

F5CAB2 Exam & Training F5CAB2 Materials

P.S. Free & New F5CAB2 dumps are available on Google Drive shared by DumpsQuestion: https://drive.google.com/open?id=1PvDbjv4g1uYYfgRsbgy_GvuJcXtLBU8n

Our company has worked on the F5CAB2 study material for more than 10 years, and we are also in the leading position in the industry, we are famous for the quality and honesty. The pass rate of our company is also highly known in the field. If you fail to pass it after buying the F5CAB2 Exam Dumps, money back will be guaranteed for your lost or you will get another free F5CAB2 exam dumps. Our company will ensure the fundamental interests of our customers.

The web-based F5 F5CAB2 mock test is compatible with many systems. This version of the F5 F5CAB2 practice exam requires an active internet connection. It does not require any additional plugins or software installation to operate. Furthermore, others also support the F5CAB2 web-based practice exam. Features of the F5CAB2 desktop practice exam software are web-based as well.

Training F5 F5CAB2 Materials - Exam F5CAB2 Simulator Online

DumpsQuestion gives a guarantee to our customers that they can pass the F5 F5CAB2 Certification Exam on the first try by preparing from the DumpsQuestion and if they fail to pass it despite their efforts they can claim their payment back as per terms and conditions. DumpsQuestion facilitates customers with a 24/7 support system which means whenever they get stuck somewhere they don't struggle and contact the support system which will assist them in the right way. A lot of students have prepared from practice material and rated it positively.

F5 BIG-IP Administration Data Plane Concepts (F5CAB2) Sample Questions (Q48-Q53):

NEW QUESTION # 48

When upgrading a BIG-IP redundant pair, what happens when one system has been updated but the other has not?

- A. Synching should not be performed.
- B. This is not possible since both systems are updated simultaneously.
- C. The first system to be updated will assume the Active role.

- D. The older system will issue SNMP traps indicating a communication error with the partner.

Answer: A

NEW QUESTION # 49

A BIG-IP Administrator has a cluster of devices.

What should the administrator do after creating a new Virtual Server on device 1? (Choose one answer)

- A. Create a new virtual server on device 2
- **B. Synchronize the settings of device 1 to the group**
- C. Synchronize the settings of the group to device 1
- D. Create a new cluster on device 1

Answer: B

Explanation:

In a BIG-IP device service cluster, configuration objects such as virtual servers, pools, profiles, and iRules are maintained through configuration synchronization (config-sync).

Key BIG-IP concepts involved:

- * Device Service Cluster (DSC) A cluster is a group of BIG-IP devices that share configuration data. One device is typically used to make changes, which are then synchronized to the rest of the group.
- * Config-Sync Direction Matters
- * Changes are made on a local device
- * Those changes must be pushed to the group
- * The correct operation is "Sync Device to Group"

Why C is correct:

- * The virtual server was created only on device 1
- * Other devices in the cluster do not yet have this object
- * To propagate the new virtual server to all cluster members, the administrator must synchronize device 1 to the group

Why the other options are incorrect:

- * A. Synchronize the settings of the group to device 1 This would overwrite device 1's configuration with the group's existing configuration and may remove the newly created virtual server.
- * B. Create a new cluster on device 1 The cluster already exists. Creating a new cluster is unnecessary and disruptive.
- * D. Create a new virtual server on device 2 This defeats the purpose of centralized configuration management and risks configuration drift.

Conclusion:

After creating a new virtual server on a BIG-IP device that is part of a cluster, the administrator must synchronize the configuration from that device to the group so all devices share the same ADC application objects.

NEW QUESTION # 50

Which statement is true concerning the default communication between a redundant pair of BIG-IP devices?

- **A. Data for both connection and persistence mirroring are shared through the same TCP connection.**
- B. Regardless of the configuration, some data is communicated between the systems at regular intervals.
- C. Connection mirroring data is shared through the serial fail over cable unless network failover is enabled.
- D. Communication between the systems cannot be effected by port lockdown settings.

Answer: A

NEW QUESTION # 51

A BIG-IP Administrator needs to apply a health monitor for a pool of database servers named DB_Pool that uses TCP port 1521.

Where should the BIG-IP Administrator apply this monitor?

- A. Local Traffic > Nodes > Default Monitor
- B. Local Traffic > Pools > DB_Pool > Members
- C. Local Traffic > Profiles > Protocol > TCP

- **D. Local Traffic > Pools > DB_Pool > Properties**

Answer: D

Explanation:

In the BIG-IP system object hierarchy, health monitors can be applied at three levels: Node, Pool, and Pool Member.

- * Pool Level (Properties): Applying a monitor at the Pool > Properties level is the most common and efficient administrative practice. When applied here, the monitor is inherited by all members of that pool. If the monitor fails for a specific member, that member is marked "down" specifically for that pool.
- * Node Level: If a monitor is applied at the Node level (Local Traffic > Nodes), it checks the health of the physical IP address itself. If it fails, that node (and all pool members associated with it) is marked down globally across the entire system.
- * Member Level: Applying a monitor at the Pool > Members level allows for specific "per-member" monitoring, which is usually only done if different members in the same pool require different health checks.
- * The Specific Case: For a standard database pool like DB_Pool, the administrator should navigate to Local Traffic > Pools > DB_Pool > Properties and select the appropriate monitor (e.g., a custom TCP or Oracle monitor) from the "Health Monitors" configuration section.

NEW QUESTION # 52

A BIG-IP Administrator needs to connect a BIG-IP system to two upstream switches to provide external network resilience. The network engineer instructs the administrator to configure interface binding with LACP. Which configuration should the administrator use? (Choose one answer)

- **A. A Trunk containing an interface connected to each switch.**
- B. A virtual server with an LACP profile and the interfaces connected to the switches as pool members.
- C. A Trunk listing the allowed VLAN IDs and MAC addresses configured on the switches.
- D. A virtual server with an LACP profile and the switches' management IPs as pool members.

Answer: A

Explanation:

In BIG-IP architecture, link aggregation and redundancy at Layer 2 are implemented using Trunks, not virtual servers or pools.

According to BIG-IP Administration Data Plane Concepts:

- * Interfaces are the physical network ports on the BIG-IP device
 - * A Trunk is a logical grouping of multiple interfaces
 - * Trunks can be configured to use LACP (Link Aggregation Control Protocol) to:
 - * Provide link redundancy
 - * Increase aggregate bandwidth
 - * Allow automatic detection of link failures
 - * VLANs are then assigned to the trunk, not directly to individual interfaces, once aggregation is in place
- Correct Design for the Scenario:

To connect BIG-IP to two upstream switches with LACP:

- * One physical interface from BIG-IP connects to Switch A
- * Another physical interface from BIG-IP connects to Switch B
- * Both interfaces are placed into the same trunk
- * LACP is enabled on the trunk and on the switches

This configuration allows:

- * Traffic to continue flowing if one interface or switch fails
 - * Proper LACP negotiation between BIG-IP and the upstream switches
 - * Clean separation of responsibilities (Layer 2 handled by trunking, Layer 4-7 by virtual servers)
- Why Option D Is Correct:
- * A Trunk containing an interface connected to each switch is exactly how BIG-IP implements LACP-based interface binding
- Why the Other Options Are Incorrect:
- * A & B - Virtual servers operate at Layers 4-7 and have nothing to do with physical link aggregation or LACP
 - * C - VLAN IDs and MAC addresses are not configured inside a trunk definition; trunks aggregate interfaces, and VLANs are applied to trunks
- Key Data Plane Concept Reinforced:

On BIG-IP systems, LACP is always configured on a Trunk, which aggregates physical interfaces to provide Layer 2 resiliency and bandwidth aggregation. Virtual servers and pools are not involved in physical interface binding.

NEW QUESTION # 53

.....

The efficiency of our F5CAB2 exam braindumps has far beyond your expectation. On one hand, our F5CAB2 study materials are all the latest and valid exam questions and answers that will bring you the pass guarantee. on the other side, we offer this after-sales service to all our customers to ensure that they have plenty of opportunities to successfully pass their actual exam and finally get their desired certification of F5CAB2 Learning Materials.

Training F5CAB2 Materials: <https://www.dumpsquestion.com/F5CAB2-exam-dumps-collection.html>

F5 F5CAB2 Exam Nowadays, the network is widespread, and online deals is naturally come out along with the market demands, which is actually solving some life troubles, but it also brings some potential safety hazard, We have three different F5CAB2 exam braindumps for you to choose: the PDF, Software and APP online, If you buy our F5CAB2 real pass4cram, you will enjoy one year free update.

A quick, easy system for understanding anyone, They Valid Test F5CAB2 Bootcamp publish a lot of content and have huge link popularity, Nowadays, the network is widespread, and online deals is naturally come out along with the market F5CAB2 demands, which is actually solving some life troubles, but it also brings some potential safety hazard.

Quiz Fantastic F5 - F5CAB2 Exam

We have three different F5CAB2 exam braindumps for you to choose: the PDF, Software and APP online, If you buy our F5CAB2 real pass4cram, you will enjoy one year free update.

We offer payments through Paypal-one of the most trusted payment providers which can ensure the safety shopping for F5CAB2 study torrent, If users fail exams with our test questions for F5CAB2 - BIG-IP Administration Data Plane Concepts (F5CAB2) you don't need to pay any money to us.
