storage area network (SAN)
- E. Redundant Array of Independent Disks (RAID)

Answer: A,C,D

Explanation:
Discovery finds and maps dependencies for the following types of storage devices: Direct-attached storage (DAS), network-attached storage (NAS), or storage area network (SAN)1. NAS or SAN storage that is discovered via a Storage Management Initiative Specification (SMI-S) and Common Information Model (CIM) is also supported2. Discovery collects information about storage area networks from specialized devices, such as storage arrays and Fibre Channel (FC) switches, and creates specific references between the tables in the SAN3. Discovery does not support Multiple area network (MAN) or Redundant Array of Independent Disks (RAID) as types of storage devices.
References:
* 1: Storage device discovery

* 2: Storage Discovery via SMI-S and CIM
* 3: Discovery of storage area networks (SAN)

NEW QUESTION # 44
Which of the below statements are true while troubleshooting Discovery.
Response:

- A. Probes: Information not returned as expected
- B. permission issue: Mideserver Credentils
- C. None of the above
- D. Connectivity Issues: Logical and physical firewalls
- E. Sensors: Information returned but not displayed correctly

Answer: A,B,D,E

NEW QUESTION # 45
Given a custom column named u_custom_column on table cmdb_ci_linux_server, which variable syntax should be used to populate the column in a horizontal discovery pattern using the Set Parameter Value operation?

- A. $cmdb_ci_linux_server[*].u_custom_column
- B. $cmdb_ci_linux_server.u_custom_column.INSERT
- C. $user_var_custom_column
- D. $u_custom_column[1].cmdb_ci_linux_server

Answer: B

Explanation:
The correct variable syntax to populate a custom column in a horizontal discovery pattern is
$cmdb_ci_linux_server.u_custom_column.INSERT. This syntax indicates that the value of the custom column will be inserted into
the cmdb_ci_linux_server table for the current CI. The other options are either invalid or incorrect syntaxes for this operation12.
:
Set Parameter Value operation
Pattern variables
