Valid 71301T Exam Questions And Answers offer you accurate Reliable Test Labs | Avaya Aura Communication Applications Implement

Have you signed up for Avaya 71301T Exam? Will masses of reviewing materials and questions give you a headache?

Prep4sureExam can help you to solve this problem. It is absolutely trustworthy website. Only if you choose to use exam dumps Prep4sureExam provides, you can absolutely pass your exam successfully. You spend lots of time on these reviewing materials you don't know whether it is useful to you, rather than experiencing the service Prep4sureExam provides for you. So, hurry to take action.

Avaya Aura Communication Applications Implement Sample Questions (Q42-Q47):

NEW QUESTION # 42

On Avaya Session Border Controller for Enterprise (SBCE), which two ways can be used to view System Logs? (Choose two.)

- A. from System Manager web GUI > Alarms and Events
- B. from CLI execute `cat > var > log > Avaya > syslog`
- C. from EMS web GUI SBCE Dashboard access Logs > System Logs
- D. from CLI execute `cat archive > syslog > ipcs.log`

Answer: C,D

Explanation:

C: Call Trace data are written to this location:

- /archive/syslog/ipcs/octeon.log

D: Viewing system logs Procedure

1. Log on to the EMS web interface with administrator credentials.

2. Select the Logs option from the toolbar, and click the System Logs menu.

The system displays the Syslog Viewer screen. On this screen, you can specify criteria in the Query Options section to filter the results displayed.

3. In the Start Date and End Date fields, filter the results displayed in a search report to fall within starting and ending dates and times. In previous Avaya SBCE Syslog Viewer windows, there were four separate fields:

Start Date, Start Time, End Date, and End Time.

NEW QUESTION # 43

To trace SIP messages exchanged during a Remote Worker registration in real-time, which Avaya Session Border Controller for Enterprise (ASBCE) CLI tool is used?

- A. tracem
- B. traceReg
- C. traceRW
- D. tracesbc

Answer: D

Explanation:

The tracesbc utility is the primary diagnostic and troubleshooting tool used on the Avaya Session Border Controller for Enterprise (ASBCE) command-line interface.

Real-Time Monitoring: When you run tracesbc from the CLI (after logging in as ipcs), it provides a real-time, scrolling view of all SIP signaling entering and leaving the SBC interfaces.

Remote Worker Tracking: Because Remote Worker registration involves a complex exchange of SIP REGISTER and SUBSCRIBE messages between the external client, the SBC, and the internal Session Manager, tracesbc is essential for verifying where a registration might be failing (e.g., a 401 Unauthorized loop or a timeout).

Ladder Diagrams: One of the most powerful features of tracesbc is its ability to generate a "ladder diagram" of a specific call or registration, showing exactly how the messages flow between the different IP interfaces (Internal vs. External).

NEW QUESTION # 44

In Avaya Session Border Controller for Enterprise (SBCE), what is the default state of an Interface?

- A. Active
- B. Enabled
- C. Deployed

- D. Disabled

Answer: D

Explanation:

Example:

Commission the SBC--SBC Configuration

1. The A1 and B1 interfaces display on the Network Configuration tab.
2. Click on the Interface Configuration tab:

3. Click the Toggle link for both the A1 and the B1 interfaces.

The Administrative Status for both A1 and B1 changes to Enabled:

NEW QUESTION # 45

To log on the one-X Communicator to Avaya Aura Presence Services server, what do you enter in the IM and Presence / Server field of the one-X Communicator?

- A. the SM100 IP-Address of FQDN of Avaya Aura Session Manager (SM)
- B. the management IP-Address of FQDN of Avaya Breeze™ server
- C. the management IP-Address of FQDN of Avaya Aura Session Manager (SM)
- D. the SM100 IP-Address or FQDN of Avaya Breeze™ server

Answer: A

NEW QUESTION # 46

A user is calling the helpdesk to ask how the Avaya Spaces Calling extension can be added, to allow calling from their Avaya Spaces session. How should the helpdesk engineer respond?

- A. Use your preferred browser to navigate to the AAWG web interface, log in with your company credentials, and use the hyperlink at the bottom-right corner of the home page to download and install Avaya Spaces Calling.
- B. Make sure your PC has internet access, and use the Microsoft Store to find, download and install the Avaya Spaces Calling app.
- C. Make sure your PC has internet access, use the Google Chrome browser to open the Chrome Web Store, search for the Avaya Spaces Calling extension, and add this extension to the Chrome browser.
- D. Make sure your PC has internet access, use your preferred browser to navigate to www.support.avaya.com, and then find the Avaya Spaces Calling app, download and install it.

Answer: C

Explanation:

The Avaya Spaces Calling extension is a softphone that provides calling features to users of Avaya Spaces by leveraging their existing Avaya infrastructure. This extension can be used alongside the Avaya Spaces web application or desktop client to make and receive audio calls through the Avaya Aura Web Gateway (AAWG). To add the Avaya Spaces Calling extension, you need to have
